

CHESS Release 1 Cutover Operating Model now available

We are pleased to advise that the **CHESS Release 1 Cutover Operating Model** is now available.

The purpose of this CHESS Release 1 Cutover Operating Model is to set clear expectations for the cutover ways of working, such as governance, communications methods and incident management, during the CHESS Release 1 (Clearing) go-live weekend. It is intended to be read as an extension of the [CHESS Release 1 Cutover Approach](#) and will be complimentary to the Runbook, an edition of which will be produced for every cutover event. While of interest to all stakeholders, this document is intended for Approved Market Operators and their software providers.
