

CHESS Release 1 Clearing Regression Test phase open and documentation published

The Industry Test Environment (ITE) for Release 1 of the CHESS Project is **now open for the Clearing Regression Test phase**.

The objective of the Clearing Regression phase is to confirm that Clearing Participants' systems can perform targeted scenario testing to verify that their systems can continue to receive and process backwards compatible messages.

To support Clearing Participants through this upcoming test phase, ASX has today published additional documentation:

- [Clearing Regression Release Notes](#)
- [CHESS Release 1 FAQs](#)
- [CHESS Release 1 Known Issues Log](#)

These resources, along with the previously published [Clearing Regression Test Guide](#), are designed to support Clearing Participants in successfully completing the testing requirements for the CHESS Release 1 Clearing Regression phase. They include details of how to connect to the test environment, testing scenarios, guidance on the Clearing Participant Trade File Upload Tool, available and suggested security/instrument usages and Corporate Actions timelines.

Additionally, the [Clearing Regression Release Notes](#) outline the functional capabilities of the ITE and highlight that it is not designed to support non-functional/volume testing. As

such, Clearing Participants are requested to note the documented thresholds of ITE, to avoid any potential impacts to the stability of this functional testing environment.

Please note that this document is accessible from the [ASX Stakeholder Engagement page](#) and may be protected using [ASX Online](#) authentication. This means you will be required to use your ASX Online credentials to access them. If you do not already have an ASX Online account, please contact your organisation's Enterprise Administrator, or reach out to the [ASX Customer Technical Support Team](#).

Please direct any questions to the [CHESS Stakeholder Engagement Team](#) or contact your Stakeholder Engagement representative.

Kind regards,
The CHESS Project Team
