

Industry Testing Environment – Clearing

The CHES Project Industry Test Environment (ITE) opens later this week on 28 February 2025 — a significant milestone that will allow Approved Market Operators to connect to CHES's new clearing component in a test environment.

ASX has created a central hub with information on industry testing.

[Visit the hub](#)

This webpage will allow users to monitor the environment status, access the latest release notes, and track the status of open issues.

ASX has assembled a dedicated support team to assist AMOs and their Software Providers throughout this phase. You can find various ways to contact the team via the hub above.

Kind regards,
CHES project

20 Bridge Street, Sydney, NSW, 2000, Australia
