Amended 01/07/13, 11/02/14, 15/06/15, 13/07/18

Form 1 – Independent Auditor’s Report on Net Tangible Assets Rules

Independent Auditor’s Report to the Directors of [Participant Name]

We have audited the internal control policies and procedures (“internal controls”) of [Participant Name] (the “Participant”) designed to ensure compliance with the requirements of:

ASX Clear (Futures) Pty Limited’s (“ASX Clear (Futures)”) **Operating Rule 8.1/OTC Rule 3.3(a)(ii)*** in relation to the maintenance of net tangible assets (the “Net Tangible Assets Rules”)

in order to express an opinion about their effectiveness for the [period/year] ended [date].

The Responsibility of the Directors for Internal Controls

The directors of the Participant are responsible for maintaining an effective internal control structure, including establishing and maintaining accounting records and effective internal controls designed to ensure compliance with the requirements of the Net Tangible Assets Rules. We have conducted an independent audit of the internal controls designed to ensure compliance with the requirements of the Net Tangible Assets Rules in order to express an opinion on them to the directors of the Participant for the [period/year] ended [date].

Auditor’s Responsibility

Our audit has been conducted in accordance with **Australian Auditing Standards / [insert auditing standards applicable to Participant’s home jurisdiction]*** and accordingly included such tests and procedures as we considered necessary in the circumstances. These procedures have been undertaken to form an opinion whether in all material aspects, the Participant maintained suitably designed and effective internal controls to ensure compliance with the requirements of the Net Tangible Assets Rules for the [period/year] ended [date].

INHERENT LIMITATIONS

Because of the inherent limitations of any internal control structure it is possible that fraud, errors or non-compliance with laws and regulations may occur and not be detected. Further, the overall internal control structure, within which the internal controls designed to ensure compliance with the requirements of the Net Tangible Assets Rules operate, has not been audited, and no opinion is expressed as to its effectiveness.

An audit is not designed to detect all weaknesses in internal controls or all instances of non-compliance with the requirements of the Net Tangible Assets Rules as it is not performed continuously throughout the period/year and the tests performed over the internal controls are on a sample basis having regard to the nature and size of the Participant.

Any projection of the evaluation of internal controls to future periods is subject to the risk that the internal controls may become inadequate because of changes in conditions, or that the degree of compliance with them may deteriorate.

The audit opinion expressed in this report has been formed on the above basis.

BASIS FOR QUALIFIED OPINION (IF APPLICABLE)

[QUALIFIED] AUDITOR'S OPINION

In our opinion, [except for the matters referred to in the qualification below,] [Participant Name]:

This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the financial information set out in the Return to ensure that the Return is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial information set out in the Return based on our audit. We conducted our audit in accordance with **Australian Auditing Standards/[insert auditing standards applicable to Participant's home jurisdiction]**. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance, whether the financial information set out in the attached Return, is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures of the financial information set out in the Return. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial information set out in the Return whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the Participant's preparation and fair presentation of the financial information set out in the Return in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Participant's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors of the Participant, as well as evaluating the overall presentation of the financial information set out in the Return.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

INDEPENDENCE

In conducting our audit, we have complied with the independence requirements of **APES 110: Code of Ethics for Professional Accountants/[code of conduct legislation applicable to Participant's home jurisdiction]**.

BASIS FOR QUALIFIED OPINION (IF APPLICABLE)

Without modifying our opinion, we draw attention to the basis of preparation of the Return. The Return has been **prepared in accordance with ASX Clear (Futures) Pty Limited Operating Rule 8.5(b)/OTC Rule 3.3(b)(ii)***.

This report has been prepared for the Participant in order to meet its obligations to lodge this report with ASX Clear (Futures) Pty Limited. We disclaim any assumption of responsibility for reliance on this report to any person other than the Participant and ASX Clear (Futures) Pty Limited or for any purpose other than that for which it was prepared.

Specifically, ASX Clear (Futures) directs Clearing Participants as follows:

- Clearing Participants must Close Out Back-to-Back Open Positions within each Individual Account no later than the time prescribed for the purposes of Rule 46.1 on the Business Day following the creation of those Back-to-Back Open Positions;
- Except as specified below in so far as it relates to Open Positions across multiple Individual Accounts of a single legal entity, Open Positions held within an Individual Account, whether or not it is a sub-account of an Affiliated Account, must not at any time be settled or offset against Open Positions held within another Individual Account or sub-account, unless these positions are formally transferred on market into the same Individual Account; and
- If a Clearing Participant wishes to Close Out Open Positions across multiple Individual Accounts of a single legal entity, the Clearing Participant must ensure legal advice is obtained that such activity does not constitute a breach of the Rules or the law.

Introduction

Open Interest (OI) is one of a number of indicators of a market's depth of liquidity. Exchange's OI is derived from the summing of Open Positions held by all Clearing

Participants in their House Clearing Accounts and Client Clearing Accounts (collectively referred to as “Clearing Accounts”) at the end of each trading day. These figures are submitted daily by the relevant Clearing Participant into the Exchange System in accordance with Rule 46.1¹.

A Clearing Participant would derive the figures to be submitted into the Exchange System from the summing in its back office of Open Positions held in Individual House Accounts² and Individual Client Accounts³ (collectively referred to as “Individual Accounts”).⁴ Accordingly, the fundamental level at which market liquidity is held is at the level of the Individual Account.

It has come to ASX Clear (Futures)’s attention that not all Clearing Participants have been netting Individual Accounts in their back offices in a manner which enables the most accurate OI to be derived. In particular, ASX Clear (Futures) is concerned with the failure of certain Clearing Participants to consistently Close Out in their back offices Back-to-Back Open Positions⁵ within Individual Accounts. If submitted into the Exchange System, such Back-to-Back Open Positions may inflate the OI figure without actually indicating an increase in the true liquidity of the market.

To enhance the integrity of OI, ASX Clear (Futures) now requires that, in fulfilling their obligations under Rule 46.1, Clearing Participants must (as outlined in this Direction) Close Out Back-to-Back Open Positions within each Individual Account no later than the time prescribed for the purposes of Rule 46.1 on the Business Day following the creation of those Back-to-Back Open Positions in their back offices in order that such positions do not form part of the total number of Open Positions submitted into the Exchange System towards the relevant Clearing Account.⁶

The Tables below illustrate how Clearing Participants must comply with this Direction.

Amended 01/07/10, 11/02/14

Application of this Direction

In Table 1 below, assume that a Client Clearing Account of a Clearing Participant contains Individual Client Accounts which hold the following Open Positions in a particular futures contract⁷:

¹ Rule 46.1 requires a Clearing Participant to advise ASX Clear (Futures) on a daily basis of the number of Open Positions which it wishes to remain open. This advice is effected through the Clearing Participant submitting that information into the Exchange System.

² An ‘Individual House Account’ is an individual account established by an Exchange Participant on its own behalf for the purposes of Trading on the Exchange.

³ An ‘Individual Client Account’ is an individual account established by an Exchange Participant for a Client for the purposes of Trading on the Exchange.

⁴ The total Open Positions held in a particular Clearing Participant’s House Clearing Account should be derived in that Clearing Participant’s back office from summing the number of Open Positions held in each of its Individual House Accounts. The total Open Positions held in a particular Clearing Participant’s Client Clearing Account should be derived in that Clearing Participant’s back office from summing the number of Open Positions held in each of its Individual Client Accounts.

⁵ ‘Back-to-Back Open Positions’ are Open Positions within an Individual Account which can be matched and settled against each other.

⁶ Such a practice would also reduce the risk of incorrect settlements being made in error.

⁷ The same principle would apply to a House Clearing Account and Individual House Accounts.

Table 1 – Example of a Client Clearing Account

<u>Client Clearing Account</u>	<u>Short</u>	<u>Long</u>	<u>Net (to be submitted into the Exchange System)</u>
Individual Client Account 1	-400	+50	-350
Individual Client Account 2	0	+500	+500
Individual Client Account 3	-300	+500	+200
Total	-700	+1050	-350, +700

Closing Out Back-to-Back Open Positions in Individual Accounts

In the above table, Individual Client Account 1 holds Back-to-Back Open Positions of 50 lots and Individual Client Account 3 holds Back-to-Back Open Positions of 300 lots. Individual Client Account 2 does not contain any Back-to-Back Open Positions. Before determining each Individual Client Account's contribution to the Client Clearing Account, Back-to-Back Open Positions are to be eliminated from each Individual Client Account in the Clearing Participant's back office. As shown in the 'Net' column of the above table, the resulting net positions to form part of the total to be submitted into the Exchange System would be -350 short in Individual Client Account 1 and +200 long in Individual Client Account 3. As no Back-to-Back Open Positions are held in Individual Client Account 2, the entire +500 long positions held would form part of the total to be submitted into the Exchange System as part of the Client Clearing Account total.

Therefore, for the purposes of submitting the most accurate representation of the Open Positions within the above Client Clearing Account into the Exchange System, the Clearing Participant must submit the gross sum of the individual net positions of each Individual Client Account, -350/+700.

Affiliated Accounts

Individual Accounts may be grouped together as an "Affiliated Account."⁸ Within an Affiliated Account, there may be a mix of long and short positions in a given contract in separate Individual Accounts (sub-accounts). In order to provide an accurate representation of the holdings within an Affiliated Account, Clearing Participants are required to submit the gross sum of the net holdings of each sub-account into the Exchange System. That is, each sub-account within the Affiliated Account, as opposed to the Affiliated Account as a whole, is considered to be an Individual Account for the purposes of calculating and Closing Out Back-to-Back Open Positions.

⁸ An Affiliated Account is defined in the ASX 24 Operating Rules and is also known as an "omnibus account" (but is distinct from a Clearing Account). Affiliated Accounts are often held on behalf of fund management entities and trading desks which run a number of books for different purposes. In addition, ASX Clear (Futures) is aware that some Clients mandate use of a single account to trade multiple strategies (for example, long trades for funding, short trades for hedging). ASX Clear (Futures) considers that such an account is in fact a number of Individual Accounts comprising an Affiliated Account and should be treated by Clearing Participants as such for the purposes of submitting Open Positions into the Exchange System.

By way of illustration in the table below, assume that an Affiliated Account of a Clearing Participant contains sub-accounts which hold the following Open Positions in a particular futures contract:

Table 2 – Example of a Client Clearing Account

<u>Client Clearing Account</u>	<u>Short</u>	<u>Long</u>	<u>Net (to be submitted into the Exchange System)</u>
Affiliated Account			
Sub-account 1	0	+100	+100
Sub-account 2	-600	+150	-450
Sub-account 3	-500	+700	+200
Total	-1100	+950	-450, +300

Closing Out Back-to-Back Positions in Affiliated Accounts

For the example in the above table, it would not be appropriate for a Clearing Participant to Close Out positions within the Affiliated Account as though the Affiliated Account were one Individual Account (i.e. by netting –1100 short against +950 long, resulting in a net position of –150 short). Rather, each separate sub-account would be netted individually and the resulting net positions form part of the total to be submitted into the Exchange System. In the above table, Sub-account 2 in the Affiliated Account holds Back-to-Back Open Positions of 150 lots and Sub-account 3 holds Back-to-Back Open Positions of 500 lots. Sub-account 1 does not contain any Back-to-Back Open Positions. Before determining each sub-account's contribution to the Client Clearing Account, these Back-to-Back Open Positions must be eliminated from calculation in the Clearing Participant's back office.

As shown in the 'Net' column of the above table, the resulting net positions to form part of the total to be submitted into the Exchange System would be –450 short in Sub-account 2 and +200 long in Sub-account 3. As no Back-to-Back Open Positions are held in Sub-account 1, the entire +100 long positions held would form part of the total to be submitted into the Exchange System as part of the Client Clearing Account total.

Thus for the above Affiliated Account, a –450/+300 holding (which has been derived from a sum of the individual net position figures in each sub-account within the Affiliated Account) would be submitted to the Exchange System as the most accurate representation of the holdings in that Client Clearing Account.

In order that an account can be treated as an Affiliated Account (and be entitled to hold Back-to-Back Open Positions), Participants must request explicit instructions in this regard (as well as the rationale for it) from their clients (which may include entities related to the Participant) and must retain these instructions on file. Further, Participants must instruct their clients to provide them with daily instructions as to the number of Back-to-Back Positions required to be left open in order to report their Affiliated Account in accordance with this Direction.

If a Participant does not receive instructions from its client that an account is being operated as an Affiliate Account, this Direction must be followed and Back-to-Back Open Positions must be closed out of the account. If the Client wishes to operate an account as an Affiliated

Account, they must commit to informing the Participant daily of how many open positions are to be maintained (or how many back-to-back positions are to be closed out) in line with this Direction.

Exception to this Direction

Differentiated Deliverable Commodities

This Direction to Close Out Back-to-Back Open Positions outlined above applies to cash-settled contracts (e.g. SPI 200™ futures contracts, Commonwealth Treasury Bond futures contracts etc) and deliverable contracts where all deliverable commodities are functionally identical (e.g. Individual Share Future contracts, currency future contracts etc), as Back-to-Back Open Positions in such contracts do not contribute to market liquidity.

However, Back-to-Back Open Positions (concurrent long and short positions in the same Futures Contract and Settlement Month on behalf of a Clearing Account) which are held in physically deliverable contracts where the deliverable commodities may vary in quality, location, nature or some other means (e.g. ASX Grain Futures Contracts and Greasy Wool) may represent a contribution to market liquidity, where there is intent or likelihood to both take and make a delivery at a single expiry. Accordingly, such Back-to-Back Open Positions may be maintained and included as part of the number of Open Positions submitted into the Exchange System but must be managed in accordance with the procedures set forth below.

- A. The last day Clearing Participants holding Back-to Back Open Positions can Close Out (net off) Open Positions is the Close Out Day immediately preceding the Settlement Month in which the Open Positions are held. The Close Out Day is the Business Day immediately following the Declaration Date for the applicable Option Expiry Month. For example, Open Positions held in January that the client does not wish to either trade out of or make or take delivery against, must be Closed Out (netted off) by the Business Day immediately after the Declaration Date for December options. The Applicable Close Out Days for:

- Grain – are listed at <http://www.asx.com.au/about/grain-maturity-calendar.htm>; and
- Wool – are listed at <http://www.asx.com.au/about/wool-maturity-calendar.htm>.

<i>ASX Grain Settlement Month:</i>	<i>January</i>	<i>March</i>	<i>May</i>	<i>July</i>	<i>September</i>	<i>November</i>
Applicable Close Out Day is the Business Day immediately following the Declaration Date for the applicable Option Expiry Month:	December	February	April	June	August	October

<i>ASX Wool Settlement Month</i>	<i>February</i>	<i>April</i>	<i>June</i>	<i>August</i>	<i>October</i>	<i>December</i>
Applicable Close Out Day is the Business Day immediately following the Declaration Date for the applicable Option Expiry Month:	February	April	June	August	October	December

- B. Clearing Participants with Back-to-Back Open Positions which are held beyond the applicable Close Out Day must either:
- Trade out of the Open Positions and Close Out resultant Back-to Back Open Positions created within each Clearing Account no later than the time prescribed for the purposes of Rule 46.1 on the Business Day following the creation of those Back-to Back Open Positions; or
 - Make and take delivery for the Open Positions held within each Clearing Account during the Delivery Period.
- C. Open Positions transferred after the Close Out Day can only be Closed Out if:
- the trade date of the position being transferred is the same as the transfer date; and
 - it is Closed Out no later than the time prescribed for the purposes of Rule 46.1 on the Business Day following the creation of those Back-to-Back Open Positions.
- D. Open Positions Closed Out in error between the Close Out Day and Final Trading Day can be reinstated so long as it is in accordance with Rule 46.3.

Unintentional Crossing Prevention

Clearing Participants are required to identify any trades that have been included on the internal booking report of the Trading Participant and ensure that these Back to Back Open Positions are matched out in the same account on the Trading Date that they were created on.

Amended 01/07/10, 11/02/14, 24/02/14, 20/03/17

Inappropriate Practices

Except as specified below in so far as it relates to Open Positions across multiple Individual Accounts of a single legal entity, Open Positions held within an Individual Account, whether or not it is a sub-account of an Affiliated Account, must not at any time be settled or offset against Open Positions held within another Individual Account or sub-account, unless these positions are formally transferred on market into the same Individual Account.

Any such activity may represent inappropriate off-market trading and may constitute a breach of the Rules or the law.

If a Clearing Participant wishes to Close Out Open Positions across multiple Individual Accounts of a single legal entity, the Clearing Participant must ensure legal advice is obtained that such activity does not constitute a breach of the Rules or the law.

For example, in Table 1 above, if the Open Positions within Individual Client Account 1 are inappropriately offset against the Open Positions within Individual Client Account 3 the resulting net position would be –150 short. However, the correct number of Open Positions to be included in the total to be submitted to the Exchange System are –350 short for Individual Client Account 1 and +200 long for Individual Client Account 3.

Amended 01/07/10, 11/02/14

Implementation

Clearing Participants are required to follow this Direction in their treatment of Back-to-Back Open Positions.

Where a Clearing Participant fails to comply with this Direction, such a failure will constitute a breach of the Rules and the Clearing Participant will be subject to the disciplinary process associated with such a breach.

Clearing Participants are also reminded of the importance of maintaining appropriate Close Out procedures and audit trails. Documentation held in this regard may be reviewed as part of a Clearing Participant compliance inspection or operational review and must be made available to ASX Clear (Futures) on request.

1 Application of DM Auction Procedures

For the purpose of Rule 72.1(aa), the following procedures (referred to in these Procedures as the **General DM Auction Procedures**) will apply to auctions of DM Auction Transactions and to all Bids (as defined in Paragraph 6.2 below) made in respect of such auctions (referred to as **DM Auctions**). The General DM Auction Procedures and the Specific DM Auction Terms are together referred to as the **DM Auction Procedures**.

In the case of any inconsistency between the Specific DM Auction Terms for a particular DM Auction and the General DM Auction Procedures, the Specific DM Auction Terms will prevail to the extent of the inconsistency. None of the Specific DM Auction Terms or the General DM Auction Procedures prevail over the Recovery Rules.

A summary of the applicable timings and steps to be taken in respect of a DM Auction (referred to in these Procedures as the **DM Auction Process Timeline**) is set out in the Appendix hereto titled “Default Management Auction Process Timeline”. The DM Auction Process Timeline is provided by way of guidance only and does not form part of the DM Auction Procedures or override the DM Auction Procedures for any particular DM Auction.

- (a) ASX Clear (Futures) may at its sole discretion set a reserve price for the Auction Pool comprised in a DM Auction.

Introduced 01/02/22

- (c) ASX Clear (Futures) will run a series of eligibility and other checks in connection with the Transferring Open Positions in accordance with its internal processes;

If such confirmation is received from the Alternate Clearing Participant then, pursuant to Rule 119.4, those Open Positions will be transferred to the Alternate Clearing Participant in accordance with paragraphs (a) to (e) of Procedure 117 (Transfer) above (except that the Transferring Clearing Participant's consent is not required since the Transferring Clearing Participant is the defaulted Clearing Participant). This transfer may occur even if there is a cashflow due to be paid on the day of the transfer.
