

# ASX CHESS Project

ISO Design Working Group

19 June 2025

# Acknowledging Country

ASX acknowledges the Traditional Owners of Country throughout Australia. We pay our respects to Elders past and present

Artwork by Lee Ann Hall, *My country My People*

# Housekeeping

## Troubleshooting

- > Please mute yourself when not speaking
- > Please use the 'raise hand' feature on MS Teams if you would like to ask a question
- > Please introduce yourself when talking for the benefit of all members
- > Dial in details (audio only):
  - +61 2 7208 4607
  - Phone Conference ID: 508 993 830#

Presentation materials were distributed before the meeting and will be published on the website

# Important Information

## Competition Law Reminder

Workshop members are reminded to have regard to their obligations under competition law. In particular, please note that the Competition and Consumer Act prohibits a corporation from engaging with one or more persons in a concerted practice that has the purpose, effect or likely effect of substantially lessening competition.

# Agenda

01 Welcome and Opening Remarks

02 Feedback and ASX Responses

03 Batch Settlement

04 Next Steps

05 Forward Engagement Plan and AOB

# 01

## Welcome and Opening Remarks

# 02

## Feedback and ASX Responses

# 02a – ISO Design Working Group Actions

#	Action	ASX Response	Raised	Status
ISOWG_M01	ASX to provide further information to Working Group Members in relation to adjustment of Net Positions		May 2025	Q3 2025
ISOWG_M02	Working Group Members to provide use case in relation to As-At Trades registered as ex-movements		May 2025	Open
ISOWG_M03	Working Group Members to provide further information in relation to use of Condition Codes on the Trade Confirmation message (EIS 164) within existing business processes	Refer to slide 9	May 2025	Propose to close
ISOWG_M04	ASX to investigate whether delivering and receiving additional parties can be made public to the counterparty on the allegation notification	ASX has evaluated the feedback and will expose the Additional Parties (2-5) on the allegation notification to the counterparty.	May 2025	Propose to close
ISOWG_M05	ASX to investigate the logic in relation to the Universal Transaction Identifier (UTI) and whether it should be a mandatory matching criteria if provided	Universal Transaction Identifier (UTI) is a secondary matching criteria and will be matched if populated against an UTI which exactly matches, or blank.	May 2025	Propose to close
ISOWG_M06	ASX to investigate whether the hold indicator is exposed to the counterparty on the allegation and status messages prior to the Intended Settlement Date (ISD)	Refer to slide 11	May 2025	Open
ISOWG_M07	ASX to investigate the number of status updates generated for a settlement instruction which is on hold to the requesting Participant	Refer to slide 11	May 2025	Open
ISOWG_M08	ASX to investigate the use case of reapplying a hold indicator after it has been released	Refer to slide 11	May 2025	Open

## 02b – Feedback & ASX Responses

7 feedback items were received in MyStandards for collections presented at the 21 May ISO Design Working Group

- > No changes were made as a result of feedback

Population of Condition Codes on Trade Notification Report (secl.001)

- > Condition Codes will be populated onto the Trade Notification Report (up to 5 Condition Codes)
- > Basis of Quotation will be populated onto the Trade Notification Report (up to 3 Basis of Quotations)

The screenshot displays a web form for a Trade Notification Report. It is organized into two main sections: 'Notified Trade Leg Details' and 'Guaranteed Trade'. The 'Notified Trade Leg Details' section includes fields for 'Original Trade Date', 'Condition Code', 'Seller Order Reference Number', and 'Buyer Order Reference Number'. The 'Guaranteed Trade' section includes a 'Basis Of Quotation' field. In the image, the 'Condition Code' field in the first section and the 'Basis Of Quotation' field in the second section are highlighted with green rectangular boxes.

▼	🔗	Notified Trade Leg Details
📅		Original Trade Date
☰		Condition Code
☰		Seller Order Reference Number
☰		Buyer Order Reference Number
>	🔗	Guaranteed Trade
☰		Basis Of Quotation

# 02c – Message Updates

## Trade Confirmation Notification (clgr\_501\_secl\_001)

Trade Confirmation Notification is generated and sent to the Delivering and Receiving Clearing Participant when a trade is successfully registered in CHESS.

When a crossing is registered against the same position account, a single Trade Confirmation Notification is generated for the registered trade.

- > **Change:** Buy Sell Indicator will be populated with "Cross" (CROS)

▼ ☰ Buy Sell Indicator

---

☐ Buy [BUYI]

---

☐ Cross [CROS]

---

☐ Sell [SELL]

---

☐ Sell Short [SESH]

---

ASX is working through the scenarios where a crossing is registered against different position accounts.

## 02d – Updates on Hold/Release

ASX has received material feedback in relation to the design of hold/release to ensure it will meet the original business requirement and be used in a fair and effective way. This will continue to be discussed in the next BWG forums.

#	Feedback	Status
1	Hold status should be notified on the allegation	ASX is evaluating whether this is possible in BaNCS and supported in the ISO messages. It should also be considered whether this would actively discourage matching.
2	Hold status should be shared immediately upon match as opposed to a subsequent process	ASX proposes the solution is modified to provide the hold status immediately upon match.
3	Application of a hold status should not be permitted after the transaction has been matched	ASX is evaluating whether the hold can be restricted to the initial match only and cannot be applied as a subsequent update.
4	Hold status should not be permitted to be placed by the receiver of securities (i.e. the buyer)	Whether to restrict to the delivering participant only requires further industry discussion, as some participants have indicated potential utility in this scenario.
5	How fail fees should be applied in relation to instructions on hold	Further ASX evaluation and industry discussion is required on fail fees. However, it should be noted the principal is to encourage instructions to be matched early.
6	Unilateral cancellations should be supported for	Giving consideration to items #1 and #2 this may not be necessary.

# 03

## Batch Settlement

*For discussion*

# 03 – Batch Settlement

## Scope

Functionality to be discussed in ISO Design Working Group:

- > Full Settlement
- > Failures (including partial settlement and full failure)

*Note: Bilateral and Unilateral Batch Instructions (confirmation & status') were discussed in previous ISO Design Working Groups*

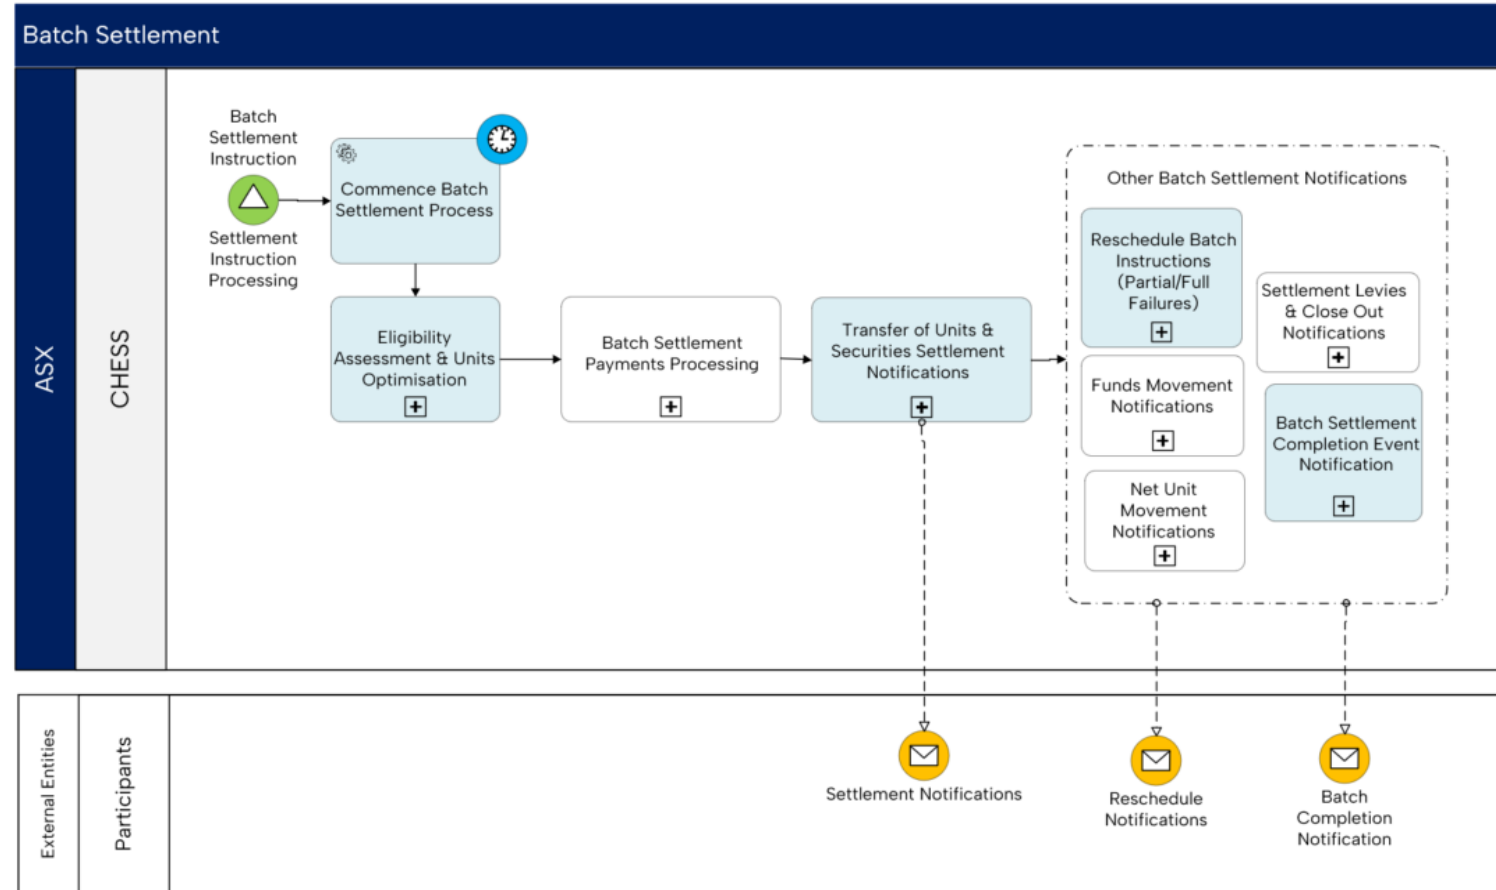

To be discussed in a future ISO Design Working Group:

- > Payments processing, including funds notification and authorisation workflows
- > Net movement notifications (including units, funds and trust)
- > Default management processes
- > Projected unit failure notifications
- > Levy and close out notifications
- > Exception handling

# 03 – Batch Settlement

## Overview

- > Participant Initiated Batch Settlement Instructions and Cash Market Settlement Instructions will be scheduled for settlement as part of a Batch Settlement Cycle
- > All instructions that are eligible for settlement are assessed against a settlement algorithm with the objective of optimising the settlement outcome
- > As part of a Batch Settlement Cycle Participants are notified of:
  - The settled and remaining portion of instructions
  - Instructions that fully fail inclusive of those that were deemed ineligible for settlement
- > The remaining portion of instructions that settled partially and instructions that failed in full will be rescheduled to the next business date. Participants will be notified of this as a separate notification
- > A Batch Completion Notification will be sent to all participants

# 03 – Batch Settlement

## Message Table

Msg Type	EIS number	ISO 20022 Base Message	ASX Message ID "Business Service"	Change
Status Advice (Suspended Settlement Instruction)	162	sese.024 Securities Settlement Transaction Status Advice	sett_106 Settlement Instruction Status Advice	No change to the base message but is now consolidated to a single ASX Business Message.  ASX Message Id updated: From: <a href="#">sett_129_sese_024</a> To: <a href="#">sett_106_sese_024</a>
Status Advice (Reschedule Settlement Instruction)	124	sese.032 Securities Settlement Transaction Generation Notification	sett_143 Settlement Obligation Notification	No change for Market Obligations but is now consolidated to a single ASX Business Message.  From: <a href="#">sett_130_sese_032</a> To: <a href="#">sett_143_sese_032</a> Change the base message for Settlement Instructions From: <a href="#">sett_130_sese_032</a> To: <a href="#">sett_106_sese_024</a>
Settlement Confirmation	156 192	sese.025 Securities Settlement Transaction Confirmation	sett_119 Settlement Instruction Confirmation	Previous iteration of the project implemented a settlement model which communicated full and partial failures. Settlement confirmations were not provided for settled obligations.  The CHES Project will revert to providing individual settlement confirmation responses to each instruction settled in the batch settlement project.
Event Notification	542	admi.004 System Event Notification	comm_810 Event Notification	ASX proposed in the December ISO WG to add the message admi.004 to the common messages collection (comm)  ASX Message Id updated: from: <a href="#">sett_170_admi_004</a> to: <a href="#">comm_810_admi_004</a>

# 03 – Batch Settlement – Message Attributes for Market Obligation

Base Messages: sese.032, sese.024, sese.025

The screenshot shows a user interface for selecting message attributes, organized into four sections, each with a green border:

- Securities Movement Type**: Contains two radio button options: ☐ Delivery [DELI] and ☐ Receive [RECE].
- Payment**: Contains two radio button options: ☐ Against Payment Settlement [APMT] and ☐ Separate Settlement [FREE].
- Securities RTGS**: Contains a single radio button option: ☒ Indicator.
- Partial Settlement Indicator**: Contains two radio button options: ☐ Partial Allowed [PART] and ☐ Partial Not Allowed [NPAR].

Securities Movement Type element specifies if the movement on a securities account results from a deliver or a receive instruction. For Market Obligations securities movement type Receive [RECE] was introduced in addition to Delivery [DELI]

Payment element specifies how the transaction is to be settled and Market Obligations Payment must be populated always with Against Payment Settlement [APMT]

Securities RTGS indicator "Settlement Method" defines if the transaction is executed in Batch "false". For Market Obligations it is always "false"

Partial Settlement Indicator determine if Partial allowed [PART] or Partial Not Allowed [NPAR]. For Market Obligations, Partial Settlement Indicator must always be Partial allowed [PART]

**i** Note: Matching Status will not be populated in case of Market Trades.

# 03 – Batch Settlement – Message Attributes for Market Obligations

Base Messages: sese.032, sese.024, sese.025

▼	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Securities Transaction Type
▼	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Code
			<b>Transaction Basis</b>
<input checked="" type="checkbox"/>	<input type="radio"/>		Exchange Traded Funds [ETFT]
