footing, the Company proposes to defer processing of conversions between the registers lodged in the period from (and including) Monday, 4 May 2009 up to and including Friday, 8 May 2009. Requests received during this period would be treated as requests received on Monday, 11 May 2009. The term "ex" applies to market trades but does not apply to inter-market movements by conversions. Thus, a conversion processed during the period from 4 May 2009, of which the underlying shares are recorded for the Australian dividend, may be recorded on the Jersey register prior to the record date of 8 May 2009 and gain an entitlement to the Jersey dividend.

Further, it would be potentially possible that an "ex" purchase on the Australian market may be registered on the Australian register prior to 8 May 2009 and converted into the Jersey register prior to the record date as a "cum" position. Accordingly, the Company seeks waivers from the applicable ASTC Settlement Rules (13.9.4 and 13.9.9) to enable the proposed course of action to be followed. If granted, the Company undertakes to issue an ASX market release advising of the waiver as conversions may be actioned outside of the market participant framework.

The term "ex" applies to market trades but does not apply to inter-market movements by conversions. Thus, a conversion processed during the period from 1 September 2008, of which the underlying shares are recorded for the Australian dividend, may be recorded on the UK register prior to the record date of 5 September 2008 and gain an entitlement to the UK dividend.
Further, it would be potentially possible that an "ex" purchase on the Australian market may be registered on the Australian register prior to 5 September 2008 and converted into the UK register prior to the record date as a "cum" position. Such disparity may create an opportunity for a holder who is not entitled to receive a distribution to inappropriately gain access to that distribution. By permitting the Company to effectively freeze any conversions during the ex period, this inadvertent opportunity is prevented, with no real disadvantage to any investors who are legitimately entitled to the distribution. The only possible disadvantage would be to an investor who legitimately purchases their holding on one market and legitimately wishes to sell their holding on the other, without any attempt at gaining access to the dividend. However, we believe that suitable notification of the intention to investors will adequately minimise this risk and, rather, that failing to grant this waiver has the greater potential for harm and/or mischief.</p>

Present Application

The waiver is considered necessary to prevent potential mischief, such as the potential for a holder to gain inappropriate access to a distribution made by a Fund as a result of a disparity (due to differences in time zones, public holidays and regulatory obligations between Australia and the US) between a Fund's record date in Australia and the record date in that Fund's overseas home jurisdiction, the US. Such disparity may create an opportunity for a holder who is not entitled to receive a distribution to inappropriately gain access to that distribution. By permitting the Corporation to effectively freeze any conversions during the ex period, this inadvertent opportunity is prevented, with no real disadvantage to any investors who are legitimately entitled to the distribution. The only possible disadvantage would be to an investor who legitimately purchases their holding on one market and legitimately wishes to sell their holding on the other, without any attempt at gaining access to the dividend. However, we believe that suitable notification of the intention to investors will adequately minimise this risk and, rather, that failing to grant this waiver has the greater potential for harm and/or mischief.

Register of ASTC Settlement Rule Waivers

Present Application

The waiver is considered necessary to prevent potential mischief, such as the potential for a holder to gain inappropriate access to a distribution made by a Fund as a result of a disparity (due to differences in time zones, public holidays and regulatory obligations between Australia and the US) between a Fund's record date in Australia and the record date in that Fund's overseas home jurisdiction, the US. Such disparity may create an opportunity for a holder who is not entitled to receive a distribution to inappropriately gain access to that distribution. By permitting the Corporation to effectively freeze any conversions during the ex period, this inadvertent opportunity is prevented, with no real disadvantage to any investors who are legitimately entitled to the distribution. The only possible disadvantage would be to an investor who legitimately purchases their holding on one market and legitimately wishes to sell their holding on the other, without any attempt at gaining access to the dividend. However, we believe that suitable notification of the intention to investors will adequately minimise this risk and, rather, that failing to grant this waiver has the greater potential for harm and/or mischief.

Register of ASTC Settlement Rule Waivers

In order to prevent such a circumstance from arising and to keep both registers and the respective securityholders on an equal footing, the Company proposes to defer processing of conversions between the registers lodged in the period from (and including) Monday, 4 May 2009 up to and including Friday, 8 May 2009. Requests received during this period would be treated as requests received on Monday, 11 May 2009. The term "ex" applies to market trades but does not apply to inter-market movements by conversions. Thus, a conversion processed during the period from 4 May 2009, of which the underlying shares are recorded for the Australian dividend, may be recorded on the Jersey register prior to the record date of 8 May 2009 and gain an entitlement to the Jersey dividend.

Further, it would be potentially possible that an "ex" purchase on the Australian market may be registered on the Australian register prior to 8 May 2009 and converted into the Jersey register prior to the record date as a "cum" position. Accordingly, the Company seeks waivers from the applicable ASTC Settlement Rules (13.9.4 and 13.9.9) to enable the proposed course of action to be followed. If granted, the Company undertakes to issue an ASX market release advising of the waiver as conversions may be actioned outside of the market participant framework.

Register of ASTC Settlement Rule Waivers

Present Application

The waiver is considered necessary to prevent potential mischief, such as the potential for a holder to gain inappropriate access to a distribution made by a Fund as a result of a disparity (due to differences in time zones, public holidays and regulatory obligations between Australia and the US) between a Fund's record date in Australia and the record date in that Fund's overseas home jurisdiction, the US. Such disparity may create an opportunity for a holder who is not entitled to receive a distribution to inappropriately gain access to that distribution. By permitting the Company to effectively freeze any conversions during the ex period, this inadvertent opportunity is prevented, with no real disadvantage to any investors who are legitimately entitled to the distribution. The only possible disadvantage would be to an investor who legitimately purchases their holding on one market and legitimately wishes to sell their holding on the other, without any attempt at gaining access to the dividend. However, we believe that suitable notification of the intention to investors will adequately minimise this risk and, rather, that failing to grant this waiver has the greater potential for harm and/or mischief.

ISHARES FTSE/XINHUA CHINA 25 - 18 July 2008 to 28 July 2008 (inclusive);</p> <p>In relation to the above relevant periods, if there are any changes to such periods, the waiver will apply to those revised periods, provided that the Corporation:</p> <p>(a) notifies ASTC of the change to the period at least two (2) days prior to the change; and</p> <p>(b) ASTC does not object to the change within a period of one (1) business day from the date it receives the notification.</p> <p>2. The Corporation issues a market release informing investors that no conversions (transmutations) will be processed during the relevant period.</p>
Basis For Decision	<p>Underlying Policy</p> <p>ASTC Settlement Rule 13.9.9 requires an Issuer that receives a Valid Message under Rule 13.9.8 and properly completed transfer documentation to transmit a Message to ASTC to transfer the Financial Products, enter the Transfer in the Principal Register and in certain circumstances verify the Registration Details, within the Scheduled Time. The Scheduled Time contained in Appendix 1 is within 12 business hours of ASTC queuing the Transfer or of the Issuer receiving the documentation, whichever is the later.</p> <p>Present Application</p> <p>Initiated in the United States (US), the Corporation intends to conduct a non-cash reorganisation of the share capital of several of its issued funds including the above two funds cross-listed on ASX. The waiver is considered necessary to prevent potential mischief, such as the potential for a holder to gain inappropriate access to additional shares issued by a Fund resulting from a disparity between a Fund's record date in Australia and the record date in that Fund's overseas home jurisdiction, the US. Such disparity may create an opportunity for a holder who is not entitled to the additional securities to inappropriately gain access. The only possible disadvantage would be to an investor who legitimately purchases their holding on one market and legitimately wishes to sell their holding on the other, without any attempt at illegitimately gaining access to the additional shares. However, suitable notification to investors will adequately minimise this risk. Failing to grant this waiver has greater potential for harm and/or mischief.</p>
