

Test Environment Analyst

ASX Position Description

ASX “All Roles Flexible”

ASX offers mutually beneficial flexible working arrangements.
We recognise that employees need to balance work and personal lives.

| ASX Opportunity Snapshot | | What’s On Offer |
|---------------------------|----------------------------|--|
| Role: | Test Environment Analyst | You’ll learn about ASX’s core business functions while taking responsibility for the daily operation of test environments for Trading and Clearing and Middle Office systems as guided by the ASX Test Environment Management. In this role you will also contribute to the testing objectives for each Domain and also ASX’s test environment management and automation strategies. |
| Reports to: | Test Environment Manager | |
| People Management: | N/A | |
| Budget: | N/A | |
| Team: | Engineering & Architecture | |
| Date: | March, 2019 | |
| Location: | Sydney, NSW | |
| Flexible Role: | Yes | |

What you’ll do:

- Work with development and test teams to ensure test environments are progressed and fit for testing.
- Learn about advanced technology used to drive Australia’s financial markets.
- Perform daily maintenance across multiple test environments to ensure they reflect production.
- Identify and take ownership of test environment issues requiring coordination with support teams.
- Support the development of ASX’s test environment automation strategy.
- Contribute to Domain testing objectives by assisting in the creation of production like environments.
- Contribute to Domain testing objectives by identifying release defects impacting test environments.
- Assist with the evolution of Environment Monitoring capabilities.
- Participate in Domain test environment requirements planning.
- Co-ordinate and Manage test Environment Bookings and conflicts.

What you've done:

- Undergraduate study in Computer Science or related fields.
- Experience in a customer service role.
- Exposure to technology concepts and software development life cycle.
- Practical experience with relational databases.
- Exposure to testing methodologies.

And if you've got some of this, even better:

- Exposure to Financial Markets.
- Trading experience.
- Operations Experience.
- Programming experience.
- Knowledge of Agile / Scrum.

What you need to enjoy and be good at for this role:

- Using your excellent oral and written communication skills.
- Analysing, critical thinking.
- Attention to detail.
- Solving problems.
- Being pro-active and positive attitude.
- An organised, professional and committed approach.
- Ability to manage competing priorities and meet deadlines.
- Focus on quality.
- Delivery focused and customer service orientation.
- Innovative and outcome focused.
