CHES Replacement – Independent Assessment of ASX’s Assurance Program – June Progress Report

Today we published the second independent expert report on the assessment of ASX’s Assurance Program for the implementation of the CHES Replacement Program. This follows [EY’s Design Report](#) published in March that assessed the Assurance Program to determine whether it was fit for purpose, identifying any topics that required further independent assessment and any remedial actions.

The objective of today’s report is to provide an update on the status of the remedial actions from the Design Report and the progress of completed assurance activities. EY’s assessment found the Assurance Program continued to be fit for purpose, subject to ASX addressing two recommendations. This report also includes an update on the trade outage independent expert review recommendations relevant to the CHES Replacement Program.

ASX invites you to read the report.
