

CHES Release 1 AMO Readiness

Today marks the opening of the CHES Release 1 AMO Readiness phase, the next significant milestone in the delivery of the CHES Project.

This is the next opportunity for Approved Market Operators and their Software Providers to operate in a production-like ASX test environment (ITE), incorporating their functional and non-functional testing.

Information relating to this phase including the latest Release Notes, Known Issues Log and Frequently Asked Questions (FAQs) are available on the central [Release 1 hub](#).

ASX appreciates the contributions and effort to date from you and your organisation in helping shape this phase.

Kind regards,
The CHES Project Team
