Introduction

Purpose

ASX is building a world-class financial market infrastructure that is tailored for the Australian financial markets. ASX's central counterparty clearing service for OTC Interest Rate Derivatives ("**OTC Clearing Service**") is a key component of that infrastructure. ASX seeks comment on the draft Operating Rules that will provide the foundation for the OTC Clearing Service, prior to formal submission of the rules to regulators for clearance.

This Consultation Paper outlines ASX's proposed Operating Rules for the first phase of the OTC Clearing Service. The draft Operating Rules, and related procedures, are attached at **Appendices 1-3**.

Who should read this document?

ASX welcomes input on the draft Operating Rules from all stakeholders.

ASX will operate the OTC Clearing Service through its central counterparty clearing house (hereafter referred to as "**ASX**") for ASX 24 Futures. ASX is licensed to clear OTC Derivatives and is an approved netting market for the purposes of the Australian Payment Systems and Netting Act 1998 (Cth).

The draft Operating Rules relate mainly to the way in which ASX will operate the OTC Clearing Service. In addition, ASX proposes amendments to the existing rules for clearing ASX 24 Futures. Accordingly, ASX encourages all existing Futures Clearing Participants of ASX, as well as financial institutions that have an interest in using ASX's OTC Clearing Service (or are considering doing so) as OTC Clearing Participants, to read and respond to this Consultation Paper.

Comments should be submitted to ASX by **29 March 2013**. **Schedule 4** provides a template for responses.

Background

In 2009 the G20 made a commitment that all standardised OTC Derivatives should be cleared through central counterparties by the end of 2012. Subsequently, several jurisdictions have proposed or implemented regulatory reforms to impose a mandatory clearing obligation in respect of designated OTC Derivatives.

In Australia, the *Corporations Legislation Amendment (Derivative Transactions) Bill 2012* was passed on 22 November 2012. This legislation empowers Australian regulators to designate classes of OTC Derivatives for mandatory central clearing. However, Australian regulators have expressed a preference for OTC Derivative clearing to be driven by market-based requirements rather than a regulatory mandate. APRA has implemented bank capital adequacy requirements for exposures under bilaterally and centrally-cleared OTC Derivatives that largely mirror Basel III and incentivise central clearing.

In 2012 ASX undertook extensive market consultation on the viability and optimal design of a domestic central clearing service for standardised A\$ interest rate swaps. As part of those consultations, ASX led a Design Study with nine Australian and international banks active in the A\$ interest rate swap market. Participating banks provided transaction data to ASX that enabled ASX to model the costs and benefits to participants of an ASX-operated domestic clearing service. Seven Australian and international banks have made non-binding commitments (as "Foundation Customers") to work with ASX to build the dealer-to-dealer OTC Clearing Service. A number of other banks active in the Australian market have also expressed an interest in supporting the service, particularly in relation to their client servicing needs. ASX is separately working on the design of an OTC client clearing service structure that will be put forward for broad stakeholder consultation later in 2013 as part of a second phase of its OTC clearing initiative. ASX has commenced the build phase of the OTC Clearing Service and, subject to regulatory clearance of the draft Operating Rules, expects the service to be available for dealer-to-dealer activity from 1 July 2013.

Delivery phases

ASX will introduce its OTC Clearing Service in phases.

Phase 1: Dealer-to-Dealer clearing for A\$ IRS and OIS – available from 1 July 2013

In Phase 1 ASX will make the OTC Clearing Service available to Australian banks, and Australian subsidiaries and branches of foreign incorporated banks, for clearing dealer-to-dealer transactions in standardised A\$ denominated IRS and OIS. (ASX plans to add A\$ FRAs as a clearable financial product in Q3 2013.) As this phase of the service will be for dealer-to-dealer transactions, only trades between OTC Clearing Participants executing on their own behalf will be clearable. The Operating Rules required to give effect to Phase 1 of the service are the subject of this Consultation Paper. Subject to regulatory clearance of the draft Operating Rules, Phase 1 of the service will be available from 1 July 2013.

Phase 2: Client Clearing, extension to NZ\$ IRS – available by end December 2013 (for Australian clients)

In Phase 2 ASX will extend the OTC Clearing Service in the following ways:

- Provide coverage of standardised NZ\$ denominated IRS, OIS and FRAs. Extension of the service to NZ\$ denominated instruments is dependent on ASX meeting NZ regulatory requirements to facilitate use of ASX's service by NZ domiciled financial institutions. ASX is engaging with the Reserve Bank of New Zealand in order to ascertain any regulatory requirements that ASX may need to satisfy.
- Introduce client clearing (that is, clearing of trades to which at least one of the parties is not an OTC Clearing Participant). ASX is currently developing the design of its client clearing service, in consultation with Australian clients and its Foundation Customers, and having regard to Australian, US and EU regulations applicable to client clearing.
- Enable portfolio margining of ASX 24 Futures and OTC Derivatives positions held by affiliated Futures and OTC Clearing Participants (if there is sufficient demand).

The Operating Rules required for Phase 2 are not considered in this Consultation Paper. ASX will consult with stakeholders in the second half of 2013 on a separate package of draft Operating Rules to give effect to the Phase 2 extensions outlined above. Subject to regulatory clearance, ASX will seek to make Phase 2 of the service available by the end of December 2013. Client clearing will initially be available for clients based in Australia. ASX will make client clearing available for clients located in other jurisdictions as it obtains the regulatory licences or registrations that may be required in those jurisdictions.

Draft Operating Rules and Procedures

Structure

The Operating Rules for the OTC Clearing Service will comprise:

- OTC Derivatives Clearing Rules (**OTC Rules**) (new): this new rulebook will relate specifically to the OTC Clearing Service and OTC Clearing Participants.
- Futures Clearing Rules (**Futures Rules**) (existing): this existing rulebook will be amended, and will contain the rules for clearing ASX 24 Futures (as today) as well as rules that are common to both futures and OTC clearing. The Futures Rules, as supplemented by the OTC Rules, will apply to the OTC Clearing Service and OTC Clearing Participants (unless provided otherwise by the OTC Rules).

The Futures Rules, together with the OTC Rules, will constitute the “operating rules” of ASX as defined in the Corporations Act 2001 (Cth).

In addition, Operating Procedures for the OTC Clearing Service will be set out in a new “OTC Handbook”, separate from existing futures clearing procedures. The OTC Handbook will contain terms, criteria and procedures relating to cleared OTC Derivatives, including:

- Product eligibility criteria: detailed description of OTC Derivatives that ASX clears including acceptable currency(ies), underlying rates/indices, term, notional amount, etc.
- Contract terms: terms that will replicate for cleared (novated) trades the economic terms of the corresponding bilateral OTC transactions, based on OTC market standard (ISDA) definitions, to provide economic equivalence.
- Clearing process: details about calculation and settlement of margin, coupon and other payments, how to effect transfers etc.

The OTC Rules and OTC Handbook will not apply to Clearing Participants that clear only ASX 24 Futures.

The Operating Rules and Procedures are outlined in this Consultation Paper in the following categories:

- Rules which are relevant to all Clearing Participants (whether clearing ASX 24 Futures or OTC Derivatives) – these relate primarily to:
 - default waterfall;
 - resignation processes;
 - ensure there is no uncapped liability for Clearing Participants; and
 - introduction of a Risk Committee.
- Rules that relate specifically to Phase 1 of the OTC Clearing Service and which are applicable only to those Clearing Participants that seek to clear OTC Derivatives.

Our approach to rules drafting

In drafting the Operating Rules for Phase 1 of its OTC Clearing Service, ASX has:

- Taken into account all feedback received during the Design Study and market consultations.
- Considered the rules and practices of other CCPs clearing OTC Derivatives, to ensure ASX's service is aligned with best practice. A comparison of ASX's OTC Clearing Service with those of other major CCPs is attached at **Schedule 5**.
- Sought to be consistent as far as practicable with US and EU regulations relating to the operations of CCPs (recognising, in relation to US regulations in particular, that further rule amendments will be required to satisfy the requirements for DCO registration).
- Ensured that the OTC Clearing Service will comply with new Financial Stability Standards issued by the RBA that will take effect in March 2013.

Key Operating Rules relevant to all Clearing Participants (ASX 24 Futures and OTC Derivatives)

Key Operating Rules that are relevant to all Clearing Participants, whether they clear ASX 24 Futures or OTC Derivatives, or both, are outlined below. These Operating Rules will be contained in the Futures Rules.

Expansion of the Default Waterfall (Futures Rule 7.1)

ASX proposes to extend the existing default waterfall to cover the OTC Clearing Service by including A\$100m of new funded commitments from OTC Clearing Participants (“OTC Commitments”).

ASX does not propose to increase the aggregate amount of commitments provided by Futures Clearing Participants (currently A\$120m) (“Futures Commitments”).

Each Clearing Participant will be required to provide a Futures Commitment and/or an OTC Commitment, according to the categories of instrument it is authorised to clear.

ASX proposes to adopt a single default waterfall for ASX 24 Futures and OTC Derivatives because:

- The utilisation of existing CCP financial resources to support all cleared activity is the most capital efficient solution for the market, ensuring that all Clearing Participants have lower default fund contributions than if separate default funds for ASX 24 Futures and OTC Derivatives had to be capitalised.
- There is a substantial overlap between the underlying asset classes (A\$ interest rates), and the identity of the financial institutions that are expected to participate in clearing ASX 24 Futures and OTC Derivatives, significantly mitigating any potential contagion risk.
- It provides the best support to portfolio margining between OTC Derivatives and eligible ASX 24 Futures.

The single default fund approach for OTC interest rate swaps and associated exchange traded derivative products is also used at other CCPs, most notably in Europe at Eurex and in Singapore at SGX.

ASX proposes that in the event of a Clearing Participant default, Futures Commitments and OTC Commitments of non-defaulting Clearing Participants should be applied in the order, and at a level in the default waterfall, that reflects the clearing authorisations of the defaulting Clearing Participant. Proposed amendments to Futures Rule 7.1 distinguish between three alternative scenarios: a default by a Futures-only Clearing Participant, a default by an OTC-only Clearing Participant, and a default by a Clearing Participant authorised to clear both Futures and OTC Derivatives. **Schedule 1** explains how the default waterfall would apply in those scenarios.

ASX will seek the approval of a majority of Clearing Participants to amend the default waterfall in the way proposed above, in accordance with Futures Rule 14.

Ballot on changes to Commitments and default waterfall (Futures Rule 14.1)

Under the existing Futures Rules, any amendment to the rules relating among other things to the aggregate amount of Futures Commitments and the default waterfall is subject to approval by a majority of Clearing Participants.

ASX proposes to:

- Extend the ballot requirement to apply to changes to the aggregate amount of OTC Commitments.
- Grant each Clearing Participant one vote per authorisation that it holds. This means that a Clearing Participant that is authorised to clear both OTC Derivatives and ASX 24 Futures will have up to two votes, depending on the subject matter of the proposed amendment (see below).
- Define more precisely the matters on which Clearing Participants are entitled to vote, as summarised below:

Subject matter	Voting entitlement	Rationale
A change to the aggregate amount of Futures Commitments or OTC Commitments	Each Clearing Participant has one vote for each Commitment (Futures and/or OTC) it has provided	As a single default waterfall is proposed, all Clearing Participants have an interest in this subject matter Clearing Participants that have provided two Commitments (Futures and OTC) should have two votes, reflecting their higher exposure
A change to the ordering of financial resources under the default waterfall that would reduce the aggregate amount of financial resources that may be applied in priority to the Futures Commitments or OTC Commitments of non-defaulting Clearing Participants	Each Clearing Participant has one vote for each Commitment (Futures and/or OTC) it has provided in respect of which financial resources that may be applied in priority are to be reduced as a result of the change	The Clearing Participants whose Commitments are in effect “brought forward” by such a change should be entitled to vote, with one vote for each affected Commitment they have provided

Obligation to consult on rule amendments (Futures Rule 14.2A)

Apart from any requirement for a Clearing Participant ballot as described above, the draft Operating Rules oblige ASX to consult Clearing Participants on all proposed rule amendments, except where ASX has been directed by its regulators to make the rule amendment or where ASX determines in good faith that the rule amendment is required to enable ASX to comply with its CS facility licence or other regulatory obligations. This will formalise ASX’s existing approach to consultation on proposed rule amendments.

Clearing Participant resignation (Futures Rules 6 and 11)

ASX proposes to streamline the resignation process for Clearing Participants by:

- Reducing the minimum Commitment period from two years and 14 days to one quarter.
- Removing the need for Board approval of Clearing Participant resignation.
- Reducing the minimum notice period for resignation from 12 months and 14 days to 30 days.

Under proposed Futures Rule 11, a Clearing Participant’s resignation will be effective on the last day of a quarter where, at least 30 days prior to the last day of that quarter:

- The Clearing Participant has given ASX notice of resignation in writing; and
- ASX has confirmed that the Clearing Participant has satisfied prescribed objective criteria (such as the closing of all open contracts and the payment of all outstanding fees). ASX will provide such confirmation within five Business Days of written request by a resigning Clearing Participant.

A Clearing Participant’s Commitment(s) will be at risk until its resignation is effective. However, no Clearing Participant (whether or not it has given notice of resignation) will be under any obligation at any time to replenish its Commitment(s). ASX will not require a Futures Clearing Participant that has satisfied all of the conditions for resignation to provide a Second Level Commitment that commences on or after its effective date of resignation. An illustration of the resignation process is set out in **Schedule 2**.

These rules are intended to provide Clearing Participants with greater certainty regarding the timing of the return of their Commitment(s) and their liabilities, while balancing the interests of continuing Clearing Participants.

Capping Clearing Participant liability

ASX proposes amendments to the Futures Rules that are intended to address potentially uncapped liabilities for Clearing Participants.

Replenishment of Commitments (Futures Rule 7.6)

ASX proposes to amend Futures Rule 7.6 to clarify that a Clearing Participant has no legal obligation at any time to replenish its Commitment(s) in the event that ASX draws on the Clearing Participant's Commitment(s) to meet default losses. This will confirm the legal position under the current Operating Rules but will make the intention clearer.

If ASX is unable to source replacement financial resources, whether through requests for replenishment by Clearing Participants or from other sources, ASX may be unable to continue clearing house operations as a going concern without reliance on recovery and resolution powers. ASX has a preference for Financial Market Infrastructure ("FMI") recovery and resolution to be governed primarily by Operating Rules that enable Clearing Participants to assess their potential exposure in advance of a default event. However, given the ongoing CPSS-IOSCO work on FMI recovery and resolution, and the RBA's deferral of recovery and resolution provisions of the Financial Stability Standards until at least March 2014, ASX has not sought to include recovery and resolution powers in the draft Operating Rules at this stage. ASX intends to work closely with its regulators and customers to determine the preferred approach to FMI recovery and resolution over the coming year.

Compulsory settlement (Futures Rule 102)

Under the existing Futures Rules, ASX reserves the right to compulsorily settle the open futures positions of a defaulting Clearing Participant that cannot be closed out on market. At present, Futures Clearing Participants' potential settlement obligations to ASX resulting from compulsory settlement are uncapped. ASX proposes to amend Futures Rule 102 to impose a cap on each Futures Clearing Participant's settlement obligations to ASX where ASX invokes compulsory settlement. ASX proposes that a Futures Clearing Participant's cap should be equal to twice its Futures Commitment. It should also be noted that a Futures Clearing Participant that has satisfied all of the conditions for resignation will not be subject to compulsory settlement, even if its resignation has not yet become effective, as compulsory settlement may only be effected by ASX with non-defaulting Clearing Participants that hold open contracts.

Termination against the CCP (Futures Rule 76)

ASX proposes a new Futures Rule 76 that gives Clearing Participants the right to terminate novated contracts in the event of ASX's default. This right is introduced to satisfy APRA's preconditions under Prudential Standard APS 112 for Clearing Participants that are ADIs to claim a concessional risk weighting on netted trade exposures to CCPs. The rule will apply in relation to both ASX 24 Futures and OTC Derivatives.

Risk Committee (Futures Rule 20)

The draft Operating Rules require ASX to establish a Risk Committee, comprising representatives of all Clearing Participants (Futures and OTC), to review and provide input on ASX's risk management approach and processes for clearing ASX 24 Futures and OTC Derivatives. ASX will provide secretariat support to the Risk Committee.

The Risk Committee will be a self-governing body chaired by an elected member. The proposed procedures for the Risk Committee are set out in Schedule 15 of the Procedures to the Futures Rules.

ASX will provide visibility of Risk Committee recommendations to its Board. ASX will not be obliged to implement recommendations of the Risk Committee, but will be obliged to respond to Risk Committee recommendations on an "if not, why not?" basis.

Key Operating Rules for the introduction of the OTC Clearing Service

Key Operating Rules that relate specifically to the introduction of the OTC Clearing Service are outlined below. These rules will be reflected in the new OTC Rules and OTC Handbook.

Participation (OTC Rule 2)

In Phase 1 the OTC Clearing Service will be available to Australian banks, and Australian subsidiaries and branches of foreign incorporated banks, for clearing of dealer-to-dealer transactions. An entity that seeks authorisation to clear OTC Derivatives will be required to be licensed in Australia either as an authorised deposit-taking institution or a financial services licensee.

In addition, in order to be authorised to clear OTC Derivatives, an entity will need to:

- Be admitted as a Clearing Participant under the Futures Rules (and therefore satisfy, among other matters, the operational capacity requirements that apply to all Clearing Participants);
- Have either Tier 1 Capital (for ADIs) or Net Tangible Assets (for non-ADIs) of at least A\$50m;
- Have the capability to participate in ASX's OTC default management process including default auctions on OTC portfolios; and
- If it is not authorised to clear ASX 24 Futures, provide ASX with evidence of arrangements it has in place with a Futures Clearing Participant under which the Futures Clearing Participant agrees to clear ASX 24 Futures on behalf of the OTC Clearing Participant (as client). This is to ensure that all OTC Clearing Participants have the capacity to bid at default auctions on OTC portfolios that comprise portfolio margined ASX 24 Futures.

OTC Commitments (OTC Rule 3)

A Clearing Participant that is authorised to clear OTC Derivatives will be required to provide an OTC Commitment. This Commitment will be in addition to the Futures Commitment that the Clearing Participant must provide if it is also authorised to clear ASX 24 Futures. ASX will calculate each OTC Clearing Participant's OTC Commitment in a similar way to Futures Commitments, that is, each OTC Participant's OTC Commitment will comprise a fixed component (proposed A\$5m) and a variable component that is recalculated quarterly based on the average initial margin of the Clearing Participant over the previous quarter.

Based on ASX's analysis of Design Study data, aggregate OTC Commitments of A\$100m will be required once the OTC Clearing Service has been established. However, during the "transitional" period between launch and full establishment of the service, ASX's actual requirement for aggregate OTC Commitments is likely to be less than A\$100m and to steadily increase to that level as Clearing Participants gain authorisation to clear OTC Derivatives and commence clearing operations. Accordingly, ASX proposes that during the transitional period, aggregate OTC Commitments should be calculated as a function of the number of authorised OTC Clearing Participants (A\$12.5m per OTC Clearing Participant, capped at A\$100m).

Novation approach (OTC Rule 4)

For OTC transactions, ASX proposes to adopt an enhanced "futures-style" model of novation rather than requiring that each transaction be collateralised in advance of novation.

All OTC transactions submitted by Clearing Participants will be subject to an eligibility check and an automated per-trade limit check against the trade risk exposure before novation can occur. In the unlikely event that any submitted trade does not meet the eligibility check or fails the limit check that trade will not be novated. A trade that fails the limit check will be escalated for further consideration by ASX, including any potential call for additional collateral, before novation can occur. All submitted trades that pass these checks will be deemed to be novated with effect from the time of ASX's receipt of the trade. This process flow is set out in **Schedule 3**.

ASX will continue to run regular post-novation portfolio exposure monitoring against each Clearing Participant's available excess collateral in order to mitigate the intra-day risk from new business. ASX will call for additional margin where a Clearing Participant's exposure reaches pre-defined trigger points.

ASX is proposing to adopt an enhanced futures-style model of novation in response to stakeholder feedback received through the Design Study, which emphasised the potential operational and risk management drawbacks experienced under the collateralisation-in-advance model. Stakeholders also indicated that the enhanced futures-style model provides the flexibility and "certainty of novation" that is required to facilitate client clearing and the potential migration to swap execution facilities.

The novation workflow outlined above will not apply to back-loaded trades. Back-loaded trades will need to be approved by ASX and collateralised in advance due to the potentially material amount of risk involved.

Portfolio margining (OTC Rule 5.5)

ASX proposes to offer portfolio margining for eligible ASX 24 Futures and OTC Derivatives. Eligible ASX 24 Futures will comprise treasury bond, overnight cash rate and bank bill futures nominated by ASX. Clearing Participants may self-select eligible ASX 24 Futures positions from their futures portfolio for portfolio margining. A single Clearing Participant must be authorised to clear both ASX 24 Futures and OTC Derivatives to take advantage of portfolio margining.

Initial margin "bankruptcy remoteness" (OTC Rules 5.7 and 5.9)

ASX is considering the changes to its rules and operational arrangements, including CCP treasury investment arrangements, that would be required to support bankruptcy remoteness of collateral received for initial margin obligations. Draft Operating Rules that are intended to support bankruptcy remoteness of collateral are included in this consultation in order to gain early stakeholder engagement on the legal aspects of this issue. However, ASX does not intend to operationalise those changes to the rules, or operational arrangements, in Phase 1 of the OTC Clearing Service. At this stage ASX seeks stakeholder input on the relative importance of bankruptcy remote collateral holding arrangements as compared with other service features planned for introduction in Phase 2 (as outlined above).

Default management (OTC Rule 6)

The draft Operating Rules contain a "Default Management Process" ("DMP") that sets out the way in which ASX intends to manage the risks arising from the default of an OTC Clearing Participant. Broadly, the DMP provides that, in consultation with a "Default Management Group", ASX will seek to hedge its exposure and then auction the OTC portfolio of the defaulting OTC Clearing Participant to non-defaulting OTC Clearing Participants.

There are no proposed changes to the default procedures for those Clearing Participants that clear ASX 24 Futures only.

Default Management Group

ASX will establish one or more Default Management Groups ("DMG"), drawn from representatives of OTC Clearing Participants, for the purpose of advising and assisting ASX with matters relating to default management (including participation in default simulations, advice on hedging and auction strategies). Participants in the DMG will be drawn from a subset of OTC Clearing Participants at any one time, and will be rotational in order to share the resource impact fairly over time. The DMG will be governed by written procedures, set out in the OTC Handbook. ASX will be obliged to use all reasonable commercial endeavours to agree a common position with the DMG on matters that are the subject of DMG advice or recommendations, but ASX will retain the ultimate decision (having regard among other things to its regulatory obligations) on whether to implement the DMG's advice or recommendations.

Hedging

One of the key responsibilities of the DMG will be to assist ASX in formulating and executing a strategy to hedge the defaulting OTC Clearing Participant's portfolio of trades. This is important to substantially risk reduce the portfolio to ensure the portfolio is less sensitive to market moves between default and auction.

Auction process

Once the defaulting OTC Clearing Participant's portfolio of trades has been successfully hedged, non-defaulting OTC Clearing Participants will be obliged to value the defaulter's portfolio, make bids to ASX based on their valuation and (if they are successful in the auction) to take ownership of the trades. ASX may auction the portfolio in separate "Liquidation Groups" (for example, for trades of different currencies or transaction types).

Non-defaulting OTC Clearing Participants will be required to participate in default auctions. However, if a non-defaulting OTC Clearing Participant does not have open positions in a transaction type comprising a Liquidation Group at the time of default, then the Clearing Participant will not be required to participate in the auction of that Liquidation Group.

ASX proposes to auction portfolio margined OTC Derivatives and ASX 24 Futures together. Accordingly, each OTC Clearing Participant must at all times maintain either an authorisation to clear ASX 24 Futures directly (as a Futures Clearing Participant) or the capacity to clear ASX 24 Futures indirectly as the client of a Futures Clearing Participant. ASX proposes to manage its risk arising from ASX 24 Futures positions of a defaulting OTC Clearing Participant that are not portfolio margined under existing default procedures.

Product Committee (OTC Rule 2.14)

The draft Operating Rules require ASX to establish a Product Committee if there are at least three OTC Clearing Participants willing to participate in the Committee. The Product Committee will comprise representatives of OTC Clearing Participants and is intended to facilitate direct participant influence over the ongoing development of the OTC Clearing Service. ASX will provide secretariat support to the Product Committee.

The Product Committee will be a self-governing body chaired by an elected member. The proposed procedures for the Product Committee are contained in Schedule 5 of the OTC Handbook.

ASX will provide visibility of Product Committee recommendations to its Board. ASX will not be obliged to implement recommendations of the Product Committee, but will be obliged to respond to Product Committee recommendations on an "if not, why not?" basis.

Overseas regulatory approvals

New Zealand

In Phase 2 of the OTC Clearing Service, ASX proposes to extend product coverage to standardised NZ\$ denominated interest rate swaps, overnight index swaps and forward rate agreements. ASX is engaging with the Reserve Bank of New Zealand in order to ascertain any regulatory requirements that ASX may need to satisfy.

Europe

ASX has a number of existing Clearing Participants that are incorporated in the European Union. In order to provide clearing services to those Clearing Participants in relation to ASX 24 Futures or OTC Derivatives, ASX needs to apply to the European Securities and Markets Authority for recognition as a “Third Country CCP” under the European Market Infrastructure Regulation within six months after entry into force of the relevant technical standards. ASX is preparing its application and working closely with the RBA on the equivalence analysis (between Australian and EU regulatory regimes) that is required to support the application. ASX has the benefit of transitional relief pending finalisation of its application.

United States of America

ASX is unable to provide the OTC Clearing Service to “US Persons” (as defined by the Commodity Futures Trading Commission), such as Australian branches of banks incorporated in the US, until ASX registers as a Derivatives Clearing Organization with the CFTC or obtains an exemption. ASX has commenced its assessment of the requirements for DCO registration and has engaged external experts to conduct a gap analysis of the OTC Clearing Service against DCO Core Principles. ASX intends to apply for DCO registration and to make the OTC Clearing Service available to US Persons (including clients that are US Persons) when it has obtained DCO registration. Further amendments to the OTC Rules and Futures Rules will be required to satisfy the requirements for DCO registration, and ASX intends to consult on a separate package of rule amendments for this purpose.

Next steps

ASX seeks stakeholders' views on the draft Operating Rules and related Procedures. Submissions should be made by 29 March 2013. ASX requests that respondents adopt the format set out in **Schedule 4** and provide responses, in particular, to those questions on which stakeholder feedback is sought. ASX welcomes the opportunity to discuss the draft Operating Rules and related Procedures with interested parties (see Contact details on page 3).

Schedules

Schedule 1: Default Waterfall for Futures and OTC

Proposed Waterfall

1. If the defaulting Clearing Participant clears Futures only (Scenario 1), all Futures Clearing Participants' First Level Commitments are used after the Defaulter's margin and Commitment and \$100m of ASX's own capital. All OTC Clearing Participant Commitments are placed further back in the waterfall. Futures Clearing Participants' Second Level Commitments are applied last.
2. If the defaulting Clearing Participant clears OTC only (Scenario 2), all OTC Clearing Participants' Commitments are used after the Defaulter's margin and Commitment and \$100m of ASX's own capital. All Futures Clearing Participants' First and Second Level Commitments are placed further back in the waterfall.
3. If the defaulting Clearing Participant clears both Futures and OTC (Scenario 3), OTC Clearing Participant Commitments and Futures Clearing Participant First Level Commitments are applied in a proportion reflecting the defaulting Clearing Participant's relative level of activity in Futures and OTC, measured by initial margin. The remainder of Commitments are placed further back in the waterfall. Futures Clearing Participants' Second Level Commitments are applied last.

Schedule 2: Resignation process

Key:
 FFLC = Futures First Level Commitment
 SLC = Futures Second Level Commitment
 OTCC = OTC Commitment

*Clearing Participants which have given notice of resignation and closed their positions in the Liquidation Group which is to be auctioned prior to the time of default will not be required to bid for that Liquidation Group

Schedule 3: Novation process flow

¹ Novation deemed to be effective from point of trade receipt

² per existing ASX margin settlement timelines

Novation timeline and associated limit checks

- Novation is subject to acceptance by ASX based on a series of trade eligibility checks (refer draft OTC Rule 4.5 and OTC Handbook)
- Once accepted, the transaction is novated with effect from the point of trade receipt by ASX
- Post novation regular portfolio exposure monitoring (~ hourly) will mitigate the intra-day risk from new business

Schedule 4: Explanatory Memorandum to draft Operating Rules

Rule Section	Explanation of ASX Approach	Stakeholder Questions and feedback sought
OTC Rules – Key provisions		
2 – Participation and General (2.2)	<p>(i) OTC Authorisation</p> <ul style="list-style-type: none"> An applicant will be admitted as a Clearing Participant under the Futures Rules and authorised to clear OTC Derivatives under the OTC Rules. This will ensure that an OTC Clearing Participant will need to meet all applicable admission and general conduct requirements for Clearing Participants under the Futures Rules. 	(A) Are there any admission or general conduct requirements that it would not be appropriate to apply to OTC Clearing Participants?
(2.3(a))	<p>(ii) Jurisdictional nexus</p> <ul style="list-style-type: none"> OTC participation requirements for the dealer-to-dealer phase have been guided by the general principal that OTC Clearing Participants should have a presence in Australia and be subject to the Australian regulatory framework for ADIs or financial service providers. 	(B) For Phase 1 (Dealer-to-Dealer), is the jurisdictional nexus appropriate? Should it be broader or narrower – why?
(2.10 and 4.2)	<p>(iii) Dealer-to-Dealer</p> <ul style="list-style-type: none"> OTC Clearing Participants may only submit trades executed by the OTC Clearing Participants on their own behalf and not by a third party (related or otherwise). 	(C) For Phase 1 (Dealer-to-Dealer), is the scope of the trades that are acceptable for submission appropriate? If not – why not?
(2.3(c))	<p>(iv) Default Management Arrangements</p> <ul style="list-style-type: none"> An OTC Clearing Participant that is not authorised to clear ASX 24 Futures will need to provide ASX with evidence of arrangements it has in place with a Futures Clearing Participant under which the Futures Clearing Participant agrees to clear ASX 24 Futures on behalf of the OTC Clearing Participant. This will ensure that all OTC Clearing Participants have the capacity to bid at default auctions on OTC portfolios that comprise portfolio margined ASX 24 Futures. 	(D) Are there other ways in which ASX could ensure that an OTC Clearing Participant is able to bid on a portfolio comprising portfolio margined ASX 24 Futures?

Rule Section	Explanation of ASX Approach	Stakeholder Questions and feedback sought
(2.14 and Handbook)	<p>(v) Product Committee</p> <ul style="list-style-type: none"> The Product Committee is only open to OTC Clearing Participants. Its purpose is to facilitate direct Clearing Participant influence over the ongoing development of ASX's OTC Clearing Service. The Chair will be elected by members and the Committee will be a self-governing body. Although ASX will not be obliged to adopt the Product Committee's recommendations, ASX will adopt an "if not, why not" approach. 	<p>(E) Do you consider that the mandate and procedures of the Product Committee are appropriate?</p>
3 – Commitments and Financial Requirements (see also Schedule 2)	<p>(i) Fixed Commitment</p> <ul style="list-style-type: none"> OTC Commitments will be calculated on a quarterly basis, the same as Futures Commitments. The fixed commitment will be \$5m per OTC Clearing Participant. <p>(ii) Variable Commitment</p> <ul style="list-style-type: none"> The variable commitment will be subject to transitional arrangements in relation to the funding level. These transitional arrangements will ensure that the Total Commitment during the establishment phase of the OTC Clearing Service (i.e. as banks join and the service reaches "critical mass") is proportionate to the volume of business cleared and that individual OTC Clearing Participants will not be required to fund a disproportionate share of the new OTC risk. The steady-state is based on a total default fund OTC requirement of \$100m (which is the sum of all fixed and variable commitments). This funding requirement is based on ASX's 2012 Design Study undertaken with the assistance of nine domestic and international banks. 	<p>(F) Is the proposal to set the fixed commitment for OTC Clearing Participants at \$5m appropriate?</p> <p>(G) Is the proposal for transitional arrangements for variable commitments a reasonable step up to the steady-state? If not -why not?</p> <p>(H) Is the steady state of \$100m a reasonable amount for OTC Clearing Participants to contribute for Phase 1? If not -why not?</p>

Rule Section	Explanation of ASX Approach	Stakeholder Questions and feedback sought
<p>5 – Accounts and Margin (5.2)</p> <p>(5.3-5.4 and 5.8) (see 5.7 and 5.9 which are not intended to be implemented for Phase 1)</p> <p>(5.12 and Handbook)</p> <p>(5.5 and Handbook)</p>	<p>(i) Accounts</p> <ul style="list-style-type: none"> For dealer-to-dealer clearing it is proposed that each Clearing Participant will have one House Clearing Account against which its OTC Positions (and Futures Positions, if applicable) will be recorded. <p>(ii) Initial Margin (IM)</p> <ul style="list-style-type: none"> Cash Initial Margin: IM in the form of cash will be held on ASX's balance sheet. This is consistent with ASX's approach for Futures Contracts. Securities Initial Margin: ASX will take absolute transfer of stock provided by a Clearing Participant as IM. This is consistent with ASX's approach for Futures Contracts. <p>(iii) Price Alignment Interest</p> <ul style="list-style-type: none"> Price Alignment Interest (PAI) is implemented to minimise the impact of daily cash settlement of Variation Margin (Mark-to-Market) on the pricing of OTC Interest Rate Swaps. ASX will charge interest on cumulative Variation Margin received by Clearing Participants and pay interest on cumulative Variation Margin paid by Clearing Participants in respect of their OTC positions. <p>(iv) Portfolio-margining</p> <ul style="list-style-type: none"> ASX will offer portfolio margining between eligible ASX 24 interest rate Futures (i.e. Treasury bond, overnight cash rate and bank bill futures) and OTC Derivatives for IM calculations. Portfolio-margining will require a Clearing Participant to hold both Futures and OTC authorisations. Portfolio-margining will reduce the combined amount of margin required in respect of the Clearing Participant's OTC and ASX 24 Futures portfolios. ASX will designate ASX 24 Futures that are eligible for portfolio-margining and Clearing Participants may self-select eligible positions from their futures portfolio for portfolio-margining with their OTC derivatives portfolio. 	<p>(N) During the dealer-to-dealer phase of ASX's service, is it sufficient for a Clearing Participant to have a single House Clearing Account for both its OTC and Futures proprietary business? Do you foresee any issues with such an approach?</p> <p>(O) If ASX were to hold Initial Margin on trust (as contemplated in draft rules 5.7 and 5.9) would this achieve "bankruptcy remoteness" under Basel III (APRA Prudential Standard 112)? What other steps, if any, do you think ASX would need to take to ensure "bankruptcy remoteness"? Please comment on the relative importance of bankruptcy remote collateral holding arrangements as compared with other service features planned for introduction in Phase 2.</p> <p>(P) Do you agree with the proposed methodology for calculating PAI as set out in the OTC Handbook? If not – why not?</p> <p>(Q) Do you have any comments on ASX's approach to portfolio margining ASX 24 Futures and OTC Derivatives?</p>

Rule Section	Explanation of ASX Approach	Stakeholder Questions and feedback sought
	<ul style="list-style-type: none"> ASX 24 Futures allocated for portfolio-margining will be managed against the associated OTC positions in any default scenario (i.e. they will be auctioned with the OTC positions rather than closed out on market) to minimize the risk to ASX and the default fund caused by separating them. 	
<p>6 – Default (6.3-6.4)</p> <p>(6.2 and Schedule 3)</p>	<p>(i) Events of Default</p> <ul style="list-style-type: none"> An OTC Clearing Participant may be in “default” if it is subject to an event of default set out in Futures Rule 71.3 or one of the additional events of default set out in OTC Rule 6.4. The definition of “bankruptcy” for the purpose of the additional default events has been adopted from the ISDA master agreement to reflect the terms of the OTC Open Contracts. Rule 6.3 enables ASX to prescribe insolvency related events which will trigger automatic termination where this is desirable under the overseas insolvency regimes applicable to non-Australian OTC participants. <p>(ii) Default Management Process</p> <ul style="list-style-type: none"> ASX proposes to establish one or more Default Management Groups (DMG) for the purpose of advising and assisting it with default matters including participation in default simulations, advice on hedging and auction strategies. Participation in the DMG is mandatory. Representatives will be drawn from a subset of OTC Clearing Participants at any one time, and will be rotational in order to share the resource impact fairly over time. The DMG will be an advisory committee only. ASX will not be bound by any recommendations provided by the DMG. 	<p>(R) Are there other events that should be expressly contemplated as events of default for an OTC Clearing Participant?</p> <p>(S) Do you consider that the procedures of the DMG are appropriate? Are there other matters on which ASX should seek the input of Clearing Participants in the event of a default?</p>

Rule Section	Explanation of ASX Approach	Stakeholder Questions and feedback sought
	<p>Participant's portfolio. A juniorised Clearing Participant will have their OTC Commitments used up before other OTC Clearing Participants in the default fund. This approach is consistent with the emerging practice internationally that uses default fund contributions as a means of incentivising behaviour during a default.</p> <ul style="list-style-type: none"> ASX proposes to employ a winner takes all approach to default auction procedures because of its simplicity and prevalence among Clearing participants internationally. However, flexibility to use other auction formats will be retained. 	<p>(AA) Do you agree with a winner-takes-all approach or do you think a different approach is preferable? If so, why?</p>
Futures Rules – Significant amendments only		
<p>6 – Withdrawal of Clearing Participant Commitment</p>	<p>Commitments</p> <ul style="list-style-type: none"> The concept of the minimum period of Commitment has been removed. It has been replaced with a new resignation regime under which Commitment will be returned at the beginning of the quarter following the Clearing Participant's effective resignation. This approach will provide Clearing Participant's with greater certainty around the timing of the return of their Commitment and the period in respect of which it is at risk (see amended rule 11). 	<p>(BB) Does the proposed resignation regime provide adequate certainty of exposure for resigning Clearing Participants?</p>
<p>7 – Satisfaction of Obligations of ASX Clear (Futures) (7.1-7.9)</p>	<p>(i) Default Waterfall</p> <ul style="list-style-type: none"> In order to maximise market efficiency and support the process of portfolio-margining, ASX proposes to adopt a single default waterfall for futures and OTC that distinguishes between Futures Participant Commitments and OTC Participant Commitments and applies the Commitments in a prescribed order according to the authorisations of the defaulting Clearing Participant. More details are set out in Schedule 1. 	<p>(CC) Is the proposed order of application of financial resources as illustrated in Schedule 1 appropriate?</p>

Rule Section	Explanation of ASX Approach	Stakeholder Questions and feedback sought
(7.6)	<ul style="list-style-type: none"> • Under the amendments to the existing default fund, ASX proposes to: <ul style="list-style-type: none"> ○ extend the existing \$370m existing default fund to include \$100m of new funded Commitments from OTC Clearing Participants so that there will be \$470m in total. This OTC funding requirement is based on ASX's 2012 Design Study ASX conducted with the assistance of nine domestic and international banks. However, this change is subject to a ramp up schedule for OTC Commitments that will ensure that individual OTC Clearing Participants will not be required to fund a disproportionate share of the new OTC risk; and ○ leave the level of Second Level Commitments (unfunded) from Futures Clearing Participants unchanged at \$30m. • ASX will review the appropriate level of total OTC Commitments in advance of Phase 2 of the OTC Clearing Service (which will involve the introduction of client clearing and NZ clearing). <p>(ii) Replenishment</p> <ul style="list-style-type: none"> • ASX has clarified that Clearing Participants have no legal obligation to replenish when requested. 	(DD) Is it sufficiently clear that no Clearing Participant has a legal obligation to replenish at any time?
11 – Resignation, termination and Change in Control (11.1)	<p>(i) Resignation</p> <ul style="list-style-type: none"> • Under the revised resignation regime, a Clearing Participant's resignation will be effective on the last day of quarter where, 30 days prior to the last day of that quarter: <ul style="list-style-type: none"> ○ the Clearing Participant has given ASX notice of resignation in writing; and ○ ASX has confirmed that the Clearing Participant has satisfied prescribed objective criteria (including that it has no Open Positions). ASX will provide such confirmation within 5 Business Days of written notice by a resigning Clearing Participant. 	(EE) Does this resignation regime provide adequate clarity and certainty around the resignation process?

Rule Section	Explanation of ASX Approach	Stakeholder Questions and feedback sought
(11.1A)	<ul style="list-style-type: none"> • A Clearing Participant's Commitment will be at risk until its resignation is effective. Its Commitment will be returned on the first Business Day of the quarter after its resignation is effective. • A Futures Clearing Participant that has satisfied all the conditions required for resignation will not be subject to compulsory settlement (under the Futures Rules) because it will have no Open Positions. • ASX will not require a Futures Clearing Participant that has satisfied all of the conditions for resignation to provide a Second Level Commitment that commences on or after its effective date of resignation. • The revised resignation regime outlined above is intended to provide greater clarity and certainty around the resignation process and the period of a Clearing Participant's liability, bearing in mind that ASX calculates Commitments on a quarterly basis (ahead of the end of the quarter). <p>(ii) Termination</p> <ul style="list-style-type: none"> • ASX proposes to adopt an approach similar to resignation in circumstances where a Clearing Participant's admission is terminated. • However, in the case of termination, ASX will notify the Clearing Participant that it is terminated and after such notification the Clearing Participant will be unable to use ASX's clearing facilities except with ASX's consent. • This approach to termination will ensure consistency in determining a Clearing Participant's liabilities. 	(FF) Is there any reason why ASXCLF should not adopt a similar approach to resignation for the purpose of termination?
14 - Amendment to Rules	<ul style="list-style-type: none"> • Under the existing Futures Rules, any amendment to the rules relating among other things to the amount of Futures Commitments and the default waterfall is subject to approval by the majority of Clearing Participants.

	<ul style="list-style-type: none"> • ASX proposes to: <ul style="list-style-type: none"> ○ extend the existing ballot requirement to apply to changes to the aggregate amount of OTC Commitments; ○ grant each Clearing Participant one vote per authorisation that it holds. This means that a Clearing Participant that is authorised to clear both OTC Derivatives and ASX 24 Futures will have up to two votes (depending on the subject matter of the proposed amendment); and ○ define more precisely the matters on which Clearing Participants are entitled to vote, namely: <ul style="list-style-type: none"> ▪ a change to the aggregate amount of Futures Commitment or OTC Commitment – each Clearing Participant has one vote for each Commitment it has provided; and ▪ a change to the ordering of financial resources under the default waterfall that would reduce the aggregate amount of financial resources that may be applied in priority to the Futures Commitments or OTC Commitments of non-defaulting Clearing Participants – the Clearing Participants whose Commitments are “brought forward” by such a change may vote. • This approach to voting has been adopted to recognise that some Clearing Participants have more Commitments at risk than others. 	<p>(GG) Is the proposed approach to granting a vote per authorisation appropriate in light of the matters the subject of a vote?</p> <p>(HH) Are there other matters in connection with the default waterfall on which Clearing Participants should be entitled to vote?</p>
Part 7A - Termination with respect to ASX Clear (Futures)	<ul style="list-style-type: none"> • The proposed rules provide for termination against ASX where ASX defaults on a payment or becomes insolvent in order to enable ADIs to gain concessional risk weighting on netted trade exposures to ASX, for both Futures and OTC. 	<p>(II) Will the inclusion of this rule assist ADIs in gaining concessional risk weightings on netted trade exposures?</p>

20 - Risk Committee (20 and Schedule 15)	<ul style="list-style-type: none"> • The Risk Committee is open to both OTC and Futures Clearing Participants. Its purpose is to facilitate participant input into ASX's risk management approach and processes. • The Chair will be elected by members and the Committee will be a self-governing body. ASX will provide secretariat support. • Although ASX will not be obliged to adopt the Risk Committee's recommendations, ASX will adopt an "if not, why not" approach. 	(JJ) Do you consider that the mandate and procedures of the Risk Committee are appropriate?

ASX OTC Rulebook

1 SCOPE AND INTERPRETATION

1.1 ASX Clear (Futures), OTC Rules and OTC Clearing

These rules are the ASX OTC Operating Rules of ASX Clear Futures Pty Limited. These rules are referred to as the **OTC Rules** and ASX Clear Futures Pty Limited is referred to as **ASX Clear (Futures)**.

ASX Clear (Futures) may provide clearing facilities for over-the-counter derivatives (referred to as **OTC Clearing**) in accordance with these OTC Rules.

1.2 Futures Rules and their application

These OTC Rules form part of:

- (a) the Operating Rules of ASX Clear (Futures), which are referred to as the **Futures Rules**; and
- (b) the contract constituted between ASX Clear (Futures) and Clearing Participants, and between each Clearing Participant, under the Futures Rules.

For the purpose of the Futures Rules, each “Futures Term” in the following table includes the corresponding “OTC Term” used in these OTC Rules:

Futures Term	OTC Term
Clearing Participants	OTC Participants
Market Contracts	OTC Transactions
Open Contracts	OTC Open Contracts
Open Position	OTC Open Position
Commitment	OTC Commitment
Initial Margin	OTC Initial Margin
Variation Margin	OTC Daily Variation Margin

Accordingly, unless these OTC Rules, (or the Futures Rules), specify otherwise, the provisions of the Futures Rules which apply to one of these Futures Terms also applies as if it referred to its corresponding OTC Term.

At the beginning of each OTC Rule a “signpost” provision has been included to specify to which Futures Rules that OTC Rule relates and the extent to which those Futures Rules apply. Where a signpost specifies that particular Futures Rules apply to “OTC Clearing” it means it applies as if it referred to its corresponding OTC Terms on the basis of the table set out above.

These OTC Rules prevail if they specify that a Futures Rule does not apply, or if these OTC Rules are inconsistent with, or vary, the Futures Rules. For clarity, Schedule 1 (Relationship with Futures Rules) to these OTC Rules sets out a matrix showing which Futures Rules are disapplied to OTC Clearing and OTC Open Contracts.

1.3 Meanings of terms

Unless they are defined in these OTC Rules (including in this OTC Rule 1 (Scope and Interpretation)), capitalised terms used in these OTC Rules have the meaning which they have in the Futures Rules.

1.4 OTC Handbook

The ASX OTC Handbook of ASX Clear (Futures) is referred to as the **OTC Handbook**. The OTC Handbook sets out the terms and procedures relating to OTC Clearing and other related matters. Each OTC Participant undertakes to comply with the provisions of the OTC Handbook and a failure to do so is a contravention of these OTC Rules. However, the OTC Handbook does not form part of these OTC Rules or the Futures Rules. Also, these OTC Rules (and, if applicable, the Futures Rules) prevail in the event of any inconsistency between these OTC Rules and the OTC Handbook.

1.5 OTC Participants

A Clearing Participant who is authorised to clear OTC Transactions in accordance with these OTC Rules is referred to as an **OTC Participant**.

1.6 OTC Transactions and OTC Transaction Type

These OTC Rules govern the clearing of over-the-counter derivatives that meet the eligibility criteria set out in the OTC Handbook, which are referred to as **OTC Transactions**. The categories of OTC Transactions described in the OTC Handbook are referred to as **OTC Transaction Types**.

1.7 OTC Open Contract

The contract of the OTC Participant with ASX Clear (Futures) which is taken to arise from the registration of an OTC Transaction is referred to as an **OTC Open Contract**.

1.8 OTC Open Position

The entitlement of an OTC Participant under an OTC Open Contract which has not been completed or Terminated (as described in Rule 6 (Default)) is referred to as an **OTC Open Position**.

All OTC Open Positions are House Positions for the purpose of the Futures Rules¹.

1.9 OTC Terms

The terms of OTC Open Contracts are referred to as the **OTC Terms** and are set out in the OTC Handbook.

1.10 Interpretation

Unless the contrary intention appears, in these OTC Rules:

- (a) a reference to a particular "OTC Rule" is a reference to that rule in these OTC Rules;
- (b) a reference to any thing (including an amount) is a reference to the whole and each part of it;

¹ This will be varied for client clearing in Phase 2.

- (c) a reference to a document (including the Futures Rules, these OTC Rules and the OTC Handbook) includes any variation or replacement of it;
- (d) the word “law” includes common law, principles of equity, and laws made by parliament (and laws made by parliament include State, Territory and Commonwealth laws and regulations and other instruments under them, and consolidations, amendments, re-enactments or replacements of any of them);
- (e) a reference to Australian dollars, dollars, AUD, \$ or A\$ is a reference to the lawful currency of Australia;
- (f) a reference to a time of day is a reference to Sydney time;
- (g) the word “person” includes an individual, a firm, a body corporate, an unincorporated association and an authority;
- (h) a reference to a particular person includes the person’s executors, administrators, successors, substitutes (including persons taking by novation) and assigns;
- (i) the words “including”, “for example” or “such as” when introducing an example, do not limit the meaning of the words to which the example relates to that example or examples of a similar kind;
- (j) a reference to the Corporations Act is a reference to the *Corporations Act 2001 (Cwlth)*;
- (k) an expression in an OTC Rule which deals with a matter dealt with in a provision of the Corporations Act has the same meaning that it has in that provision of the Corporations Act; and
- (l) in the interpretation of an OTC Rule, a construction that would promote the purpose or object underlying the OTC Rules (whether that purpose or object is expressly stated in the OTC Rules or not) is to be preferred to a construction which would not promote that purpose or object.

1.11 Number

In these OTC Rules, the singular includes the plural and the plural includes the singular.

1.12 Headings

Headings (including those in brackets at the beginning of paragraphs) in these OTC Rules are for convenience only and do not affect the interpretation of these OTC Rules.

1.13 Signpost: Good standing

For the purposes of these OTC Rules, and for the purposes of any OTC Participant, the provisions of Futures Rule 1.2 (Good Standing) apply.

2 PARTICIPATION AND GENERAL

2.1 Signpost to related Futures Rules

The OTC Rules in this OTC Rule 2 (Participation and General) relate to matters addressed in Part 2 (General) of the Futures Rules, other than Futures Rules 5

(Commitment to Support Obligations of ASX Clear (Futures)) to 8 (Financial Requirement) (to which OTC Rules 3 and 6 are related). Of these related Futures Rules the following Futures Rules apply to OTC Clearing, where relevant as supplemented and varied by these OTC Rules:

- 3.2 (Fees)
- 4 (Becoming a Clearing Participant), other than 4.3 and 4.14(j), (ja), (k) and (l)
- 9A (Regulation)
- 10 (Appointment of Board as Agent)
- 11 (Resignation and Change in Control)
- 12 (Appeals)
- 13 (Access to Records)
- 14 (Amendment to Rules)
- 16 (Use of Exchange System)
- 17 (Terms relating to Exchange Equipment).
- 18 (Terms relating to Both Licensed Software and Exchange Equipment)

2.2 OTC Participants

To be an OTC Participant, an entity must be admitted as a Clearing Participant under the Futures Rules and authorised by ASX Clear (Futures) to participate in OTC Clearing in accordance with these OTC Rules. If an entity which was an OTC Participant ceases to be a Clearing Participant, then it also ceases to be an OTC Participant.

However, an OTC Participant need not be a Futures Participant as defined in the Futures Rules.

A Clearing Participant may apply for an authorisation to clear OTC Transactions, or certain OTC Transaction Types, in accordance with these OTC Rules. The application for this authorisation is referred to as an application to “become an OTC Participant”.

2.3 Conditions to become an OTC Participant

A Clearing Participant which satisfies the following conditions may apply to become an OTC Participant:

- (a) it is one of the following:
 - (i) an Australian Bank as defined in the Corporations Act; or
 - (ii) an Australian subsidiary of an Australian Bank,

in each case, which is regulated by the Australian Prudential Regulation Authority in accordance with the *Banking Act 1959 (Cwlth)* or is the holder of an appropriate (as determined by ASX Clear (Futures), in its sole discretion) Australian Financial Services Licence; and

- (b) it meets the applicable Financial Requirements under OTC Rule 3.3 (Financial Requirements of OTC Participants); and
- (c) it can demonstrate to the satisfaction of ASX Clear (Futures) its ability to participate in the default management process maintained by ASX Clear (Futures) and referred to in OTC Rule 6.2 (Default management process), including participating in a DM Auction which includes both OTC Open Contracts and, if applicable, other Open Contracts of the Defaulted OTC Participant; and
- (d) such other conditions as are set out in the OTC Handbook.

In special circumstances to the satisfaction of ASX Clear (Futures), and with ASX Clear (Futures)'s consent, a person not satisfying these requirements may apply to become an OTC Participant.

2.4 Application to be an OTC Participant

An applicant intending to become an OTC Participant must lodge with ASX Clear (Futures):

- (a) an application in the form required by ASX Clear (Futures) duly executed by the applicant;
- (b) such information and evidence concerning the applicant as ASX Clear (Futures) may require;
- (c) an undertaking by the applicant in the form required by ASX Clear (Futures) to abide by these OTC Rules, the OTC Handbook and the Futures Rules as varied from time to time;
- (d) an application fee of an amount determined by ASX Clear (Futures); and
- (e) such other documents, information or evidence as are set out in the OTC Handbook.

In considering an application to become an OTC Participant, ASX Clear (Futures) may request any information or evidence which it thinks fit.

2.5 Approval of application

In its discretion ASX Clear (Futures) may approve an application where it:

- (a) is satisfied that the applicant meets the conditions in OTC Rule 2.3 (Conditions to become an OTC Participant); and
- (b) expects that the applicant will continue to meet all applicable admission and general conduct requirements for Clearing Participants under the Futures Rules.

These requirements are continuing and need to be satisfied for as long as the Clearing Participant is an OTC Participant.

The approval of ASX Clear (Futures) to authorise a Clearing Participant as an OTC Participant may be limited to a particular class or category of OTC Transaction.

2.6 Fees and OTC Commitment

Any approval of ASX Clear (Futures) to authorise a Clearing Participant as an OTC Participant does not take effect until the applicant has:

- (a) paid the fees as required by ASX Clear (Futures) in accordance with the OTC Handbook; and
- (b) provided its OTC Commitment to ASX Clear (Futures) in accordance with OTC Rule 3 (Commitments and Financial Requirements).

Unless these requirements are satisfied within two months of the date of the approval by ASX Clear (Futures), or such further time as ASX Clear (Futures) may in its discretion allow, the approval lapses.

2.7 Conditions on authorisation

In addition to the requirements set out in OTC Rule 2.5 (Approval of application) above, ASX Clear (Futures) may impose any additional conditions on an authorisation as an OTC Participant as it thinks fit from time to time. This may include limitations with respect to OTC Transaction Types.

At any time, if an OTC Participant does not comply, or is likely to not comply, with any of the conditions of its authorisation as an OTC Participant then it must notify ASX Clear (Futures) immediately.

2.8 Limitations on authorisation

Authorisation as an OTC Participant is a privilege granted by ASX Clear (Futures) and may be withdrawn by ASX Clear (Futures) at any time.

An OTC Participant may not assign, charge, declare a trust in respect of or otherwise deal with its rights or privileges under these OTC Rules. ASX Clear (Futures) is not required to recognise any purported interest of any person in the rights of an OTC Participant under these OTC Rules.

2.9 Fees

ASX Clear (Futures) may impose different fees on an OTC Participant from those which are imposed on a Clearing Participant which is not an OTC Participant. Also, ASX Clear (Futures) may impose different fees on OTC Participants authorised to clear different categories of OTC Transactions.

Each OTC Participant must pay the fees imposed on it, on demand or on such other specified time. Fees which are payable under these OTC Rules or the Futures Rules may be deducted by ASX Clear (Futures) from any credit balance of the House Clearing Account of the OTC Participant.

2.10 Relationship with ASX Clear (Futures)²

Each OTC Participant deals with ASX Clear (Futures) under these OTC Rules and the Futures Rules as principal, not on behalf of any other person and not as trustee.

ASX Clear (Futures) need not recognise the interests of any person who claims to have an interest in the rights which an OTC Participant has against ASX Clear (Futures) and ASX Clear (Futures) is not responsible for the performance or liabilities of any OTC Participant to any person.

² This will be revisited for client clearing in Phase 2.

2.11 Variations to OTC Handbook

ASX Clear (Futures) may vary or replace the OTC Handbook from time to time. Any such variation or replacement of the OTC Handbook will become effective at the time specified by ASX Clear (Futures). ASX Clear (Futures) agrees to notify in advance the OTC Participants of any such variation or replacement. The accidental omission to give notice under this provision to, or the non-receipt of notice under this provision by, any OTC Participant does not invalidate any variation or replacement.

2.12 Termination of OTC Clearing service

If at any time ASX Clear (Futures) decides to cease providing the OTC Clearing service provided under these OTC Rules, it agrees to provide at least six months' notice to all OTC Participants of the date on which the service will cease. However, this is not invalidated by any OTC Participant not receiving this notice.

If there are any OTC Open Contracts on the date for cessation of the service which has been notified by ASX Clear (Futures) then ASX Clear (Futures) may, at its sole discretion:

- (a) require OTC Participants remove any OTC Open Contracts in accordance with OTC Rule 4.13 (Re-bilateralisation);
- (b) terminate any or all of such OTC Open Contracts and require them to be cash settled at a price determined by ASX Clear (Futures); and/or
- (c) postpone the date of the cessation of the service until such time as ASX Clear (Futures) determines.

2.13 Obligations of OTC Participant prior to termination

The termination or suspension of a Clearing Participant or termination of its authorisation as an OTC Participant in respect of an OTC Transaction Type does not affect any accrued rights which ASX Clear (Futures), a Related Body Corporate of ASX Clear (Futures), or other OTC Participants have against the OTC Participant or any accrued obligations which the OTC Participant has to ASX Clear (Futures), a Related Body Corporate of ASX Clear (Futures) or to other OTC Participants.

Without limiting the above, following the termination or suspension of a Clearing Participant or termination of its authorisation as an OTC Participant in respect of an OTC Transaction Type under these OTC Rules:

- (a) the OTC Rules continue to apply and ASX Clear (Futures) will continue to have jurisdiction in respect of the OTC Participant concerning any conduct or any failure to comply with the OTC Rules which occurred before the termination or suspension, whether that conduct or failure was by the OTC Participant or by any other person for whose conduct the OTC Participant was responsible;
- (b) the OTC Participant continues to be bound by any indemnity given by the OTC Participant under these OTC Rules and Futures Rules; and
- (c) other Futures Rules and OTC Rules continue to apply in respect of the Participant to the extent required to give effect to paragraphs (a) and (b).

Without limiting the above, ASX Clear (Futures) is entitled to require any outstanding OTC Open Contract of the OTC Participant to be removed in accordance with OTC Rule 4.13 (Re-bilateralisation).

2.14 OTC Product Committees

Committees related to OTC Clearing (referred to as **OTC Product Committees**) may be established in accordance with the procedures set out in the OTC Handbook. Each OTC Participant must comply with the procedures set out in the OTC Handbook in respect of any OTC Product Committee of which it is a member.

3 COMMITMENTS AND FINANCIAL REQUIREMENTS

3.1 Signpost to related Futures Rules

These OTC Rules relate to matters which are addressed in Futures Rules:

- 5 (Commitment to Support Obligations of ASX Clear (Futures))
- 6 (Withdrawal of Clearing Participant Commitment)
- 8 (Financial Requirement).

These Futures Rules are applicable to OTC Clearing, as supplemented and varied by these OTC Rules.

3.2 OTC Commitment

OTC Participants must provide a commitment to the financial support of the obligations of ASX Clear Futures ("**OTC Commitments**") calculated in accordance with Schedule 2 (OTC Commitment).

The aggregate amount of OTC Commitment is one hundred million dollars (A\$100,000,000), subject to the transitional arrangements set out in the OTC Handbook.

An OTC Participant that is also a Futures Participant must provide an additional Futures Commitment calculated in accordance with the Futures Rules.

3.3 Financial Requirements of OTC Participants

An OTC Participant must:

- (a) comply with the Financial Requirements in respect of an OTC Participant as specified in the OTC Handbook; and
- (b) lodge with ASX Clear (Futures) the financial information prescribed in the OTC Handbook by no later than the time set out in the OTC Handbook; and
- (c) immediately advise ASX Clear (Futures) if any of the financial circumstances set out in the OTC Handbook occur in respect of the OTC Participant (if any such financial circumstances are set out in the OTC Handbook).

ASX Clear (Futures) may determine that the Financial Requirements of a particular OTC Participant are to exceed those specified in the OTC Handbook. ASX Clear (Futures) will make such a determination having regard to the number or value of OTC Open Contracts held by the OTC Participant, its assessment of the OTC Participant's risk under such OTC Open Contracts, the requirement of insurers or without limitation any other relevant factor. Where an OTC Participant is also a Futures Participant, ASX Clear (Futures) may also make such a determination having regard to both OTC Open Contracts and other Open Contracts. Any increased Financial Requirements determined by ASX Clear

(Futures) apply to that OTC Participant until ASX Clear (Futures) determines otherwise.

An OTC Participant who is also a Futures Participant will only be required to comply with an amount equal to the greater of:

- (d) the Financial Requirements applicable to it as a Futures Participant; or
- (e) the Financial Requirements applicable to it as an OTC Participant,

unless otherwise provided under this OTC Rule 3.3.

4 REGISTRATION

4.1 Signpost to related Futures Rules

These OTC Rules relate to matters which are addressed in Part 3 (Registration of Market Contracts and Obligations of ASX Clear (Futures)) of the Futures Rules. However, to the extent that those Futures Rules could be relevant to OTC Clearing they are replaced by these OTC Rules. Accordingly, Part 3 of the Futures Rules does not apply to OTC Clearing.

4.2 OTC Participants only³

Only OTC Participants are entitled to have OTC Transactions registered in their name.

Each OTC Participant must be acting as principal in respect of each OTC Transaction and each OTC Participant represents and warrants that it is acting as principal in respect of an OTC Transaction.

4.3 Submission of OTC Transactions

An OTC Transaction must be presented to ASX Clear (Futures) in accordance with the OTC Handbook.

Once consent has been obtained, or is taken to have been obtained (in accordance with the OTC Handbook), from the OTC Participants with whom the OTC Open Contracts would be created by the registration of that OTC Transaction, then the OTC Transaction is taken to have been submitted to ASX Clear (Futures) for registration.

4.4 Reliance on correctness

ASX Clear (Futures) is entitled to rely on the particulars of any OTC Transaction notified to it as being correct and it is not bound to recognise any error in relation to such particulars.

4.5 Acceptance for registration

ASX Clear (Futures) will accept the submission of an OTC Transaction for registration if:

- (a) the OTC Transaction has been submitted for registration in accordance with the OTC Handbook;
- (b) each OTC Participant with whom an OTC Open Contract would be registered in respect of that OTC Transaction:

³ This will be varied in Phase 2 for client clearing.

- (i) was not in Default as at the time at which the OTC Transaction was received by ASX Clear (Futures) for registration;
 - (ii) is authorised as an OTC Participant in respect of the relevant OTC Transaction Type;
 - (iii) is entitled under these OTC Rules and the Futures Rules to have an OTC Transaction registered in its name;
- (c) the OTC Transaction satisfies the OTC Eligibility Criteria set out in the OTC Handbook;
 - (d) the OTC Transaction passes the limit check applicable to it in accordance with the OTC Handbook for each OTC Participant with whom an OTC Open Contract would be registered in respect of that OTC Transaction;
 - (e) ASX Clear (Futures) does not reasonably believe that its registration of the OTC Transaction will contravene applicable law; and
 - (f) each applicable additional condition relevant to the OTC Transaction set out in the OTC Handbook is satisfied.

Where ASX Clear (Futures) has accepted the submission of an OTC Transaction for registration, that OTC Transaction will be deemed to have been registered as at the time it was received by ASX Clear (Futures).

Each OTC Open Contract registered by ASX Clear (Futures) will be registered in the House Clearing Account.

4.6 Creation of OTC Open Contracts

The effect of registration of an OTC Transaction is that ASX Clear (Futures) will be interposed, by novation, as the counterparty under an OTC Open Contract to each OTC Participant which was a party to the OTC Transaction. The result of this is that:

- (a) two OTC Open Contracts are created, one between the ASX and each OTC Participant which was a party to the OTC Transaction. Under each OTC Open Contract, ASX Clear (Futures) has the same rights against, and obligations to, each OTC Participant which the other OTC Participant had under the OTC Transaction (this reference to the “same” rights or obligations is a reference to rights or obligations which are the same in nature and character as those rights or obligations rather than the same as to the person entitled to them or obliged to perform them); and
- (b) the OTC Transaction is terminated so that each OTC Participant is released from its obligations to the other OTC Participant which was a party to the OTC Transaction, except for outstanding obligations which have fallen due for performance and which have not been performed at the time of registration; and
- (c) each OTC Participant which was a party to the OTC Transaction is taken to be, and is, bound by its respective OTC Open Contracts with ASX Clear (Futures) automatically and without any further action on their part.

The terms of these OTC Open Contracts incorporate all applicable terms of the OTC Rules and the OTC Handbook (including the OTC Terms set out in the OTC Handbook which are applicable to the relevant OTC Open Contract). Each OTC Open Contract is between ASX Clear (Futures) and an OTC Participant as

principal and not as agent. No other person has any rights or obligations under any OTC Open Contract between the OTC Participant and ASX Clear (Futures).

The OTC Open Contracts are not dependent on the valid existence of the OTC Transaction. If the OTC Transaction is rendered invalid after it has been registered, the OTC Open Contracts are not affected. However, this does not limit OTC Rule 4.7 (Exclusion of certain OTC Open Contracts).

4.7 Exclusion of certain OTC Open Contracts

ASX Clear (Futures) is not obliged to meet its obligations under an OTC Open Contract with an OTC Clearing Participant where the OTC Transaction the registration of which gave rise to the OTC Open Contract:

- (a) was entered into fraudulently by the OTC Clearing Participant; or
- (b) was, to the knowledge of the OTC Clearing Participant or the other party to the OTC Transaction entered into with an intention by either party to the OTC Transaction to Default; or
- (c) was otherwise not entered into in a bona fide manner by the OTC Clearing Participant or such other party,

provided that:

- (i) the rights provided under this Rule to ASX Clear (Futures) does not relieve the OTC Clearing Participant from any obligations to ASX Clear (Futures) under the OTC Open Contract; and
- (ii) the existence of or exercise of any rights under this Rule by ASX Clear (Futures) in relation to an OTC Open Contract does not affect or avoid ASX Clear (Futures)' obligations under any other OTC Open Contract whether or not arising from the registration of the same OTC Transaction.

4.8 Corrections

If an OTC Transaction is incorrectly registered by ASX Clear (Futures) then ASX Clear (Futures) may, in its discretion and with the agreement of the parties to the OTC Open Contracts created by the registration, correct the registration of the OTC Transaction so that it is taken to have been registered as corrected and these OTC Rules and the Futures Rules apply accordingly.

Any such correction may be made subject to any conditions imposed by ASX Clear (Futures) including provision of Margin. ASX Clear (Futures) is not liable to any person in connection with any correction so made.

4.9 Authoritative Record

The record of OTC Open Contracts and OTC Open Positions maintained by ASX Clear (Futures) is the authoritative record and is conclusive at all times.

4.10 Performance of OTC Open Contracts

Each OTC Participant must perform all of its obligations under the terms of each OTC Open Contract registered in its name.

4.11 Trade amendment and cancellation

Variation of the terms of an OTC Open Contract by OTC Participants may only be effected in accordance with the OTC Handbook.

Cancellation of an OTC Open Contract by OTC Participants may only be effected in accordance with the OTC Handbook.

4.12 Backloading

OTC Transactions may be backloaded in accordance with the OTC Handbook.

4.13 Re-bilateralisation

Two OTC Open Contracts which have equal but offsetting terms (except for the identity of the parties) may be removed by ASX Clear (Futures) if:

- (a) each OTC Participant which holds an OTC Open Position in respect of one of those OTC Open Contracts notifies ASX Clear (Futures) of its instructions to remove the OTC Open Contract; and
- (b) any conditions on accepting such instructions determined by ASX Clear (Futures) in its discretion (which may include the provision of Margin from either or both OTC Participants) have been satisfied; and
- (c) ASX Clear (Futures) chooses, at its discretion, to accept those instructions.

In addition, ASX Clear (Futures) may also direct such removal of OTC Open Contracts in accordance with these OTC Rules and the Futures Rules.

The effect of the removal is that the OTC Open Contracts are terminated and ASX Clear (Futures) no longer has any rights against, or obligations to, either of the OTC Participants which held an OTC Open Position with respect to that OTC Open Contract under the terms of those OTC Open Contracts. The OTC Handbook sets out the procedures and timing for the removal of OTC Open Contracts.

4.14 Transfer of OTC Open Contracts

Any transfer of an OTC Open Contract by an OTC Participant may only be effected in accordance with this OTC Rule 4.14 and the OTC Handbook. Any purported transfer not in accordance with this Rule and the OTC Handbook will not be effective.

ASX Clear (Futures) may, on the request of an OTC Participant, transfer an OTC Open Contract held in the name of that OTC Participant to another OTC Participant that is authorised in respect of the category of OTC Transaction to which that OTC Open Contract relates.

ASX Clear (Futures) may:

- (A) in its discretion, decline any request, without cause; or
- (B) impose such conditions on accepting such a request as it thinks fit, including requiring Margin.

The OTC Participant to which the OTC Open Contract is to be transferred must consent to the transfer before it can be effected.

The transfer of an OTC Open Contract is effected by novation so that:

- (a) a new OTC Open Contract is created between ASX Clear (Futures) and the OTC Participant to whom the OTC Open Contract is to be transferred. Under this OTC Open Contract:
 - (i) ASX Clear (Futures) has the same rights against, and obligations to, the receiving OTC Participant which it had under the OTC Open Contract between ASX Clear (Futures) and the transferring OTC Participant; and
 - (ii) the receiving OTC Participant has the same rights against, and obligations to, ASX Clear (Futures) which the transferring OTC Participant had against ASX Clear (Futures) under the OTC Open Contract between ASX Clear (Futures) and the transferring OTC Participant.

However, this reference to the “same” rights or obligations is a reference to rights or obligations which are the same in nature and character as those rights or obligations rather than the same as to the person entitled to them or obliged to perform them; and

- (b) the OTC Open Contract between ASX Clear (Futures) and the transferring OTC Participant is terminated so that each of ASX Clear (Futures) and that OTC Participant is released from its obligations to the other, except for outstanding obligations which have fallen due for performance and which have not been performed at the time of registration.

The OTC Handbook sets out the procedures and timing for such transfers.

4.15 OTC Portfolio Compression

If the requirements for portfolio compression set out in the OTC Handbook are met, then ASX Clear (Futures) will facilitate a portfolio compression cycle in accordance with the procedures set out in the OTC Handbook.

4.16 Market netting contract

ASX Clear (Futures) and each OTC Participant acknowledge that OTC Open Contracts are market netting contracts (as defined in the *Payment Systems and Netting Act 1998 (Cwlth)*) the terms of which incorporate any and all Futures Rules, OTC Rules and provisions of the OTC Handbook which provide for or relate to the exercise of default rights, the netting, set-off or termination of obligations, the calculation or payment of termination values or net amounts and obligations to pay deposits or margin calls, or which otherwise affect the rights and obligations of the parties to the contracts.

5 ACCOUNTS AND MARGIN

5.1 Signpost to related Futures Rules

These OTC Rules relate to matters which are addressed in Part 4 (Accounts and Daily Settlement) of the Futures Rules. However, to the extent that those Futures Rules could be applicable to OTC Clearing they are replaced by these OTC Rules. Accordingly, Part 4 of the Futures Rules does not apply to OTC Clearing except to the extent set out in this OTC Rule 5.

5.2 House Clearing Account

All money or property owing or deliverable to or from ASX Clear (Futures) in relation to OTC Open Positions of an OTC Participant is registered in that OTC

Participant's House Clearing Account (which is the same account as is established under Futures Rule 41.1).

ASX Clear (Futures) may, but is not obliged to, withdraw an amount owing to it by an OTC Participant in connection with OTC Open Positions (including OTC Margin) from that OTC Participant's House Clearing Account.

5.3 Transfer of OTC Initial Margin

In respect of each of its OTC Open Positions, each OTC Participant must transfer to ASX Clear (Futures) an amount of money in Australian dollars (or such other currency set out in the OTC Handbook as ASX Clear (Futures) accepts in its discretion) equal to the OTC Initial Margin required as determined by ASX Clear (Futures) from time to time. The amounts must be transferred upon demand or by such time as is set out in the OTC Handbook or is otherwise required by ASX Clear (Futures). These transferred amounts are to be dealt with by ASX Clear (Futures) in accordance with these OTC Rules and the Futures Rules.

OTC Initial Margin is Margin for the purpose of the Futures Rules.

5.4 Change of OTC Initial Margin obligations

ASX Clear (Futures) may in appropriate circumstances, or for particular OTC Open Contracts or classes of OTC Open Contracts, determine a higher or lower rate of OTC Initial Margin for a particular OTC Participant or class of OTC Clearing Participants.

In addition, ASX Clear (Futures) may, from time to time and in its discretion, require that an OTC Participant transfers in relation to OTC Open Positions a greater OTC Initial Margin than that which the OTC Participant would otherwise be required to provide.

5.5 Portfolio Margining

ASX Clear (Futures) may, from time to time, notify OTC Participants of specified classes of Open Contracts (other than OTC Open Contracts) that it may take into account in determining the amount of OTC Initial Margin required to be transferred by an OTC Participant.

An OTC Participant may, in accordance with the OTC Handbook, request that Open Contracts with that OTC Participant of a class so notified by ASX Clear (Futures) be taken into account in determining the amount of OTC Initial Margin required from that OTC Participant.

If ASX Clear (Futures) accepts such a request from an OTC Participant, then ASX Clear (Futures) will:

- (a) take into account such Open Contracts in determining the amount of OTC Initial Margin required from that OTC Participant; and
- (b) not take such Open Contracts into account in determining the amount of Initial Margin other than OTC Initial Margin required from that OTC Participant, in each case, in accordance with the OTC Handbook.

Without limiting its discretion to refuse such a request from an OTC Participant, ASX Clear (Futures) may refuse such a request if it is of the view that such portfolio margining would not reduce risk in respect of the clearing facilities provided in accordance with these OTC Rules. ASX Clear (Futures) is not required to demonstrate the basis for any such view.

5.6 OTC Intra-day Margin and OTC Extra Margin

An OTC Participant must, on each Business Day, transfer to ASX Clear (Futures) by way of **OTC Intra-day Margin** amounts owing as a result of any OTC Intra-day Margin call made by ASX Clear (Futures). The manner and timing of such payments are set out in the OTC Handbook.

In addition to, or instead of, the OTC Intra-day Margins ASX Clear (Futures) may at any time require, at its absolute discretion, any one or more OTC Participants (by a time determined by ASX Clear (Futures)) to transfer as **OTC Extra Margin** further cash, securities, margin or cover for OTC Open Contracts or OTC Transactions eligible to be registered. Such OTC Participants must, in accordance with such a requirement, transfer to ASX Clear (Futures) by way of OTC Extra Margin further cash, securities, margin or cover as ASX Clear (Futures) determines.

Any OTC Intra-day Margin and OTC Extra Margin transferred to ASX Clear (Futures) by an OTC Participant is to comply with the requirements for, be treated as, held by and dealt with by ASX Clear (Futures) as Cash Initial Margin or Securities Initial Margin (as applicable).

5.7 [Cash Initial Margin⁴

All amounts of OTC Initial Margin received by ASX Clear (Futures) as an amount of money and not as securities or other property (referred to as **Cash Initial Margin**) from, or on behalf of, an OTC Participant are to be held by ASX Clear (Futures) in trust for that OTC Participant.

It is a term of the trust under which the Cash Initial Margin is held that it may be dealt with by ASX Clear (Futures) in accordance with these OTC Rules, the Futures Rules and the OTC Handbook including, without limitation:

- (a) by investing it as ASX Clear (Futures) sees fit and ASX Clear (Futures) will not be liable for any failure to invest or to invest in a particular way and
- (b) by applying it in satisfaction of performance by the OTC Participant of its obligations under these OTC Rules and the Futures Rules.

No OTC Participant is entitled to the refund, repayment or return of Cash Initial Margin other than in accordance with these OTC Rules.]

5.8 Securities Initial Margin

ASX Clear (Futures) may in its absolute discretion accept the transfer of securities or other property set out in the OTC Handbook as OTC Initial Margin instead of Cash Initial Margin (this other OTC Initial Margin is referred to as **Securities Initial Margin**).

ASX Clear (Futures) may determine the valuation of any Securities Initial Margin in its sole discretion. ASX Clear (Futures) may apply valuation haircuts to its valuation of Securities Initial Margin as set out in the OTC Handbook as varied from time to time, but subject to the right of ASX Clear (Futures) to determine different valuations at any time in its sole discretion.

ASX Clear (Futures) may from time to time require an OTC Participant to:

- (a) transfer further Cash Initial Margin or Securities Initial Margin to ensure that ASX Clear (Futures)' valuation of the Securities Initial Margin and

any Cash Initial Margin is at least equal to the OTC Initial Margin required from the OTC Participant; or

- (b) replace any Securities Initial Margin which has been transferred by the OTC Participant with Cash Initial Margin, or other Securities Initial Margin required by ASX Clear (Futures).

The obligation upon an OTC Participant to make a transfer under this OTC Rule is in addition to any other obligation of the OTC Participant to make transfers of cash amounts, securities, collateral or property as otherwise provided in accordance with the OTC Rules.

5.9 [Security interest over Securities Initial Margin]

All Securities Initial Margin is subject to a security interest in favour of ASX Clear (Futures) to secure the performance by the relevant OTC Participant of its obligations to ASX Clear (Futures). The interest and rights of ASX Clear (Futures) pursuant to the security interest to or in respect of the Securities Initial Margin have priority over the interest and rights, whenever or however acquired or created, of any other person claiming an interest by way of security in that Securities Initial Margin.

Each OTC Participant grants this security interest as beneficial owner.

This security interest is a charge.

Each OTC Participant agrees that it will not allow any other security interest, trust or encumbrance to subsist or be created over any of its Securities Initial Margin.

This security is a continuing security and is not satisfied by any intermediate payment or satisfaction of the whole or any part of the amounts owing to ASX Clear (Futures), and is not affected by any other security interest now or subsequently held by ASX Clear (Futures) for all or any of the amounts owing to it.

ASX Clear (Futures) may, at the OTC Participant's expense, apply for any registration, or give any notification, in connection with this security interest. The OTC Participant consents to any such registration or notification and agrees not to make an amendment demand.

Each OTC Participant agrees to do anything (such as obtaining consents, signing and producing documents, producing receipts and getting documents completed and signed), which ASX Clear (Futures) asks and considers necessary to:

- (a) provide more effective security over the Securities Initial Margin for payment of amounts which are, or may become, owing to ASX Clear (Futures); or
- (b) ensure that this security interest is enforceable, perfected (including, where possible, by control in addition to registration) and otherwise effective; or
- (c) enable ASX Clear (Futures) to apply for any registration, or give any notification, in connection with this security interest so that it has the priority required by ASX Clear (Futures); or
- (d) enable ASX Clear (Futures) to exercise ASX Clear (Futures)'s rights in connection with the Securities Initial Margin.⁵

⁵ Will not be implemented in Phase 1.

5.10 OTC Daily Closing Value

The closing value of OTC Open Contracts (referred to as **OTC Daily Closing Value**) will be determined by ASX Clear (Futures) in the manner, and at such times, as is set out in the OTC Handbook. This calculation by ASX Clear (Futures) is conclusive and final.

5.11 OTC Daily Variation Margin

ASX Clear (Futures) will calculate the OTC Daily Variation Margin applicable to OTC Open Contracts in the manner set out in the OTC Handbook.

Following each such determination:

- (a) if ASX Clear (Futures) determines that an OTC Participant needs to pay OTC Daily Variation Margin to ASX Clear (Futures) then the OTC Participant must pay to ASX Clear (Futures) the amount of any OTC Daily Variation Margin which ASX Clear (Futures) has determined is owing by the OTC Participant;
- (b) if ASX Clear (Futures) determines that it needs to pay OTC Daily Variation Margin to an OTC Participant then the ASX Clear (Futures) must pay to the OTC Participant the amount of any OTC Daily Variation Margin which ASX Clear (Futures) has determined is owing to the OTC Participant.

OTC Daily Variation Margin must be paid in Australian dollars, or such other currency that ASX Clear (Futures) determines is acceptable in its discretion from time to time. The payment of OTC Daily Variation Margin is made absolutely and is to be in accordance with the OTC Handbook.

An OTC Participant is not entitled to repayment of the amount of OTC Daily Variation Margin except in accordance with these OTC Rules, the OTC Handbook and ASX Clear (Futures) margining policy.

OTC Variation Margin is Margin for the purposes of the Futures Rules.

5.12 Price Alignment Interest

Price Alignment Interest is payable on OTC Daily Variation Margin in the manner set out in the OTC Handbook.

5.13 Excess Margin

All amounts held by ASX Clear (Futures) in an OTC Participant's House Clearing Account, including any monies transferred in excess of an OTC Participant's Margin obligations at the time of the transfer, are taken to have been transferred for the purpose of satisfying Margin obligations of that OTC Participant.

Amounts held by ASX Clear (Futures) which are in excess of a OTC Participant's Margin obligations from time to time are refundable to the OTC Participant by ASX Clear (Futures) upon demand, provided that ASX Clear (Futures) is satisfied, in its absolute discretion, that such amounts will not be required to satisfy any obligation (including a Margin obligation) in connection with an OTC Open Position or other Open Position of that OTC Participant.

5.14 Errors, corrections and related disputes

In the event ASX Clear (Futures) determines that an error has been made in relation to a calculation, payment, amount or similar under the OTC Rulebook, OTC Handbook or Futures Rules, whether paid or unpaid, due and payable or

prospective, retrospective or contingent, ASX Clear (Futures) may, in its sole discretion:

- (a) carry out any or all adjustments or corrections that ASX Clear (Futures) deems appropriate in relation to that error; and
- (a) impose such conditions or undertake any such actions as ASX Clear (Futures) considers appropriate to deal with the consequential impacts (whether actual or potential) in relation to making such adjustments or corrections.

Where ASX Clear (Futures) determines to take any such actions under (a) or (b) above, ASX Clear (Futures) will notify the parties involved as soon as reasonably practicable after making such a determination. Where any adjustment or correction involves an adjustment payment to any previous amounts paid by an OTC Participant, the relevant party shall pay the adjustment amount within one Business Day of its receipt of ASX Clear (Futures) determination.

ASX Clear (Futures) may determine any disputes in relation to errors, purported errors or any other related matters contemplated by this OTC Rule 5.14 including, but not limited to, matters relating to the calculation, payment or valuation of OTC Initial Margin, OTC Daily Variable Margin, OTC Intra-day Margin, OTC Extra Margin, coupons and Price Alignment Interest. Where ASX Clear (Futures) makes such a determination in relation to a dispute, that determination will be final and binding on all the parties.

ASX Clear (Futures) is not liable to any person in connection with any adjustment, correction, condition, action, consequential impact (whether actual or potential) or determination made or incurred under this Rule.

6 DEFAULT

6.1 Signpost to related Futures Rules

These OTC Rules relate to matters which are addressed in:

- Futures Rule 7 (Satisfaction of Obligations of ASX Clear (Futures)); and
- Part 7 (Procedures on a Default) of the Futures Rules.

These OTC Rules supplement those Futures Rules, which continue to apply to OTC Clearing.

Part 7A (Termination with respect to ASX Clear (Futures)) of the Futures Rules continues to apply to OTC Clearing.

6.2 Default management process

The provisions of these OTC Rules, the Futures Rules and the OTC Handbook relating to default management (referred to as the **Default Management Provisions**) include:

- Futures Rule 7 and Part 7 of the Futures Rules; and

- default management process set out in Schedule 3 (Default Management Process) to these OTC Rules;

- the rules for the default management group set out in the OTC Handbook; and
- the rules for default management auction set out in the OTC Handbook.

Each OTC Participant must:

- comply with its obligations in connection with the Default Management Provisions;
- approve ASX Clear (Futures) as a counterparty with which it can enter into DM Hedging Transactions and Auction Transactions in accordance with the Default Management Provisions,
- co-operate with, and not cause any hindrance to, ASX Clear (Futures) in the course of the management of any Default or Termination;

 - one of its employees as DMP-coordinator; and

as primary contacts for ASX Clear (Futures) for all general matters relating to default management. Each OTC Participant must notify ASX Clear (Futures) of the appointment in the manner prescribed by ASX Clear (Futures) in the OTC Handbook from time to time.

6.3 Default and Defaulted OTC Participants

In accordance with Futures Rule 71.1 an OTC Participant must notify ASX Clear (Futures) if an event of Default occurs under Futures Rule 71.3 (as supplemented by OTC Rule 6.4 (Events of Default) below), or if the OTC Participant has reasonable grounds to suspect that an event of Default may occur.

Whether or not such notice is given, if ASX Clear (Futures) is of the opinion that there is an event of Default with respect to an OTC Participant then ASX Clear (Futures) may declare the OTC Participant to be in Default and for the purposes of the Futures Rules that OTC Participant is taken to have **Defaulted**.

Without limiting the above, an OTC Participant is automatically taken to have Defaulted if an event occurs in connection with insolvency or bankruptcy with respect to it of a type which is specified by ASX Clear (Futures) from time to time. If such an event occurs, then all of the OTC Participant's Open Contracts are subject to Termination having a Termination Time immediately upon the occurrence of such event.

6.4 Events of Default

The events of Default set out in Futures Rules 71.3 apply to OTC Participants. In addition, each of the following events are included in the list of the events of Default set out in Futures Rule 71.3 with respect to an OTC Participant and apply to OTC Participants:

- the OTC Participant is in breach of the rules of any recognised, designated or overseas investment exchange or clearinghouse;

- (b) the OTC Participant fails to pay any sum due and payable, or is otherwise in default under the terms of any agreement or threatens to suspend payment or to default under the terms of any agreement;

- (d) the OTC Participant breaches any conditions prescribed by ASX Clear (Futures) on its admission as a Clearing Participant or on its authorisation as an OTC Participant;

- (f) the OTC Participant:
 - (i) is dissolved (other than pursuant to a consolidation, amalgamation or merger);

 - (B) has instituted against it a proceeding seeking a judgment of insolvency or bankruptcy or any other relief under any bankruptcy or insolvency law or other similar law affecting creditors' rights, or a petition is presented for its winding-up or liquidation, and such proceeding or petition is instituted or presented by a person or entity not described in clause (A) above and either (1) results in a judgment of insolvency or bankruptcy or the entry of an order for relief or the making of an order for its winding-up or liquidation or (2) is not dismissed, discharged, stayed or restrained in each case within 15 days of the institution or presentation thereof;
 - (v) has a resolution passed for its winding-up, official management or liquidation (other than pursuant to a consolidation, amalgamation or merger);

- (viii) causes or is subject to any of the events specified in clauses (i) to (vii) above (inclusive); or
- (ix) takes any action in furtherance of, or indicating its consent to, approval of, or acquiescence in, any of the foregoing acts.

6.5 Terminable Open Contracts

ASX Clear (Futures) may, from time to time, notify OTC Participants of classes of Open Contracts (other than OTC Open Contracts) that may be Terminated pursuant to OTC Rule 6.6 (Termination and Terminated Open Contracts). Open Contracts (other than OTC Open Contracts) of such classes are referred to as **Terminable Open Contracts**.

6.6 Termination and Terminated Open Contracts

The powers of ASX Clear (Futures) set out in Futures Rules 72 (Powers of ASX Clear (Futures) Upon A Default and Determination of a Loss) apply to OTC Participants.

By way of supplement, and not by limitation, if an OTC Participant is in Default then ASX Clear (Futures) can declare that the obligations of the OTC Participant and ASX Clear (Futures) under:

- (a) OTC Open Contracts; and
- (b) other Terminable Open Contracts,

to be the subject of a **Termination** and the time at which such Termination is to be effective (referred to as the **Termination Time**). The Open Contracts (whether OTC Open Contracts or Terminable Open Contracts) which are the subject of such a declaration are referred to as **Terminated Open Contracts**.

If ASX Clear (Futures) makes such a declaration then the present and future obligations of ASX Clear (Futures) and the OTC Participant to make payments under the terms of the Terminated Open Contracts (including payments of OTC Variation Margin and Variation Margin) are terminated and the payments are no longer required to be made.

6.7 Termination Value

ASX Clear (Futures) may, at any time, calculate a **Termination Value** in respect of one or more Terminated Open Contracts as selected by ASX Clear (Futures).

Without limiting the factors which ASX Clear (Futures) may take into account in determining such Termination Value, it may take into account its determination of:

- (a) the value of obligations which fell due in connection with the Terminated Transaction(s) (including payment of OTC Daily Variation Margin and/or

Variation Margin) before the Termination Time but which have not been performed;

- (b) the value of obligations which would have been due for performance under the Terminated Transactions after the Termination Time if the Terminated Transaction(s) had not been Terminated (including payment of OTC Daily Variation Margin and/or Variation Margin); and
- (c) its losses, costs, charges and expenses in connection with the Default Management Process with respect to the Terminated Transaction(s) including, without limitation, DM Hedging Transaction Costs and amounts payable by it in respect of the DM Auctions.

ASX Clear (Futures) may include the amount of interest in any or all of (a), (b) and (c), calculated in a manner consistent with OTC Rule 8.3 (Interest on overdue amounts).

ASX Clear (Futures) may include a Termination Value calculated by it in any netting conducted in accordance with Futures Rule 72.3.

ASX Clear (Futures)' determination of a Termination Value is conclusive, but does not limit any of its rights under these OTC Rules, the Futures Rules or at law.

6.8 Application of OTC Initial Margin and all other amounts

In addition to any other rights which ASX Clear (Futures) has in connection with the Default of an OTC Participant, ASX Clear (Futures) may apply or appropriate any amount of OTC Initial Margin, OTC Intra-day Margin or OTC Extra Margin or any other amount standing to the credit of the OTC Participant, and any other amount held by ASX Clear (Futures) in respect of the OTC Participant, towards the payment or discharge of the amounts payable by the Defaulted OTC Participant.

Without limitation, ASX Clear (Futures) may:

- (a) receive any dividends, interest or other income payable in respect of that OTC Initial Margin and do anything else in relation to that OTC Initial Margin that an owner of that OTC Initial Margin could do;
- (b) register all or part of the OTC Initial Margin in the name of ASX Clear (Futures) or its nominee;
- (c) deal with all or part of the OTC Initial Margin in the same way as the holder or owner of the OTC Initial Margin could if the OTC Initial Margin were not secured in favour of ASX Clear (Futures);
- (d) sell all or part of the OTC Initial Margin whether by public auction and/or private arrangement and whether on-market or off-market;
- (e) allow the purchaser of any OTC Initial Margin time for payment of all or part of the purchase money;
- (f) appoint a receiver or receiver and manager to the OTC Initial Margin (which is to be the agent of the OTC Participant) to do any of the things referred to in (a) to (e) above; and
- (g) do anything which ASX Clear (Futures) considers necessary for any of these purposes.

For this purpose, ASX Clear (Futures) may put into force and exercise immediately or as and when it may see fit, without further demand for payment, notice to any person, advertisement or other formality (all of which are waived by each OTC Participant), any and every right, remedy and power possessed by ASX Clear (Futures) by virtue of these OTC Rules, the Futures Rules or available to a secured creditor.

Without limiting this, if ASX Clear (Futures) exercises a power of sale, the timing of such sale is to be made in ASX Clear (Futures) absolute discretion and ASX Clear (Futures) may take into account the size, amount, liquidity and such other factors in respect of the OTC Initial Margin as ASX Clear (Futures) in its absolute discretion thinks fit and may sell OTC Initial Margin over such period and by such method as it in its absolute discretion thinks fit. Neither ASX Clear (Futures) nor any receiver is liable to account as a mortgagee in possession.

If ASX Clear (Futures) takes any action under this OTC Rule 6.8 or exercises any other remedy available to it, the OTC Participant is liable to ASX Clear (Futures) for any and all costs, losses penalties, fines, taxes and damages which ASX Clear (Futures) may incur, including reasonable legal fees incurred in connection with such action or remedies and the recovery of any such costs, losses, penalties, fines, taxes and damages.

Any disposal of any OTC Initial Margin by or on behalf of ASX Clear (Futures) or any receiver is not open to challenge for any reason (including any ground that ASX Clear (Futures) was not entitled to dispose of the OTC Initial Margin or that the OTC Participant did not receive notice of the intended disposal or that the OTC Initial Margin was sold at a price which the OTC Participant considered unacceptable). A person who acquires the OTC Initial Margin need not check whether ASX Clear (Futures) had the right to dispose of the OTC Initial Margin or whether ASX Clear (Futures) is exercising that right properly.

6.9 Power of attorney

Each OTC Participant irrevocably appoints ASX Clear (Futures) as its attorney to, if the OTC Participant has Defaulted, execute any such transfers, powers, assurances or other documents and do such other acts for the purpose of perfecting or enforcing ASX Clear (Futures) rights under these OTC Rules and the Futures Rules. Each OTC Participant ratifies and confirms and agrees to ratify and confirm whatever ASX Clear (Futures), as its attorney, shall do in the exercise or purported exercise of the power of attorney granted by this OTC Rule 6.9.

6.10 Information Sharing

ASX Clear (Futures) may co-operate, by the sharing of information or otherwise, with any regulatory body or exchange, any relevant office-holder acting in relation to a Defaulted OTC Participant or its estate and any other authority or body having responsibility for, or any OTC Participant having an interest in, any matter arising out of or connected with the circumstances mentioned in these OTC Rules.

6.11 Advice and Assistance

Without prejudice to any other OTC Rule, if an OTC Participant is in Default, ASX Clear (Futures) may obtain such assistance or advice, whether legal advice or otherwise, as ASX Clear (Futures) may deem necessary and at the expense of a Defaulted OTC Participant for any matter arising out of or in connection with the Default of that OTC Participant.

6.12 Indemnity Upon Default

Each Defaulted OTC Participant will indemnify on an after tax basis ASX Clear (Futures) and its officers, representatives, agents and contractors against all and any proceedings, losses, costs, claims, damages, liabilities, expenses, charges, actions or demands and any other amounts including any transaction taxes, goods and services taxes or any other duties or taxes (extending to include any taxes payable by ASX Clear (Futures) on a payment made under this indemnity) which ASX Clear (Futures), its officers, representatives, agents or contractors may incur or which may be made against ASX Clear (Futures) in connection with a Default or any action taken by, or any inaction by, any of ASX Clear or its officers, representatives, agents or contractors under this OTC Rule 6, for such Default, action or inaction.

The rights, powers and remedies of ASX Clear (Futures) under this OTC Rule 6.12 in relation to an OTC Participant survive its termination, suspension or resignation as a Clearing Participant or termination of its authorisation as an OTC Participant in respect of a class or category of OTC Transaction.

7 EMERGENCIES AND FORCE MAJEURE

7.1 Signpost to related Futures Rules

Part 8 (Emergency situations and force majeure) of the Futures Rules is applicable to OTC Clearing.

8 MISCELLANEOUS

8.1 Signpost to related Futures Rules

These OTC Rules relate to matters addressed in Part 9 (Miscellaneous) of the Futures Rules. Futures Rules 95 (Prescriptions and Schedules), 96 (Notification to the Exchange) and 102 (Compulsory Settlement) do not apply to OTC Clearing. However, all of the other Futures Rules in Part 9 apply, where relevant.

In addition the following OTC Rules apply.

8.2 Payments by OTC Participants

Each payment made by an OTC Participant under these OTC Rules or the OTC Handbook must:

- (a) transfer all right, title and interest in the amount of money paid to ASX Clear (Futures);
- (b) be in the currency in which it is due and in immediately available and freely transferable funds;
- (c) be made on the due date for value on that date in Sydney;
- (d) be in full without set-off, cross-demand or counterclaim and without any deduction for taxes, levies, imposts, charges or duties (including stamp and transaction duties) imposed by any authority unless prohibited by law. Payments in respect of which such deduction or withholding is required to be made by law, by the OTC Participant, will be increased to the extent necessary to ensure that, after the making of the required deduction or withholding, ASX Clear (Futures) receives and retains (free from any liability in respect of such deduction or withholding) a net sum equal to the sum which it would have received and so retained had no such deduction or withholding been made or required to be made; and

- (e) be made into the House Clearing Account held of that OTC Participant or such other account nominated by ASX Clear (Futures).

However, on each Business Day, ASX Clear Futures may aggregate and/or net any or all payments due between it and an OTC Participant on that day (whether related to OTC Open Contracts, Futures Contracts or otherwise) in the same currency to produce a single net amount which is payable between them in that currency. The obligations which were netted and/or aggregated to produce the single net amount are discharged by its payment.

8.3 Interest on overdue amounts

If the OTC Participant does not pay any amount under these OTC Rules or the OTC Handbook on the due date for payment, the OTC Participant agrees to pay interest on that amount at a rate per annum equal to ASX Clear (Futures)'s cost (without proof or evidence of any actual cost) to ASX Clear (Futures) (as certified by ASX Clear (Futures)) if ASX Clear (Futures) were to fund, or of funding, the relevant amount plus 2% (per annum). The interest accrues daily from (and including) the due date to (but excluding) the date on which ASX Clear (Futures) is paid the amount and is calculated on actual days elapsed and a year of 365 days.

The OTC Participant agrees to pay interest under this clause on demand from ASX Clear (Futures).

8.4 Discretion in exercising rights

ASX Clear (Futures) may exercise a right or remedy or give or refuse its consent under these OTC Rules in any way it considers appropriate (including by imposing conditions).

Any exercise of discretion or other choice by ASX Clear (Futures) under these OTC Rules may be made in the absolute discretion of ASX Clear (Futures) unless these OTC Rules expressly state otherwise.

The rights and remedies of ASX Clear (Futures) under these OTC Rules may be exercised even if ASX Clear (Futures) has a personal interest in their exercise.

8.5 Consents

Each OTC Participant agrees to comply with all conditions in any consent ASX Clear (Futures) gives in connection with these OTC Rules.

8.6 Partial exercising of rights

If ASX Clear (Futures) does not exercise a right or remedy under these OTC Rules fully or at a given time, it may still exercise it later.

8.7 No liability for loss

ASX Clear (Futures) is not liable for loss caused by the exercise or attempted exercise of, failure to exercise, or delay in exercising, a right or remedy under these OTC Rules.

8.8 Remedies cumulative

The rights and remedies of ASX Clear (Futures) under these OTC Rules are in addition to other rights and remedies available under the Futures Rules or given by law independently of these OTC Rules.

8.9 Rights and obligations are unaffected

Rights given to ASX Clear (Futures) under these OTC Rules and each OTC Participant's liabilities under them are not affected by anything which might otherwise affect them at law.

8.10 When ASX Clear (Futures) taken to have performed its obligations

Where an OTC Rule specifies a time by which a party to an OTC Open Contract must perform its obligations or exercise its rights under that OTC Open Contract (including with respect to OTC Variation Margin), ASX Clear (Futures) will be taken to have complied with that OTC Rule if it performs its obligations or exercises its rights as soon as practicable after the time specified, unless the OTC Rule expressly provides that ASX Clear (Futures) must perform or exercise at or before the time specified.

8.11 OTC Participant to have e-mail

A OTC Participant must acquire and maintain an operating e-mail system for the purposes of receiving notices under these OTC Rules.

8.12 Governing law

These OTC Rules are to be interpreted in accordance with the laws of New South Wales.

ASX OTC Rulebook

Schedule 2 – OTC Commitment

This schedule sets out the manner of calculating the OTC Commitments.

1 OTC Commitment

The OTC Commitment for each OTC Participant is comprised of:

- (a) a Fixed OTC Commitment as set out in paragraph 2 (Fixed OTC Commitment) below; and
- (b) a Variable OTC Commitment calculated in the manner set out in paragraph 3 (Variable OTC Commitment) below.

2 Fixed OTC Commitment

The Fixed OTC Commitment of each OTC Participant is five million dollars (\$5,000,000).

3 Variable OTC Commitment

3.1 Variable OTC Commitment Calculations

The following are the calculations (and the terms relevant to them) which are to be performed by ASX Clear (Futures) in order to calculate the Variable OTC Commitment of each OTC Participant in respect of each Quarter:

- | | |
|--|---|
| Quarter: | Each three month period: |
| | (a) starting on 1 March, 1 June, 1 September and 1 December of each year; and |
| | (b) ending on 30 May, 31 August, 30 November and 28 February (or 29 February in a leap year), respectively. |
| Calculation Period: | In respect of a Quarter, the period: |
| | (a) from, and including, the 11 th day of the final month of the Quarter which immediately preceded the immediately preceding Quarter; |
| | (b) to, and including, the 10 th day of the final month of the immediately preceding Quarter. |
| OTC Participant Variable OTC Commitment: | For an OTC Participant in respect of a Quarter is equal to: |
| | (a) the Aggregate Variable OTC Commitment |
| | <i>multiplied by</i> |

	(b) that OTC Participant's Variable OTC Commitment Proportion,
	each in respect of the relevant Calculation Period.
Aggregate Variable OTC Commitment:	For a Calculation Period, is equal to the greater of zero and:
	(a) the Aggregate OTC Commitment
	<i>minus</i>
	(b) the Aggregate Fixed OTC Commitment.
Aggregate OTC Commitment:	One hundred million dollars (\$100,000,000).
Aggregate Fixed OTC Commitment:	For a Calculation Period, is equal to the total Fixed OTC Commitment received by ASX Clear (Futures).
Variable OTC Commitment Proportion	For an OTC Participant in respect of a Calculation Period is equal to (expressed as a percentage):
	(a) the Daily Average Initial Margin of that OTC Participant
	<i>divided by</i>
	(b) the Aggregate Daily Average Initial Margin,
	each in respect of that Calculation Period.
Aggregate Daily Average Initial Margin	For a Calculation Period, the sum of the Daily Average Initial Margin for all OTC Participants for that Calculation Period:
	(a) <i>excluding</i> the Daily Average Initial Margin of any OTC Participant which is not to have a Variable OTC Commitment at the commencement of the Quarter related to that Calculation Period; and
	(b) <i>including</i> ASX Clear (Futures)' estimation of the Daily Average Initial Margin of each entity which will be an OTC Participant as at the commencement of the Quarter related to that Calculation Period.
Daily Average Initial Margin	For an OTC Participant in respect of a Calculation Period is equal to:
	(a) sum of that OTC Participant's OTC Initial Margin on each Business Day in that Calculation Period
	<i>divided by</i>
	(b) the number of Business Days in that Calculation Period.

Rounding: Each OTC Variable Commitment will be rounded to the nearest multiple of ten thousand dollars on the basis that an amount of \$5,000 and above is rounded up and an amount of \$4,999.99 down *provided that* the rounding must ensure that ASX Clear (Futures) has exactly the Aggregate Variable OTC Commitment required.

3.2 Timing of Variable OTC Commitment Calculations

The Variable OTC Commitment for each OTC Participant will be calculated by ASX Clear (Futures) so as to take effect from the first day of each Quarter (as of midnight on the last day of the immediately preceding Quarter).

ASX Clear (Futures) will notify each OTC Participant of its Variable OTC Commitment for a Quarter before the close of business of the seventeenth day of the final month of the previous Quarter (or, if that day is not a Business Day, the next following Business Day).

Each OTC Participant must complete any adjustments to its Variable OTC Commitment for a new Quarter before 10.30am (Sydney time) on the second last Business Day of the previous Quarter.

If an OTC Participant's Variable OTC Commitment ceases on a day other than the first day of a Quarter then it is at ASX Clear (Futures)' discretion as to the date when the OTC Variable OTC Commitments of all OTC Participants should be adjusted.

4 Transitional Requirements

The calculations in this Schedule 2 are subject to any transitional arrangements set out in the OTC Handbook.

5 New OTC Participants

The calculation of the Variable OTC Commitment for an OTC Participant not previously included in the quarterly recalculation (referred to as **New OTC Participant**) will be estimated by ASX Clear (Futures). Any estimates by ASX Clear (Futures) will be final and not be open to dispute. ASX Clear (Futures) may take into account any of the factors included in clauses 10.1, 10.2, 10.3 and 10A of Schedule 10 of the Futures Rules, but is not required to do so nor limited to these factors. For the purposes of those clauses, 'New Clearing Participant' is taken to refer to a New OTC Participant, and 'Variable Commitment' is taken to refer to Variable OTC Commitment.

The amount of an OTC Participant's Variable OTC Commitment held by ASX Clear (Futures) may exceed the amount as determined in accordance with paragraph 3.1 above in circumstances where an OTC Participant is admitted at a time other than the beginning of a Quarter.

1 Default Management Groups

1.1 Establishment of Default Management Groups

ASX Clear (Futures) will establish default management groups (each referred to as a **DMG**) for the purpose of advising and assisting ASX Clear (Futures) with respect to all DMG Matters (as defined below).

1.2 DMG Procedures

Each DMG is governed by the terms set out in the default management group procedures as scheduled to the OTC Handbook (referred to as the **DMG Procedures**) from time to time. The DMG Procedures as at a particular time form part of the OTC Handbook at that time.

1.3 Participating DMG Member Institutions

ASX Clear (Futures) will inform each OTC Participant selected to participate in a DMG (referred to as a **Participating DMG Member Institutions**) at least three months before to the establishment of the relevant DMG. Participating DMG Members must comply with the duties and responsibilities set out in the OTC Rules and the DMG Procedures.

1.4 Liquidation Groups

A DMG will be established with respect to one or more groups of OTC Open Contracts (and OTC Allocated Futures Contracts, if applicable) cleared pursuant to the OTC Rules and relating to one or more OTC Transaction Types, as determined by ASX Clear (Futures) (each referred to as a **Liquidation Group**).

1.5 DMG Matters

ASX Clear (Futures) may choose to convene a meeting of one or more DMGs in any of the following circumstances:

- (a) upon the occurrence of a Default;
- (b) upon the occurrence of a Termination;
- (c) for OTC Default Simulations (as defined in Paragraph 4 (OTC Default Simulations) below); or
- (d) to obtain advice on any of the following matters (referred to as **DMG Matters**) as thought appropriate by ASX Clear (Futures):
 - (i) the establishment of DM Hedging Transactions in accordance with Paragraph 2 (DM Hedging Transactions), including the selection of the relevant counterparties and the relevant hedging terms and strategy, and the assistance in the execution of DM Hedging Transactions;

- (ii) the holding of one or more DM Auctions pursuant to (and as defined under) Paragraph 3 (Establishment of OTC Open Contracts), including the timing, the procedures and the terms and conditions of a DM Auction;
- (iii) the creation of OTC Open Contracts by way of independent trades pursuant to Paragraph 3 (Establishment of OTC Open Contracts); and
- (iv) any further matters relating to the consequences and risks of a Default or Termination.

In any case, ASX Clear (Futures) will convene a DMG Meeting (in accordance with the OTC Handbook) of the DMG for the Liquidation Group applicable to each OTC Open Contract which is the subject of a Termination.

1.6 Role of DMG

Each DMG will advise, assist and make proposals to ASX Clear (Futures) with respect to the relevant DMG Matters. ASX Clear (Futures) will at all times maintain the ultimate decision on whether and under what terms and conditions the DMG proposals are implemented or not.

1.7 DMG Members

The members of a DMG (referred to as the **DMG Members**) are appointed in accordance with the DMG Procedures. The DMG Members remain employees of their DMG Member Institution and do not, by being a DMG Member, become employees, officers or representatives of ASX Clear (Futures).

Whenever a DMG Member assists ASX Clear (Futures) in the execution of DM Hedging Transactions or other legal declarations, such DMG Member will not have the rights of, or be deemed to be, an attorney or agent of ASX Clear (Futures).

Each OTC Participant accepts that:

- (a) representatives of Participating DMG Member Institutions serving on the DMG are doing so in order to assist ASX Clear (Futures) in ensuring the on-going integrity of the clearing facility for over-the-counter derivatives provided by ASX Clear (Futures); and
- (b) representatives of Participating DMG Member Institutions serving on the DMG and their employers will have no liability for disinterested advice or actions, mandated or otherwise, that are undertaken as part of the default management process. However, nothing in this Paragraph 1.7 (DMG Members) will exclude the liability of such representatives and employers for any personal injury or death caused by their negligence or for any fraud or wilful default on the part of such representatives and employers.

1.8 ASX Clear (Futures) dealings with DMG

ASX Clear (Futures) agrees that, in exercising its rights and obligations in consulting with the DMG pursuant to these DMG Procedures and the OTC Handbook, it will use all reasonable commercial endeavours to agree a common position with the DMG, provided that nothing in the OTC Rules or the OTC Handbook will prevent ASX Clear (Futures) acting in a way which it reasonably determines necessary to manage its risk or otherwise meet its continuing regulatory obligations including those applicable to it as a CS facility licensee.

2 DM Hedging Transactions

At any time after an OTC Participant Defaults, ASX Clear (Futures) may in its discretion enter into transactions in order to hedge the effects of the Termination of one or more OTC Open Contracts and other Terminable Open Contracts which has occurred or which may occur as a result of the OTC Participant's Default (each of these transactions are referred to as a **DM Hedging Transaction**).

DM Hedging Transactions may be of any OTC Transaction Type or class of Terminable Open Contract of a Defaulting OTC Participant. The costs and expenses incurred in connection with the entry into DM Hedging Transactions are referred to as **DM Hedging Transaction Costs**.

ASX Clear (Futures) may request one or more Participating DMG Members (as defined in the OTC Handbook) of a DMG to assist ASX Clear (Futures) in the execution of DM Hedging Transactions.

ASX Clear (Futures) will at all times maintain the ultimate decision on whether or not and under what terms and conditions a DM Hedging Transaction is executed or not.

However, nothing in this Paragraph 2 (DM Hedging Transactions) restricts ASX Clear (Futures) entering into hedging or replacement transactions in the normal course of its business.

3 Establishment of OTC Open Contracts

3.1 Independent trades, DM Auctions and DM Auction Transactions

At any time after the Termination Time (with respect to the relevant Defaulted OTC Participant), ASX Clear (Futures) may in its discretion:

- (a) enter into independent trades to establish new OTC Open Contracts or other Open Contracts equivalent to the Terminated Open Contracts which were subject to Termination and/or reciprocal to DM Hedging Transactions, as deemed appropriate by ASX Clear (Futures) in consultation with the relevant DMG(s); and/or
- (b) if it is deemed appropriate by ASX Clear (Futures) in consultation with the relevant DMG(s), conduct one or more auctions with respect to one or several Liquidation Groups (in whole or in part), as deemed appropriate by ASX Clear (Futures) in consultation with the relevant DMG(s) (each referred to as a **DM Auction**) to establish new OTC Open Contracts or other Open Contracts specified by ASX Clear (Futures) which are – taken as a whole – equivalent to the Terminated Open Contracts of the Defaulted OTC Participant which were subject to Termination and/or the DM Hedging Transactions (each a **DM Auction Transaction**).

However, before a DM Auction, ASX Clear (Futures) will enter into independent trades pursuant to (a) above against a recommendation of the relevant DMG(s) only if the entering into such trades does not result in an application of the Commitment of the OTC Participants other than the Defaulted OTC Participant in accordance with Part 7 (Procedures on a Default) of the Futures Rules and if the terms and conditions of the resulting Open Contracts are fixed prior to entering into the respective trades.

3.2 DM Auction Procedures and Auction Units

DM Auctions are governed by the procedures set out in the default management auctions procedures, as scheduled to the OTC Handbook (referred to as the **DM Auction Procedures**) from time to time. DM Auctions will be conducted with regard to identically composed units of DM Auction Transactions of each Liquidation Group (or, in consultation with the relevant DMG(s), parts of each Liquidation Group), as specified by ASX Clear (Futures) for each DM Auction after consultation with the relevant DMG(s) (each referred to as an **Auction Unit**).

3.3 Mandatory OTC Participants

OTC Participants:

- (a) authorised to act as OTC Participants with respect to all DM Auction Transactions that are OTC Open Contracts comprised in the relevant Auction Unit;
- (b) having the necessary account structure to settle all DM Auction Transactions comprised in the relevant Auction Unit;
- (c) which, at the time of default of the relevant Defaulted OTC Participant, have at least one OTC Open Contract of each relevant Liquidation Group; and
- (d) with respect to which no Default has occurred and is continuing,

(each referred to as a **Mandatory OTC Participant**), must participate in DM Auctions in accordance with the DM Auction Procedures.

However, ASX Clear (Futures) may, in its sole discretion, waive the requirement that a Mandatory OTC Participant participate in a DM Auction related to such Mandatory OTC Participant.

4 OTC Default Simulations

ASX Clear (Futures) will arrange for at least one and no more than three default simulations per year to ensure the best practicable level of preparation for any Default of an OTC Participant (each referred to as an **OTC Default Simulation**). The OTC Participants will support ASX Clear (Futures) in carrying out any such OTC Default Simulation.

Upon request of ASX Clear (Futures), each OTC Participant will in the course of such OTC Default Simulations act as potential counterparty for a simulated DM Hedging Transaction and will support any simulated DM Auction, as further described in the DM Auction Procedures, with respect to the Liquidation Groups that such OTC Participant is active in.

5 Information Regarding Default Management Process

Whenever the default management process implemented by ASX Clear (Futures) in respect of a Defaulted OTC Participant, ASX Clear (Futures) will endeavour, in consultation with each relevant DMG, to keep OTC Participants reasonably informed of the progress of the default management process.

Nothing in this Paragraph 5 will require ASX Clear (Futures) to disclose information in respect of the default management process which, in the reasonable opinion of ASX Clear (Futures), may be subject to obligations of

confidentiality, may constitute market sensitive data or is, in the opinion of ASX Clear (Futures), inappropriate for disclosure to OTC Participants.

1.2 Futures Rules and OTC Rules

This handbook refers to the Operating Rules of ASX Clear (Futures) (which are referred to as the **Futures Rules**) and the ASX Clear OTC Operating Rules set out in the ASX OTC Rulebook (which are referred to as the **OTC Rules**).

However, the OTC Handbook does not form part of the OTC Rules or the Futures Rules. The OTC Rules prevail in the event of any inconsistency between those OTC Rules and this OTC Handbook.

1.3 Meanings of terms

Unless they are defined in this OTC Handbook, capitalised terms used in this OTC Handbook have the meaning which they have in the OTC Rules or, if they are not defined in the OTC Rules, in the Futures Rules.

1.4 Approved Trade Source Systems

The following are **Approved Trade Source Systems**:

- MarkitWire

If ASX Clear (Futures) approves additional Approved Trade Source Systems, it will notify OTC Participants.

ASX Clear (Futures) is not liable for any corruption or alteration of messages or loss of data which may take place within any Approved Trade Source System.

ASX Clear (Futures) makes no warranty (and accepts no liability) as to the effectiveness or performance or any other aspect or matter in connection with an Approved Trade Source System.

1.5 OTC Terms and OTC Transaction Types

The terms of OTC Open Contracts (referred to as **OTC Terms**) and the OTC Transaction Types are set out in Schedule 2 (OTC Terms).

1.6 Operating times and calendars

ASX Clear (Futures) will publish a circular detailing the days on which the OTC Clearing service will be open.

ASX Clear (Futures) OTC Clearing service will be operational during the following hours: 6:00am to 9:00pm Sydney time.

1.8 Number

In this OTC Handbook, the singular includes the plural and the plural includes the singular.

1.9 Headings

Headings (including those in brackets at the beginning of paragraphs) in this OTC Handbook are for convenience only and do not affect the interpretation of this OTC Handbook.

2 PARTICIPATION AND GENERAL

2.3 Conditions to become an OTC Participant

If a Clearing Participant who applies to be an OTC Participant is not a Futures Participant, then it must have in place arrangements (which may not be withdrawn without ASX Clear (Futures)'s consent) for a Futures Participant to clear Market Contracts which the applicant acquires in any DM Auction. The applicant must provide evidence of these arrangements to ASX Clear (Futures) in form and substance satisfactory to ASX Clear (Futures).

2.4 Application to be an OTC Participant

An applicant intending to become an OTC Participant must provide such legal opinions in respect of the enforceability of the OTC Rules, this OTC Handbook and, if necessary, the Futures Rules against it as ASX Clear (Futures) requires.

2.6 Fees and OTC Commitment

The fees applicable to becoming an OTC Participant are as published by ASX Clear (Futures) from time to time.

2.14 OTC Product Committees

An OTC Product Committee will be established if there are at least three (3) OTC Participants willing to participate in the committee.

The OTC Product Committee is established for the purpose of consulting with ASX Clear (Futures) on:

- (a) the types of OTC Transactions which are eligible for OTC Clearing;
- (b) material amendments to the OTC Terms; and
- (c) such other matters as ASX Clear (Futures) determines.

The Procedures of the OTC Product Committee are set out in Schedule 5 (Procedures for the OTC Product Committee).

Proposals and recommendations of the OTC Product Committee will be disclosed to the Board. ASX Clear (Futures) does not have any obligation to accept any proposal or recommendation made by, or take any action proposed by, the OTC Product Committee. However, ASX Clear (Futures) will provide reasons to the OTC Product Committee if it chooses not to follow any proposal or recommendation of the OTC Product Committee prior to taking, or not taking, any action.

3 COMMITMENTS AND FINANCIAL REQUIREMENTS

3.2 OTC Commitment

Until the date as determined by ASX Clear (Futures) ("**Transitional Period End Date**"), the Aggregate OTC Commitment during the Transitional Period (as defined below) is to be calculated as follows:

Aggregate OTC Commitment:	In respect of each Quarter, equal to the lesser of:
	(a) \$100,000,000; and

- (b) the number of OTC Participants as at the first date of that Quarter *multiplied by* \$12,500,000.

ASX Clear (Futures) will determine the Transitional Period End Date when it is satisfied that there is sufficient use of its OTC Clearing Service to warrant an increase in the OTC Commitment. In making its determination, ASX Clear (Futures) will notify and consult with the Risk Committee with respect to its proposed determination.

3.3 Financial requirements of OTC Participants

An OTC Participant must:

- (a) have:
 - (i) if it is regulated by APRA, a minimum Tier 1 capital of \$50,000,000; or
 - (ii) otherwise, a minimum level of Net Tangible Assets equal to \$50,000,000. For this purpose, Net Tangible Assets has the same meaning as it has in the Futures Rules; and
- (b) lodge with ASX Clear (Futures) the following financial information:
 - (i) if it is regulated by APRA, a quarterly capital statement of its Tier 1 capital; or
 - (ii) otherwise, the financial information required of a Futures Participant in accordance with the Futures Rules.

4 REGISTRATION

4.3 Submission of OTC Transactions

OTC Transactions must be submitted for registration using an Approved Trade Source System.

OTC Transactions submitted through an Approved Trade Source System must be in an acceptable message format, as prescribed by ASX Clear (Futures) from time to time.

The Approved Trade Source System will send details of the OTC Transaction to ASX Clear (Futures) once it has been bilaterally agreed by two OTC Participants.

Consent is taken to have been obtained from the OTC Participants with whom the OTC Open Contracts would be created when the relevant OTC Transaction is reported to ASX Clear (Futures) by an Approved Trade Source System.

ASX Clear (Futures) will process any such reported OTC Transaction without making any verification or investigation and, subject to the OTC Rules and the OTC Handbook, will register the OTC Transaction on the basis of the data provided to it by the Approved Trade Source System.

Upon an OTC Transaction being submitted to ASX Clear (Futures) for registration and the satisfaction of the conditions to registration set out in the OTC Rules, ASX Clear (Futures) will respond, after processing, with a message confirming the registration.

OTC Transactions submitted for registration that do not meet the product or other eligibility criteria prescribed from time to time by ASX Clear (Futures) or which contain invalid or incomplete message data will be rejected. If, at any time, ASX Clear (Futures) does not register a trade presented for registration it will send to the originating Approved Trade Source System notification of the rejection.

Submission of registration of OTC Transactions will only occur from 6:00am to 9:00pm (Sydney time) on each Business Day.

4.5 Acceptance for registration

The following are applicable to acceptance of an OTC Transaction for registration:

(a) **OTC Eligibility Criteria**

The OTC Eligibility Criteria are set out in Schedule 1 (OTC Eligibility Criteria).

(b) **Limit checks**

A risk-based limit check per trade will be conducted by ASX Clear (Futures) for each OTC Transaction submitted for registration.

If an OTC Transaction fails to pass the risk-based limit check then the OTC Participant may seek the approval of ASX Clear (Futures) to re-submit the OTC Transaction. ASX Clear (Futures) may choose whether or not to give such approval in its sole discretion and may impose such conditions as it thinks fit on granting any approval. If such approval is given then the OTC Transaction need not pass the risk-based limit check when re-submitted provided it satisfies all other conditions imposed by ASX Clear (Futures).

(c) **Deferral of acceptance**

If ASX Clear (Futures) determines that the intraday calculation of the OTC Initial Margin and OTC Daily Variation Margin required from an OTC Clearing Participant is approaching the OTC Participant's exposure limit then it may defer the registration of an OTC Transaction to which that OTC Clearing Participant is a party.

(d) **Timing of registration of OTC Open Contracts**

If an OTC Transaction satisfies the conditions for registration in OTC Rule 4.5 (Acceptance for Registration), then it is registered as an OTC Contract with effect from the time of receipt of the relevant submission by ASX Clear (Futures).

4.6 Creation of OTC Open Contracts

OTC Open Contracts created by registration of an OTC Transaction are created on the applicable OTC Terms.

Payments of amounts due under an OTC Open Contract on the next scheduled payment date after the date on which registration of the relevant OTC Transaction has taken place are to be effected in accordance with the OTC Terms for the entire calculation period. This also applies if part of the calculation period has already elapsed at the day of registration. However, ASX Clear (Futures) may make a call for OTC Intra Day Margin in respect of an OTC Open Contract on the day of its registration.

- (d) fourth, the Approved Trade Source System will provide an updated Trade Status to the OTC Participants, confirming the removal.

Removal is to take effect from the time that such removal is approved by ASX Clear (Futures).

Such calls may be made at any time during normal ASX operating times for cash settlement on a Business Day. Each OTC Intra-Day Margin call must be met by the OTC Participant within two hours of it being made.

¹ Valuation haircuts are deducted from the market value of the instrument, as defined by ASX Clear (Futures), in all cases

² The settlement day.

If ASX Clear (Futures) determines that the aggregate value of the OTC Initial Margin actually delivered to ASX Clear (Futures) by an OTC Participant is insufficient to provide the cover required in order to fulfil their total margin requirement also taking into account all OTC Transactions which are expected to be registered during the course of the day, ASX Clear (Futures) may require the OTC Member to provide additional OTC Initial Margin.

5.10 OTC Daily Closing Value

ASX Clear (Futures) will in general use its own determination of yield curves to calculate the net present value of each OTC Open Contract. This calculation will be conducted at least once on each Business Day in the determination of the OTC Daily Closing Value.

ASX Clear (Futures) will determine, at its sole discretion, appropriate instruments, maturity points and market prices required for the determination of zero coupon rates, discount factors and implied forward curves rates, as well as any other factors it deems necessary to produce a net present value for any OTC Open Contract or OTC Daily Closing Value.

The yield curves selected will use market prices and rates taken at a point in time determined by ASX at its discretion to reflect local market fair value to OTC Participants.

These calculations by ASX Clear (Futures) are conclusive and final.

³ Valuation haircuts are deducted from the market value of the instrument, as defined by ASX Clear (Futures), in all cases;

⁴ Minimum holding and transaction values apply to face value lodgements of a single expiry in the instrument;

⁵ Treasury Index Bonds are not accepted.

5.11 OTC Daily Variation Margin

ASX Clear (Futures) will determine the OTC Daily Variation Margin in respect of OTC Open Contracts of an OTC Participant following the calculation of the OTC Daily Closing Values for those OTC Open Contracts. ASX Clear (Futures) will charge interest on the cumulative net OTC Daily Variation Margin in respect of all OTC Open Contracts (referred to as **Cumulative Variation Margin**) paid to an OTC Participant and pay interest on Cumulative Variation Margin received from that OTC Participant. The amount of interest (PAI) is calculated and payable for each currency on each Business Day with respect to each OTC Open Contract in accordance with the following formula:

$$PAI = MtM_T \times Rate_T \times D/365$$

where:

"MtM_T" means the amount of Cumulative Variation Margin received from, or payable by, the OTC Participant, as applicable, on the close of business of the day of calculation.

"Rate_T" means such rate published on Reuters page RBA30 (or such other successor page(s) or rates as published by the Reserve Bank of Australia) on the close of business of the day of calculation.

"D" means the actual number of days from (but excluding) the last day on which the PAI is calculated to (and including) the day of calculation.

The 2006 ISDA Definitions (referred to as the **2006 ISDA Definitions**), as published by the International Swaps and Derivatives Association, Inc., are incorporated into these OTC Terms.

Accordingly, terms defined in the 2006 ISDA Definitions have the same meaning when used in these OTC Terms and references to **Articles** means Articles in the ISDA 2006 Definitions.

References in the 2006 ISDA Definitions to a “Swap Transaction” are taken to be references to an “OTC Open Contract” for the purposes of these OTC Terms.

The 2006 ISDA Definitions apply to an OTC Open Contract despite the selection of any other definitions in the data transmitted in the submission of an OTC Transaction for registration.

In the event of an inconsistency between the OTC Rulebook or the OTC Handbook and the 2006 ISDA Definitions, the OTC Rulebook or the OTC Handbook, as the case may be, prevails.

3 DMG Establishment

3.1 DMG Composition Table

ASX Clear (Futures) will maintain a table which lists Liquidation Groups and the number of persons required to participate in a DMG relating to such Liquidation Groups (referred to as a **DMG Composition Table**).

The DMG Composition Table will be updated or adjusted by ASX Clear (Futures) annually for each upcoming DMG term.

3.2 Establishment of DMGs

ASX Clear (Futures) will establish a DMG with respect to each Liquidation Group specified in the DMG Composition Table, provided that there are at least five OTC Participants having OTC Open Contracts relating to such Liquidation Group.

However, ASX Clear (Futures) may, in its discretion, decide not to establish a DMG with respect to a Liquidation Group which does not have a substantial size.

4 Selection of Participating DMG Member Institutions

4.1 Participating DMG Member Institution

ASX Clear (Futures) will select the OTC Participants entitled to nominate a DMG Member (each referred to as a **Participating DMG Member Institution**) in accordance with this DMG Paragraph 4 (Selection of Participating DMG Member Institutions).

4.2 Applicable List

With respect to each DMG and the relevant DMG term, ASX Clear (Futures) will compile a list of eligible Participating DMG Member Institutions according to and ordered by the time when such eligible Participating DMG Member Institutions became OTC Participants (each referred to as an **Applicable List**). The applicable number of OTC Participants of each Applicable List will automatically qualify as Participating DMG Member Institutions for the relevant DMG in the order of appearance on the Applicable List, unless ASX Clear (Futures) determines, in its reasonable opinion, that there is a good reason for excluding a qualifying OTC Participant.

4.3 Substitution

Each Participating DMG Member Institution may arrange for another OTC Participant to perform its default management functions. Any such entity performing must be acceptable to ASX Clear (Futures) (in its sole discretion) and comply with the conditions imposed by ASX Clear (Futures) including signing the Agreement for the Participation in a Default Management Group in the form provided by ASX Clear (Futures) from time to time. Upon doing so the relevant OTC Participant will cease to be a Participating DMG Member Institution and, on acceptance by ASX Clear (Futures), the substitute is taken to be a Participating DMG Member Institution.

- (a) an individual as a potential DMG Member (referred to as the **Designated DMG Member**); and
- (b) another individual as a potential deputy (referred to as the **Designated DMG Deputy**),

for the DMG term of the relevant DMG by notifying ASX Clear (Futures) in writing or by fax of the identities and contact information (including personal telephone number and email address) of the nominated individuals (referred to as the **Designation Notice**).

If ASX Clear (Futures) does not receive the Designation Notice by the time set out above then the relevant Participating DMG Member Institution will cease to be a Participating DMG Member Institution. Another OTC Participant will be selected by ASX Clear (Futures) in accordance with DMG Paragraph 4 (Selection of Participating DMG Member Institutions) to nominate a Designated DMG Member and a Designated DMG Deputy for the DMG term of the relevant DMG. ASX Clear (Futures) will notify the relevant Participating DMG Member Institution of its failure to receive the Designation Notice.

⁶ Will not apply for initial DMG appointments on go-live date.

5.2 DMG Member Undertaking

ASX Clear (Futures) will prepare and provide to each Designated DMG Member and Designated DMG Deputy a form of letter under which a Designated DMG Member or Designated DMG Deputy acknowledge and agree to its respective rights and responsibilities as described in these DMG Procedures.

The Participating DMG Member Institution will ensure that both the Designated DMG Member and the Designated DMG Deputy return the letter completed and duly executed, by the earlier of:

- (a) five Business Days after becoming a Designated DMG Member or a Designated DMG Deputy; and
- (b) the last Business Day prior to the commencement of the relevant DMG term (referred to as the **Designation Cut-Off Time**).

Failure by a Designated DMG Member or a Designated DMG Deputy to return a properly completed and executed letter by the Designated Cut-Off Time will result in the relevant Designated DMG Member or a Designated DMG Deputy ceasing to be a Designated DMG Member or a Designated DMG Deputy. In this circumstance, ASX Clear (Futures) will request the Participating DMG Member Institution to nominate a new DMG Member or DMG Deputy in accordance with this DMG Paragraph 5 (Designated DMG Members).

5.3 DMG Eligibility Criteria

Each Designated DMG Member and Designated DMG Deputy must satisfy the following eligibility criteria (referred to as the **DMG Eligibility Criteria**) evidenced by adequate information provided by the relevant Participating DMG Member Institution to ASX Clear (Futures):

- (b) the designated individual must be qualified with respect to the relevant Liquidation Group and must have appropriate expertise and experience in relation to the relevant DMG Matters;
- (c) the designated individual is not already a DMG Member or DMG Deputy in a DMG or a similar committee of another central counterparty, clearinghouse or exchange;
- (d) the designated individual will not be subject to conflicts of interest following its acceptance as a DMG Member or DMG Deputy and will not be unable to act as DMG Member or DMG Deputy for any other reason; and

6 Acceptance by ASX Clear (Futures)

6.1 Assessment

Where these DMG Procedures refer to a DMG Member, such reference will also or only refer to the DMG Deputy if and to the extent the context so requires.

6.3 Rejection

ASX Clear (Futures) will only reject a Designated DMG Member or a Designated DMG Deputy if the Designated DMG Member or the Designated DMG Deputy does not satisfy the DMG Eligibility Criteria. ASX Clear (Futures) will notify the relevant Participating DMG Member Institution of such rejection and provide written reasons.

Upon a rejection of a Designated DMG Member and/or a Designated DMG Deputy by ASX Clear (Futures), the relevant Participating DMG Member Institution may nominate a second individual as Designated DMG Member or Designated DMG Deputy, as the case may be, in accordance with DMG Paragraph 5 (Designated DMG Members).

Schedule 4 – Default Management Auction Procedures

1 DM Auction Procedures

Each DM Auction is governed by these default management auction procedures (referred to as the **General DM Auction Procedures**), as supplemented by specific auction terms (referred to as the **Specific DM Auction Terms**), which will be substantially in the form of the annex to this Schedule. The General DM Auction Procedures and the Specific DM Auction Terms are together referred to as the **DM Auction Procedures**.

2 Definitions

Terms used and not otherwise defined in the DM Auction Procedures will have the meaning given to them in the OTC Rules (including the Default Management Process).

Paragraphs of these DM Auction Procedures are referred to as DM Auction Paragraphs.

3 DM Auctions and DM Auctions Price

DM Auctions will enable the bidders participating in accordance with the DM Auction Procedures to enter into the DM Auction Transactions comprised in the relevant Auction Units with ASX Clear (Futures) at an auction price for the relevant Auction Unit determined in accordance with these DM Auction Procedures (the price for an Auction Unit in each case is referred to as an **Auction Price**).

ASX Clear (Futures) will, after consultation with the relevant DMG(s), specify in the Specific Terms for each DM Auction the relevant Auction Units, and the total number of Auction Units, to be auctioned in the relevant DM Auction.

4 Participation in DM Auctions

4.1 Participating Bidders

Each Mandatory OTC Participant which is obliged to participate in the relevant DM Auction in accordance with the Default Management Process may:

- (a) either itself; or
- (b) arrange for another OTC Participant in its place,

make a submission of a Bid (as defined below) with regard to a specific Auction Unit, such bidder referred to as a **Participating Bidder**.

4.2 Disclosure

A Mandatory OTC Participant may not disclose the Specific DM Auction Terms and/or any additional information with respect to any DM Auction.

5 Pre-Auction Procedures

5.1 DM Auction Invitees

For each DM Auction ASX Clear (Futures) will provide all Mandatory OTC Participants (each referred to as a **DM Auction Invitee**) with the Specific DM Auction Terms and with any further relevant information relating to the DM Auction.

The distribution of the Specific DM Auction Terms constitutes an invitation of ASX Clear (Futures) to the DM Auction Invitees to submit a Bid to enter into each of the DM Auction Transactions comprised in the relevant Auction Unit with ASX Clear (Futures) at the Auction Price.

5.2 Auction Units

In addition, ASX Clear (Futures) will specify in the Specific DM Auction Terms or by email for each Mandatory OTC Participant a minimum number of Auction Units for which such individual Mandatory OTC Participant will bid. Such number will depend on the relative exposure of the relevant Mandatory Participant with respect to the relevant Liquidation Group(s), in particular with regard to:

- (a) the number of OTC Open Contracts held by the Mandatory OTC Participant with respect to the relevant Liquidation Group(s);
- (b) the notional amount of OTC Open Contracts held by the Mandatory OTC Participant with respect to the relevant Liquidation Group(s); and
- (c) the risks inherent in the OTC Open Contracts held by the Mandatory OTC Participant with respect to the relevant Liquidation Group(s).

Auction Units can include both OTC Open Contracts and, if applicable, other Open Contracts of the Defaulted OTC Participant.

5.3 Content of Specific DM Auction Terms

The Specific DM Auction Terms will contain:

- (a) the Auction Units (including information regarding the DM Auction Transactions comprised in them);
- (b) the permissible spread between bids for the respective Auction Unit which will equal the margin requirement for this Auction Unit;
- (c) the auction currency;
- (d) the scheduled auction date (referred to as the **Auction Date**) and the commencement time, as of which the respective Bids can be submitted (referred to as the **Commencement Time**);
- (e) the scheduled expiration time by which the respective Bids have to be submitted pursuant to DM Auction Paragraph 6 (Bidding Procedures) by the relevant Mandatory OTC Participant (referred to as the **Expiration Time**);

- (f) the Auction Format (as defined in DM Auction Paragraph 8 (Auction Format) below); and
- (g) the date and time of acceptance of the winning Bids (referred to as the **Acceptance Date** and **Acceptance Time**) and the date and time of settlement of the auction (referred to as the **Settlement Date** and the **Settlement Time**).

5.4 Changes

ASX Clear (Futures) is entitled at any time prior to the Expiration Time to change the Auction Date, Commencement Time, Expiration Time, the Auction Format, or the bidding procedures pursuant to DM Auction Paragraph 6 (Bidding Procedures), or to cancel a DM Auction, in each case by notice, provided that ASX Clear (Futures) will reasonably extend the Expiration Time to allow for the exercise of the revocation right pursuant to DM Auction Paragraph 5.5 (Revocation of Bids) below. ASX Clear (Futures) will inform all Participating Bidders about any such changes.

5.5 Revocation of Bids

If ASX Clear (Futures) amends the Specific DM Auction Terms or any provisions of the General DM Auction Procedures prior to the Expiration Time of a DM Auction and such amendment is, in the reasonable opinion of ASX Clear (Futures), materially prejudicial to any Participating Bidder that has already submitted its Bid(s) before such amendment was announced and became effective, then such Participating Bidder may revoke its Bid(s) in accordance with this DM Auction Paragraph 5.5, provided that a revocation of the respective Bid(s) will only become effective if received by ASX Clear (Futures) prior to the Expiration Time (as amended). Any extension, cancellation, or re-opening of a DM Auction will be deemed not to be materially prejudicial so that a Participating Bidder not revoke its Bid in case of any such change.

6 Bidding Procedures

6.1 Principles

With respect to each DM Auction the following principles will apply:

- (a) each Mandatory OTC Participant is obliged to provide ASX Clear (Futures) with its mandatory bid(s); and
- (b) each Mandatory OTC Participant is permitted to provide ASX Clear (Futures) with a Bid for any further Auction Unit for which it is not obliged to bid.

6.2 Bids and Bidding Periods

Participating Bidders will submit their offered price for each Auction Unit in accordance with the Auction Format (each referred to as a **Bid**) in accordance with DM Auction Paragraph 8 (Auction Format) from, and including, the relevant Commencement Time to, and including, the relevant Expiration Time (referred to as the **Bidding Period**).

6.3 Bids Irrevocable

A Bid constitutes an offer to enter into the DM Auction Transactions comprised in the relevant Auction Unit (as referred to in the Bid in accordance with the Auction

Format) with ASX Clear (Futures) at the Auction Price. Subject to DM Auction Paragraph 5.5 (Revocation of Bids), a Bid will be irrevocable.

6.4 Bids may be Positive or Negative

Bids may be positive or negative. If the Bid is positive, the Participating Bidder will be required to pay the Auction Price to ASX Clear (Futures). If the Bid is negative, ASX Clear (Futures) will be required to pay the Auction Price to the Participating Bidder.

7 Determination of Winning Bid and Auction Price

7.1 Winning Bids

After the Expiration Time, ASX Clear (Futures) will determine the winning Bid for each Auction Unit in accordance with the Auction Format specified in the Specific DM Auction Terms and will inform the winning Participating Bidder on the Acceptance Date and at the Acceptance Time about the acceptance of the respective Bid.

If two or more Participating Bidders enter the same Bid for the same Auction Unit, the winning Bid will be the Bid that was received first by ASX Clear (Futures).

7.2 DM Auction Transactions

Upon acceptance of the winning Bid for an Auction Unit by ASX Clear (Futures), the DM Auction Transactions of such Auction Unit will be established at the Settlement Time on the Settlement Date against payment of the Auction Price for such Auction Unit in accordance with the standard practices of ASX Clear (Futures) between the Participating Bidder and ASX Clear (Futures).

7.3 Notification

ASX Clear (Futures) will inform all Participating Bidders as soon as practically feasible whether their Bid(s) qualified as winning Bid(s) with respect to each Auction Unit.

7.4 Failed Auction

If ASX Clear (Futures) determines that a DM Auction has failed for any reason, ASX Clear (Futures) may reallocate Auction Units and hold a further DM Auction, or take such other action as ASX Clear (Futures) determines in its discretion is appropriate.

7.5 Non-disclosure

ASX Clear (Futures) will not disclose:

- (a) the identity of the Participating Bidder that submitted the winning Bid for an Auction Unit; and/or
- (b) the Auction Price for any Auction Unit of a DM Auction, to any party other than the Participating Bidder who submitted the winning Bid; and/or
- (c) Bids of Participating Bidders to other Participating Bidders.

8 Auction Format

8.1 General

The Specific DM Auction Terms will specify the format of the relevant DM Auction with regard to the content of a Bid, the specific procedures of the bidding and the determination of the winning Bid (referred to as the **Auction Format**).

When conducting a DM Auction in accordance with these DM Auction Procedures, ASX Clear (Futures) will, unless stated otherwise in the Specific DM Auction Terms, apply the Auction Format of a "Standard Auction Format" as described in DM Auction Paragraph 8.3 (Standard Auction Format).

8.2 Reserve Price

The Specific DM Auction Terms may specify that ASX Clear (Futures) can set a reserve price with respect to a DM Auction. If a reserve price so specified is higher than the otherwise winning bid, then despite any other provision of these DM Auction Procedures there is taken to be no winning bid for that DM Auction.

8.3 Standard Auction Format

If the Specific DM Auction Terms specify "Standard Auction Format" as the applicable Auction Format, the following applies:

- (a) all Bids will be made in accordance with the DM Auction Procedures;
- (b) ASX Clear (Futures) will not disclose to the Mandatory OTC Participants which of the two portfolios comprise the DM Auction Transactions and which comprise the opposite transactions. The binding Bid only relates to an Auction Unit;
- (c) subject to DM Paragraph 8.2 (Reserve Price) and acceptance of the winning Bid by ASX Clear (Futures), the highest valid Bid will be the winning Bid with respect to each Auction Unit and such highest Bid will be the Auction Price for the respective Auction Unit; and
- (d) subject to DM Paragraph 8.2 (Reserve Price), ASX Clear (Futures) will accept the winning Bid pursuant to DM Auction Paragraph 7.1 above with respect to each Auction Unit irrespective of whether Bids were submitted for all Auction Units of the respective DM Auction unless ASX Clear (Futures) chooses not to accept any Bids (in which case it may choose to initiate another DM Auction).

9 Settlement of Auction Price

At the Settlement Time on the Settlement Date, the payment of the Auction Price becomes due and payable and will be paid, together with any applicable OTC Variation Margin and/or Variation Margin associated with the successful Bid.

10 Irregularities

All questions as to the validity, form and eligibility (including the time of receipt) of any Bid or revision of it, will be determined by ASX Clear (Futures), which determination will be final and binding.

ASX Clear (Futures) reserves the absolute right to reject at any time any and all Bids that do not comply with these DM Auction Procedures.

ASX Clear (Futures) reserves the absolute right to waive any requirement under the DM Auction Procedures.

ASX Clear (Futures) will be under no duty to give notice to Participating Bidders of any irregularities in Bids.

 - (c) which may readily, unequivocally and irrevocably be applied to support and discharge the financial obligations of ASX Clear (Futures) under Open Contracts, in the event of a Default, in accordance with Rule 7.
- 5.2 Without limiting the generality of Rule 5.1 the Board may determine that the Commitment may be provided in the form of an irrevocable Letter of Credit issued by an Australian Bank or by the provision of securities or other collateral, or in such other form as may be determined by the Board. The Board may prescribe limits on the letters of credit or other securities or collateral which may be provided from any one Bank or other entity.
- 5.3 The Board may in its absolute discretion determine the value of any Commitment provided otherwise than in cash or irrevocable commitment to provide cash for the purpose of determining whether a Clearing Participant has provided a Commitment of an amount which satisfies the provisions of the Rules.
- 5.4 The Board may at any time require a Clearing Participant to alter the form of its Commitment in any way and the Clearing Participant shall effect such alteration forthwith or by such time as the Board requires. A Clearing Participant shall comply with such requirement.

In all other respects this sub-paragraph (ii) applies to BRC Participants.

The amount of the First Level Commitment held by ASX Clear (Futures) may exceed the amount as determined in accordance with the foregoing in circumstances where a Futures Participant is admitted at a time other than the beginning of a new quarter.²

Only Clearing Participants shall be entitled to have Market Contracts registered in their name. (Amended 4/12/02)
- (b) (i) Where a Market Contract is Recorded by the Exchange incorrectly, upon correction of any such Recording in accordance with the Exchange Operating Rules the Market Contract registered shall also be deemed to be corrected and the Rules shall be read as if such Market Contract had originally been registered as corrected. ASX Clear (Futures) shall not be liable to any party as a result of any correction so made.
- (ii) In relation to Bond and Repurchase Clearing, where a Market Contract is recorded by ASX Clear (Futures) incorrectly, upon correction of any such recording the Market Contract registered shall be deemed to be corrected and the Rules shall be read as if such Market Contract had originally been registered as corrected. - (d) Particulars of a Market Contract not Recorded by the Exchange (through failure of the parties to advise particulars of that Contract to the Exchange or otherwise) may subsequently be presented for registration in the Prescribed manner and confirmed to ASX Clear (Futures) by both parties to the Market Contract if they are Clearing Participants (and in the case of a Market Contract in respect of which only the position of one party is to be registered with ASX Clear (Futures), by that Buyer or that Seller as the case may be) or if they are not Clearing Participants, their Guarantor Clearing Participant or Guarantor Clearing Participants and upon the acceptance of such particulars by ASX Clear (Futures) with the approval of the Relevant Exchange the Market Contract shall be registered with ASX Clear (Futures) and these Rules shall apply accordingly. (Amended 4/12/02)

- (i) the holder of the Open Contract; and

- (ii) the proposed holder of the Open Contract (the new holder),

correct such allocation within the Exchange Allocation & Clearing System, and such Open Contract shall be deemed to be held by the new holder of the open position as if the Open Contract had been allocated to the new holder of the Open Contract on the day of the trade, and the Rules shall be deemed to apply to such Open Contract as if such allocation had occurred in accordance with the Rules of the Relevant Exchange. Amounts held in the relevant Clearing Account shall be adjusted accordingly. (Amended 10/12/01)

- 31.2 Notwithstanding Rule 31.1 the Board or Managing Director or a delegate of either may in their absolute discretion at any time prior to registration decline to register a Market Contract in the name of a Clearing Participant or may impose conditions (including the deposit of Margin) on the registration of any Market

31A Registration of a Market Contract Allocated to a Facility Participant

(Added 4/12/02)

- 31A.1 Where a Market Contract is Allocated to a Facility Participant by a Full Participant, the Facility Participant agrees to accept that Market Contract or the position of either a Buyer or a Seller under a Market Contract for registration in accordance with these Rules provided the Full Participant arranges to have its trades registered with the Facility Participant by an entity that is a participant (as that term is defined in the Corporations Act) of the Facility Participant.
- 31A.2 Where the positions of a Buyer and of a Seller under a Market Contract are registered separately with ASX Clear (Futures) and a Facility Participant respectively, upon such registration the Market Contract shall be extinguished and two new contracts which shall be binding on ASX Clear (Futures) and the Facility Participant respectively shall come into existence:
- (a) an Open Contract between ASX Clear (Futures) and the Buyer or the Seller, as the case may be, in terms identical to the Market Contract except that ASX Clear (Futures) shall have the rights and obligations as the Seller or the Buyer as the case may be.
 - (b) a contract between a Facility Participant and the Seller or Buyer as the case may be in accordance with the rules of the Facility Participant.
- 31A.3 Where a Market Contract is Allocated to a Facility Participant prior to registration with ASX Clear (Futures), that Market Contract will not be registered with ASX Clear (Futures) in accordance with Rule 31 and the Market Contract will be deemed to be registered with the Facility Participant by the Buyer and Seller (or in the case of a Market Contract in respect of which only the position of one party is to be registered with ASX Clear (Futures), either the Buyer or the Seller, as the case may be) at the time the Market Contract is recorded with the Exchange.
- 31A.4 Subject to Rule 31A.5, where the Market Contract is not Allocated to a Facility Participant at the time it is recorded by the Exchange, the Market Contract will be registered with ASX Clear (Futures) in accordance with Rule 31.
- 31A.5 Where an Open Contract is Allocated to a Facility Participant after registration with ASX Clear (Futures) in the Exchange Allocation and Clearing System, the registration of that Open Contract with ASX Clear (Futures) shall be extinguished and a new open contract will be registered with the Facility Participant in accordance with its rules, such registration with the Facility Participant being deemed to have come into existence when the Market Contract was recorded by the Exchange in the manner prescribed in Schedule 1.
- 31A.6
- (a) Where a Market Contract is Recorded by the Exchange incorrectly, upon correction of any such Recording in accordance with the Exchange Operating Rules, the Market Contract registered with the Facility Participant shall also be deemed to be corrected, the Rules shall be read as if such Market Contract had originally been registered as corrected and ASX Clear (Futures) shall not be liable to any party as a result of any correction so made.

 - (c) Particulars of a Market Contract not Recorded by the Exchange (through failure of the parties to advise particulars of that Contract to the Exchange or otherwise) may subsequently be presented for registration in the Prescribed manner and confirmed to the Facility Participant by both parties to the Market Contract or in the case of a Market Contract in respect of which only the position of one party is to be registered with ASX Clear (Futures), either the Buyer or the Seller, as the case may be and upon the acceptance of such particulars by ASX Clear (Futures) with the approval of the Relevant Exchange the Market Contract shall be registered with the Facility Participant and these Rules shall apply accordingly.
- 31A.7 In the case of a Market Contract in respect of which only the position of one party is to be registered with ASX Clear (Futures), there will exist a contract between the Facility Participant and ASX Clear (Futures) by virtue of the position of a party to a Market Contract that has been registered with the Facility Participant so that the Facility Participant will be subject to the same obligations of any other Clearing Participant in the same way as if that position had been registered with ASX Clear (Futures) in the name

of the Facility Participant including without limitation the obligations to pay Daily Settlement Amounts and Intra Day and Extra Margins.

- 31A.8 ASX Clear (Futures) will have contractual rights and obligations only with the Facility Participant and no other person (including any Clearing Participant of the Facility Participant) will have any rights or obligations under the contractual relationship referred to in Rule 31A.7 or otherwise.

Upon the Allocated Clearing Participant confirming the Allocation within the period allowed by the Exchange Operating Rules or as Prescribed in the Schedules, unless ASX Clear (Futures) declines to accept an Allocation, the Open Contract between the Allocating Participant and ASX Clear (Futures) shall be extinguished and a new Open Contract will come into existence between ASX Clear (Futures) and the Allocated Clearing Participant on the same terms as the extinguished Open Contract.
- 32.2 ASX Clear (Futures) shall only accept Allocations by one Clearing Participant to another Clearing Participant. No Open Contract traded on the Exchange or a Related Exchange shall be allocated to any Clearing Participant which is not entitled under the Exchange or Related Exchange as the case may be Exchange Operating Rules to have a Market Contract registered with ASX Clear (Futures) in its name.
- 32.3 ASX Clear (Futures) may in its absolute discretion without giving any reason decline to accept the Allocation of an Open Contract or to accept such Allocation subject to conditions (including the deposit of Margin) being satisfied before or after such Allocation and a Clearing Participant shall comply with any such conditions. Any such decision shall be promptly notified to the relevant Clearing Participants.
- 32.4 The provisions of the Exchange Operating Rules relating to the allocation, confirmation and designation of Exchange Contracts insofar as they are stated to apply to Clearing Participants shall apply as though they were Rules of ASX Clear (Futures).
- 32.5 This clause 32 shall not apply to Open Contracts in the form of Bond Transactions or Repurchase Agreements.

33.4 The Transfer shall be effected in such manner and at such time as ASX Clear (Futures) determines and shall be subject to the acceptance of the Transferee Clearing Participant. For the purposes of determining the terms of the Open Contract to be transferred the determining time shall be the time of acceptance.

33.5 Upon the Transferee Clearing Participant accepting the Transfer in the manner prescribed in the Schedules the Open Contract between the Transferor Clearing Participant and ASX Clear (Futures) shall be extinguished and a new Open Contract will come into existence between ASX Clear (Futures) and the Transferee Clearing Participant to which the Open Contract has been transferred on the same terms as the extinguished Open Contract.

34 Registration Fees and Exchange Fees

Introduction

This Part of the Rules contains provisions whereby Open Positions are settled on a daily basis by ASX Clear (Futures) by a procedure known as settlement to market and new contracts opened on the same terms other than that they are at the Daily Settlement Price.

41 Accounts

41.1 An account shall be established at ASX Clear (Futures) with respect to each Clearing Participant and (unless otherwise Prescribed) in respect of such Relevant Exchanges at which the Market Contracts from the Clearing Participants' House Positions were originally traded, each such account to be known as a House Clearing Account. Each House Clearing Account shall be the account to which all monies or property owing to or from ASX Clear (Futures) in relation to relevant House Positions of a Clearing Participant shall be referable.

ASX Clear (Futures) may establish an additional House Clearing Account for a Clearing Participant with respect to a single Relevant Exchange, to which all monies or property owing to or from ASX Clear (Futures) in relation to relevant House Positions of a Clearing Participant for a prescribed Group of Contracts shall be referable.

41.2 In addition to each House Clearing Account Participant which is an Exchange Dealing Participant a Client Clearing Account shall be established at ASX Clear (Futures) and (unless otherwise Prescribed) in respect of each Relevant Exchange at which the Market Contracts which Clearing Participants' Client Positions arose were originally traded, each such account to be known as a Client Clearing Account. Each Client Clearing Account shall be the account to which all monies or property owing to or from a Clearing Participant with respect to relevant Client Positions shall be referable and to which all liabilities relating to such Client Positions shall attach.

ASX Clear (Futures) may establish an additional Client Clearing Account for a Clearing Participant with respect to a single Relevant Exchange, to which all monies or property owing to or from a Clearing Participant with respect to relevant Client Positions for a prescribed Group of Contracts shall be referable and to which all liabilities relating to such Client Positions shall attach.

41.3 Initial Margin, Variation Margin, Intra Day Margin or Extra Margin shall be calculable separately and (unless otherwise Prescribed) in respect of each Relevant Exchange for each House Clearing Account and Client Clearing Account of each Clearing Participant. Any Margin deposited with ASX Clear (Futures) by a Clearing Participant with respect to an Open Position shall be designated to the Account of that Clearing Participant to which the Open Position is designated. (Amended 28/10/02)

41.4 A Clearing Participant shall, with respect to all Positions held in its name with ASX Clear (Futures), designate in accordance with Exchange Operating Rules whether such Positions are Client Positions or House Positions. A Clearing Participant may with the approval of the Relevant Exchange and ASX Clear (Futures) alter such designation where the previous designation was made in error or is otherwise required in order to comply with the Exchange Operating Rules. Any such change in designation may be made subject to any condition imposed by ASX Clear (Futures) including a requirement that the Clearing Participant deposits further Initial Margins in relation to any Account of the Clearing Participant with ASX Clear (Futures).

Pending any designation all positions shall be deemed to be House Positions unless ASX Clear (Futures) in its absolute discretion designates them as Client Positions.

41.5 Upon a Default by a Clearing Participant ASX Clear (Futures) may in accordance with Part 7 of the Rules apply any surplus in any House Clearing Account or any other account of that Clearing Participant with ASX Clear (Futures) (whether or not arising from obligations under the Rules) to meet any deficiency in any Client Clearing Account of the Clearing Participant but shall not apply any surplus in any Client Clearing Account to meet any deficiency in any House Clearing Account of that Clearing Participant.

41.6 All securities or other collateral or property held by ASX Clear (Futures) with respect to Positions designated to a Client Clearing Account or House Clearing Account shall be dealt with by ASX Clear (Futures) in the same way as monies paid to the relevant Account and shall be allocated by ASX Clear (Futures) to such account.

41.7 In no circumstances shall any monies payable to, or securities, collateral or other property required to be allocated to, a Client Clearing Account be paid to or allocated to or used on the account of or in relation to Positions designated to a House Clearing Account.

41.8 With respect to CFD Positions, Clearing Participants must maintain Client accounts referable to each CFD Client within the Client Clearing Account.

Explanatory Note:

For clarity, any money, security or other collateral or property held by ASX Clear (Futures) with respect to Positions referable to CFD Clients under Rule 41.8 can be used by ASX Clear (Futures) to meet any obligations with respect to a Client Clearing Account and are subject to the same rules in relation to the treatment of money, security or other collateral or property held by ASX Clear (Futures) in a Client Clearing Account.

- (b) Amounts payable to ASX Clear (Futures) by a BRC Participant in relation to House Positions may be paid from the House Clearing Account or the BRC House Account, at the discretion of the BRC Participant.
- 41A.2 Margins shall be calculable separately for each BRC House Account of each BRC Participant. Any Margin deposited with ASX Clear (Futures) by a BRC Participant with respect to an Open Position shall be designated to the Account of that BRC Participant to which the Open Position is designated.
- 41A.3 Upon a Default by a BRC Participant ASX Clear (Futures) may in accordance with Part 7 of the Rules apply any surplus in any BRC House Account or any other account of that BRC Participant with ASX Clear (Futures) (whether or not arising from obligations under the Rules) to meet any deficiency of the BRC Participant.

Relationship with ASX Clear (Futures)

The payment of margin or settlement monies into a Client Clearing Account of a Clearing Participant or the designation by a Clearing Participant of an Open Position as a Client Position shall not in any way derogate from the fact that ASX Clear (Futures) is dealing with Clearing Participants as principals as provided for in Rule 31 and 31A, and ASX Clear (Futures) shall not in any way be required to recognise any clients of the Clearing Participant and shall not be in any way responsible for the performance of the obligations under Open Contracts to such clients. ASX Clear (Futures) shall not in any way, be on notice in relation to any matter arising between the Clearing Participant and any Client or otherwise affecting the Client. A Clearing Participant's obligations as principal to ASX Clear (Futures) shall extend to any monies owing to ASX Clear (Futures) in relation to any account established in relation to a Clearing Participant at ASX Clear (Futures) including (subject to Rule 41.7) any Client Clearing Account.

43 Initial Margin and Other Deposits

- 43.1 A Clearing Participant shall deposit with respect to each Open Position with ASX Clear (Futures) an amount determined by ASX Clear (Futures) in its absolute discretion from time to time (whether before or after the opening of such Open Position) upon demand or by such time as is Prescribed in the Schedules or is required by the Board or the Managing Director or his delegate. Such amount shall be held by ASX Clear (Futures) which shall be entitled to apply it in satisfaction of performance by the Clearing Participant of its obligations pursuant to these Rules. The Clearing Participant shall not be entitled to a refund or repayment of any amount so deposited except in accordance with these Rules and until the Position is Closed Out or completed by Delivery or acceptance of Delivery or is Mandatory Cash Settled. In this regard ASX Clear (Futures) shall without limitation of any other rights of ASX Clear (Futures) under the Rules have the rights of set-off referred to in Rule 47. ASX Clear (Futures) may in its absolute discretion accept the provision of securities or other collateral or property as a deposit instead of cash and may determine the valuation of any such property or securities for that purpose. ASX Clear (Futures) may from time to time require the provision of a deposit by way of further cash, securities, collateral or property to be deposited to ensure that the valuation of such securities or property and any cash is at least equal to the Initial Margin Liability of the Clearing Participant or may require that any securities or property be replaced with cash. The obligation upon a Clearing Participant to make a deposit pursuant to this Rule shall be in addition to any other obligation of the Clearing Participant to make deposits of cash, securities, collateral or property as otherwise provided in accordance with the Rules.
- 43.2 ASX Clear (Futures) may determine a higher rate of Initial Margin for a particular Clearing Participant or for all or some Clearing Participants for a particular Exchange Contract or contract month or options series or in such other manner as it considers appropriate.
- 43.3 Initial Margins applicable to Open Positions held by Clearing Participants may be changed from time to time and relate to both existing and new Open Positions.
- 43.4 The Board may Prescribe the amount of Initial Margin which a Clearing Participant shall deposit in relation to Open Contracts in the absence of any other determination requiring a greater Initial Margin pursuant to Rule 43. Such prescription may include provision for reduced amounts in circumstances Prescribed in the Schedules for example in relation to spread positions or where there are offsetting positions (whether registered or not). Part 7A – Termination With Respect To ASX Clear (Futures)**76 Termination**

If:

(a) **ASX Clear (Futures) Payment Default.** all of the following occur:

- (i) ASX Clear (Futures) fails to make, when due, any payment in respect of a payment claim of a Clearing Participant against ASX Clear (Futures) arising from an Open Contract;
- (ii) such Clearing Participant has notified ASX Clear (Futures) of such failure;
- (iii) such Clearing Participant notifies ASX Clear (Futures) again of such failure after the expiry of a period of not less than five Business Days after the notification in (ii); and
- (iv) ASX Clear (Futures)'s failure to make such payment to such Clearing Participant continues for a period of more than five Business Days after notification in (iii),

and for this purpose and without limitation, a payment will be considered to have been made by ASX Clear (Futures) if a corresponding amount has been credited to the relevant account of the relevant Clearing Participant. Delays in effecting such credit for technical reasons will not lead to an ASX Clear (Futures) Payment Default; or

(b) **ASX Clear (Futures) Insolvency Event.** ASX Clear (Futures) is wound-up in insolvency under the Corporations Act or is subject to statutory management either instituted by it or against it by a regulator, supervisor or any similar official with primary insolvency, rehabilitative or regulatory jurisdiction over it in Australia,

then, at the election of either ASX Clear (Futures) or any Clearing Participant (if a Clearing Participant makes this election then only its Open Contracts are affected):

- (I) the present and future obligations of ASX Clear (Futures) and each Clearing Participant to make payments under the terms of the Open Contracts are terminated and are no longer required to be made;
- (II) ASX Clear (Futures) is to calculate the Termination Value of those terminated obligations. The Termination Value is to be determined in a manner consistent with the amount which would be payable on the Daily Settlement Amount of the relevant Futures Contracts or the Termination of the relevant OTC Open Contracts under the OTC Rules; and
- (III) ASX Clear (Futures) will net the Termination Values so calculated in respect of each Clearing Participant so that only a net cash amount is payable in respect of them between ASX Clear (Futures) and each respective Clearing Participant. The net cash amount is to be payable by the party who is determined to owe it on the Business Day on which it is determined and notified to the Clearing Participant.

If ASX Clear (Futures) is, for operational reasons, unable to make one or more calculations or determinations required to be made under this Rule then those particular calculations are to be made by the relevant Clearing Participant.

Inserted []/[]/13

[Explanatory Note: The new Rule 76 provides for close-out netting of obligations between ASX Clear (Futures) and each Clearing Participant, at the election of either ASX Clear (Futures) or any Clearing Participant following an ASX Clear (Futures) Payment Default or ASX Clear (Futures) Insolvency Event.]

SCHEDULE 2**DAILY SETTLEMENT PAYMENTS AND PAYMENT OF MARGINS USING THE SPAN MARGINING SYSTEM**

- 1 The Initial Margins determined by the Board pursuant to Rule 43.4 or any other determination of Initial Margins made pursuant to Rule 44 may refer to the following categories of Initial Margin including concessional rates:
- 1.1 Full Initial Margin or Price Scanning Range: This is the rate that applies to the net futures equivalent to all futures positions in a Clearing Participant's account for each commodity (ie the net uncovered position). It is also the movement in the underlying futures prices used in determining initial margins on net options positions.
- 1.2 Volatility Scanning Range: This is the change in volatility applied to the net options positions in a Clearing Participant's account for each commodity.
- 1.3 Inter Month Rate: This is the rate that applies to the futures equivalent of any options and futures positions offset against any options and futures positions in a different delivery month for the same commodity.
- 1.4 Inter Commodity Concession: This is the concession to the Initial Margin on a Clearing Participant's account for offsetting positions in specified commodities.
- 1.5 Short Option Minimum: This is the minimum charge on short option for each commodity in a Clearing Participant's account.
- 1.6 Initial Margin on Options: Initial margins on options or combinations of options and futures will be calculated using the "SPAN" methodology developed by the Chicago Mercantile Exchange and the parameters defined in Section 1 above.

Margins for Bond and Repurchase Transactions

1. Initial Margins prescribed by the Board pursuant to By-law 43A.4 or any other determination of Initial Margins made pursuant to Rule 44A may refer to the following categories of Initial Margin. There are four key elements that contribute to the initial margin on a trade. All are considered margin parameters:

(a) Bond Volatility Margin

The amount of initial margin charged for the bond leg equals the change in value of the position if the clean price were to change by an amount equal to the haircut applied to the bond. The haircut applied to each bond represents the maximum expected change in price of the most volatile bond in each band and is set by considering historical price data. The characteristics of a bond – such as term, issuer and so on, also contribute to the banding of the bonds.

(b) Correlation/Savings Multiplier

The bonds will be grouped by characteristics of the bond, which may be volatility, maturity or yield. Correlation's will be calculated on offsetting positions for margin concessions between each bond group.

(c) Repurchase Agreement rate volatility Margin

In the event of counterparty default, ASX Clear (Futures) may be exposed to movements in Repurchase Agreement rate. To cover this risk, an amount will be factored into initial margin (as an additive amount) to cover potential movement.

(d) The counterparty multiplier

The counterparty multiplier is used to apply differential margins between BRC Participants. For example a BRC Participant with a credit rating of A-1+ may have a counterparty multiplier of 1 whilst an A-1 participant may have a multiplier of 1.5. It is expected that all initial BRC Participants will have a counterparty multiplier of 1.

The **total initial margin** is the sum of the results of the first three components multiplied by the counterparty multiplier.

SCHEDULE 10**CALCULATION OF ~~PARTICIPANT~~FUTURES COMMITMENTS OF A FUTURES PARTICIPANT****Definitions Used in This Schedule**

1 Aggregate Fixed Commitment: The aggregate of all ~~Futures~~Clearing Participants' Fixed Commitment ~~as defined in Rule 5.6(a)~~.

Aggregate Initial Margins: The aggregate of all ~~Futures~~Clearing Participants' Initial Margins held with ASX Clear (Futures).

Aggregate Variable Commitment: If the Aggregate Fixed Commitment is less than the total aggregate amount committed by ~~Futures~~Clearing Participants under the First Level Commitment, as calculated in accordance with the formula set out in Rule 5.6(a), (FLC) then the Aggregate Variable Commitment is the difference between the First Level Commitment and the Aggregate Fixed Commitment.

Calculation Period: From the 11th day of the final month in the second previous quarter to the 10th day (inclusive) of the final month in the previous quarter.

~~Clearing Participant Initial Margins: The total initial margins (the sum of total house and total client accounts) deposited by each Clearing Participant with ASX Clear (Futures).~~

~~Clearing Participant Variable Commitment: The Variable Commitment (as defined in Rule 5.6(a)(ii)) of each Clearing Participant for the New Quarter.~~

~~Clearing Participant Variable Commitment Proportion: Each Clearing Participant's percentage of the Aggregate Variable Commitment for the New Quarter.~~

First Level Commitment: As defined in the Rules.

Futures Participant Initial Margins: ~~The total initial margins (the sum of total house and total client accounts) (other than OTC Initial Margin) deposited by each Futures Participant with ASX Clear (Futures).~~

Futures Participant Variable Commitment: ~~The Variable Commitment (as defined in Rule 5.6(a)(ii)) of each Futures Participant for the New Quarter.~~

Futures Participant Variable Commitment Proportion: ~~Each Futures Participant's percentage of the Aggregate Variable Commitment for the New Quarter.~~

New Futures Participant: ~~A Futures Participant who has not previously been included in the Variable Commitment Calculation.~~

New Quarter: The quarter for which the Variable Commitment is being calculated. ~~It corresponds to a quarterly breakup of the period of Clearing Participant Commitment.~~ These quarters will start on 1 March, 1 June, 1 September and 1 December and will end 30 May, 31 August, 30 November and 28/29 February respectively.

~~New Clearing Participant: A Clearing Participant who has not previously been included in the Variable Commitment Calculation.~~

Previous Quarter: ~~The three calendar months preceding the New Quarter.~~

Retiring ~~Futures~~Clearing Participant: ~~A ~~person~~Clearing Participant whose admission as a Period of Clearing Participant was resigned or terminated effective during the Previous QuarterCommitment will end with the commencement of the New Quarter.~~

~~Period of Clearing Participant Commitment: As defined in the Rules.~~

~~Previous Quarter: The three calendar months preceding the New Quarter.~~

Second Level Commitment: As defined in the Rules.

Second Previous Quarter: The quarter prior to the Previous Qquarter.

~~Transition Period: From midnight on 14/11/93 to midnight on 30 November 1993.~~

[Amended 1/1/13](#)

- 2 The First Level Commitment is the sum of fixed and variable commitments. If the aggregate of the Fixed Commitment, pursuant to Rule 5.6(a), of all FuturesClearing Participants (the "Aggregate Fixed Commitment") is **equal to or in excess** of the total aggregate amount committed by FuturesClearing Participants under the First Level Commitment as calculated in accordance with the formula set out in Rule 5.6(a) (FLC), then there will be **no** requirement for any Variable Commitment to be made by any ClearingFutures Participant. If on the other hand the Aggregate Fixed Commitment is less than FLC, the Variable Commitment for each FuturesClearing Participant shall be calculated by ASX Clear (Futures) using the procedures set out in paragraphs 4 to 10 below of this Schedule.

[Amended 1/1/13](#)

- 3 If the Board determines that a Second Level Commitment is required from Clearing-Futures Participants it will be calculated in accordance with paragraphs 11 to 14 of this Schedule.

[Amended 1/1/13](#)

First Level Commitment

Variable Commitment Calculation

- 4 Except where ~~Transition Arrangements apply (or~~ the New FuturesClearing Participant or Retiring FuturesClearing Participant provisions of paragraph 9 and 10 apply), the Variable Commitment will be calculated so as to take effect from the first day of each new quarter. ~~The Transition Arrangements for the purposes of this Schedule are outlined in paragraph 15 of this Schedule.~~

[Amended 1/1/13](#)

- 5 The Aggregate Variable Commitment for all FuturesClearing Participants will be determined for the first day of each quarter by ASX Clear (Futures) using the following formula:

Aggregate Variable Commitment = FLC - Aggregate Fixed Commitment

(where FLC is the total aggregate amount committed by FuturesClearing Participants under the First Level Commitment, as calculated in accordance with the formula set out in Rule 5.6(a),

[Amended 1/1/13](#)

- 6 The FuturesClearing Participant Variable Commitment Proportion shall be calculated by taking the percentage that the daily average of each FuturesClearing Participant Initial Margins (where the average is calculated by taking the sum of each FuturesClearing Participant's initial margin on every Business Day in the Calculation Period and dividing it by the number of Business Days in the Calculation Period) represents of the aggregate of these daily average FuturesClearing Participant Initial Margins.

<u>FuturesClearing</u> Variable Proportion	Participant Commitment	=	<u>Average FuturesClearing</u> <u>Margins</u> Average of Aggregate Initial Margins
--	---------------------------	---	--

Note: For the purposes of this clause, in the case of BRC Participants the Variable Commitment Proportion may be determined by the Board at its discretion by reference to the value of Bond

[11315131-4](#)

Transactions or Repurchase Agreements cleared by each BRC Participant (rather than by reference to Initial Margins) or on such other similar basis as the Board may determine.

To ensure that such a calculation can be performed in time to take effect from the first day of the New Quarter, the Calculation Period of FuturesClearing Participant Variable Commitment Proportion will be from the eleventh day of the final month of the second previous quarter up to and including the tenth day of the final month in the previous quarter.

[Amended 1/1/13](#)

- 7 (a) The Variable Commitment requirement for each FuturesClearing Participant (the "FuturesClearing Participant Variable Commitment" or "FCPVC") will be calculated by multiplying the Aggregate Variable Commitment by each FuturesClearing Participant Variable Commitment Proportion. That is:

$$\text{FuturesClearing Participant Variable Commitment} = \text{Aggregate Variable Commitment} \times \text{FuturesClearing Participant Variable Commitment Proportion}$$

- (b) The FuturesClearing Participant Variable Commitment will be rounded to the nearest multiple of ten thousand dollars (if the FCPVC so calculated is not a multiple of ten thousand dollars and the difference between the calculated number and the next lowest multiple of ten thousand dollars is less than five thousand dollars then the FCPVC will be rounded down to the nearest multiple of ten thousand, otherwise it will be rounded up to the nearest multiple of ten thousand dollars, or as otherwise ensures that ASX Clear (Futures) has exactly the Aggregate Variable Commitment required).

[Amended 1/1/13](#)

- 8 ~~Except where transition arrangements apply, Each~~ FuturesClearing Participant will be advised by ASX Clear (Futures) of its FuturesClearing Participant Variable Commitment by the close of business of the seventeenth day of the final month of the previous quarter. If the seventeenth day of the final month is not a Business Day then the next succeeding Business Day will apply. These Variable Commitments will apply as of midnight on the last day of the previous quarter. Any adjustments to Futures Participant Variable Commitment held with ASX Clear (Futures) must be completed by 10.30am on the second last Business Day of the previous quarter.

[Amended 1/1/13](#)

- 9 If ~~the previous quarter is the last quarter in a Clearing Participant Period of Clearing Participant Commitment (a "Retiring Clearing Participant's")~~ resignation or termination was effective during the Previous Quarter, then, for the purpose of calculating each FuturesClearing Participant's Variable Commitment Proportion, in accordance with Paragraph 6 of this Schedule, the Retiring Clearing Futures Participant's average Total Initial Margins will be deducted from the actual average Aggregate Initial Margins and this adjusted Aggregate Initial Margin formula will be used as the basis of calculation.

~~If the Retiring Clearing Participant's Variable Commitment should cease on a day other than the first day of a new quarter then it is at the Board's discretion as to the date when the Clearing Participant Variable Commitments of all Clearing Participants (including the Retiring Clearing Participants) should be adjusted.~~

[Amended 1/1/13](#)

- 10 The calculation of the FuturesClearing Participant Variable Commitment Proportion for a FuturesClearing Participant not previously included in the quarterly recalculation (a "New FuturesClearing Participant") will be estimated by ASX Clear (Futures)-. Any estimates by ASX Clear (Futures) will be final and not be open to dispute. The following factors may be incorporated into any such estimate of the New FuturesClearing Participant's Variable Commitment:

[Amended 1/1/13](#)

- 10.1 If the New FuturesClearing Participant, or any related companies or any business operations it has acquired, have not held any Initial Margins in a Clearing Account with ASX Clear (Futures), or with a Clearing Futures Participant, prior to the commencement of the Variable Commitment calculation then its

~~ClearingFutures~~ Participant Variable Commitment will be estimated by ASX Clear (Futures) on the basis of forecast levels of market activity during the New Quarter.

[Amended 1/1/13](#)

- 10.2 If the New ~~ClearingFutures~~ Participant, any related companies or business operations it has acquired, have held any Initial Margins in a Clearing Account, or in the accounts of a futures broker or brokers, prior to the commencement of the Variable Commitment calculation then these Initial Margins will be incorporated into the calculation its ~~Futures~~ Participant Variable Commitment. In addition, ASX Clear (Futures) may, at its absolute discretion, incorporate additional initial margins based on forecast levels of market activity into the calculation of its ~~Futures~~ Participant Variable Commitment. Where the New ~~Futures~~ Participant has not held Initial Margins, for the full duration of the previous quarter an Average ~~ClearingFutures~~ Participant Variable Commitment Proportion will be calculated for the period the ~~ClearingFutures~~ Participant held initial margins with ASX Clear (Futures). To calculate the final Variable Commitment Proportion for each ~~FuturesClearing~~ Participant the original Aggregate Initial Margins will have to be recalculated including the Average ~~ClearingFutures~~ Participant Variable Commitment Proportion for the New ~~FuturesClearing~~ Participant.

[Amended 1/1/13](#)

- 10.3 If the New ~~FuturesClearing~~ Participant's Variable Commitment commences with the first day of a New Quarter then the New ~~ClearingFutures~~ Participant will be incorporated into the recalculation of all ~~FuturesClearing~~ Participants. This will involve recalculating the ~~FuturesClearing~~ Participant Variable Commitment proportion for all ~~FuturesClearing~~ Participants after incorporating the initial margin estimate for the New ~~ClearingFutures~~ Participant (provided by paragraphs 10.1 and 10.2 of this schedule) and readjusting each ~~FuturesClearing~~ Participant's Variable Commitment on the first day of each New ~~FuturesClearing~~ Participants Variable Commitment.

[Amended 1/1/13](#)

- 10A Where a ~~ClearingFutures~~ Participant has acquired the business of a former ~~FuturesClearing~~ Participant, the calculation of the ~~FuturesClearing~~ Participant Variable Commitment Proportion for the ~~FuturesClearing~~ Participant will be estimated by ASX Clear (Futures) in accordance with section 10 above, as though "the New ~~ClearingFutures~~ Participant" referred to in that section were the ~~ClearingFutures~~ Participant which has acquired the business.

[Amended 1/1/13](#)

~~(Amended 7/10/99)~~

[Explanatory Note: The amendments to the above provisions:

- *reflect that this schedule concerns the calculation of Futures Commitments of Futures Participants;*
- *insert definitions used in the calculations of the First Level and Second Level Commitments;*
- *remove the reference to Transition Arrangements (as they were defined), which ceased to apply from midnight on 30 November 1993;*
- *have been updated to reflect when resignations or terminations of a Clearing Participant become effective.]*

Second Level Commitment Calculation

11

(a) If the Board determines that a Second Level Commitment is required from FuturesClearing Participants the Second Level Commitment will be calculated so as to take effect from the first day of each new quarter.

(b) If, prior to that day, a Clearing Participant's resignation of its authorisation to clear Market Contracts (other than OTC Transactions) or termination is effective in accordance with Rule 11.1 or 11A.1 (respectively), the Futures Participant will not be required to provide any Second Level Commitment.

~~The Transition Arrangements for the purposes of this Schedule are outlined in paragraph 15 of this Schedule.~~

Amended []/ []/13

12

The Second Level Commitment requirement for each FuturesClearing Participant ("FuturesClearing Participant Second Level Commitment" or "FEPSLC") is calculated by multiplying the Second Level Commitment (as defined in Rule 5.6(b)) by each FuturesClearing Participant Variable Commitment Proportion (as calculated in paragraph 6 of this Schedule). That is:

FuturesClearing Participant Second Level Commitment =
Second Level Commitment X FuturesClearing Participant Variable Commitment Proportion

The FuturesClearing Participant Second Level Commitment will be rounded to the nearest multiple of ten thousand dollars (if the FEPSLC so calculated is not a multiple of ten thousand dollars and the difference between the calculated number and the next lowest multiple of ten thousand dollars is less than five thousand dollars then the FEPSLC will be rounded down to the nearest multiple of ten thousand, otherwise it will be rounded up to the nearest multiple of ten thousand dollars, or as otherwise ensures that ASX Clear (Futures) has exactly the Second Level Commitment required).

Amended []/ []/13

13

Each FuturesClearing Participant will be advised of, and be expected to provide, its FuturesClearing Participant Second Level Commitment at the same time as the Variable Commitment (outlined in paragraph 8 of this Schedule).

Amended []/ []/13

14

FuturesClearing Participant Second Level Commitments will be adjusted for Retiring and New FuturesClearing Participants in the same manner as FuturesClearing Participant Variable Commitments as outlined in paragraphs 9 and 10 of this Schedule.

Amended []/ []/13

[Explanatory Note: The amendments to sub-paragraph 11(b) set out when a Futures Participant is not required to provide any Second Level Commitment after it has given, or been given, a notice of resignation or termination.]

Transition Arrangements

15

For the purposes of this Schedule, on and from [insert date when amendments become effective], Commitments of Clearing Participants will continue to be held by ASX Clear (Futures) in accordance with these Rules for the same amount as, and will be treated as not being subject to the period of Commitment that applied, immediately before such date. The amendments to these Rules which take effect on [insert date when amendments become effective] are without prejudice to any election made by a Clearing Participant before such date not to renew its Commitment.

~~the Transition Arrangements will apply for the period 30 October 1993 to 30 November 1993. Under these Arrangements, to ensure appropriate security is in place by the start of the new commitment period, all Participants will be informed of their First and Second Level Commitments on 9 November 1993 and will be required to provide all First and Second Level Commitments by 26 November 1993.~~

11315131-4

~~In order to meet this timetable, the calculation period for the new commitment quarter starting 1 December 1993 will be shortened. For the purpose of paragraph 6 of this Schedule the Calculation Period will be from 11 August 1993 to 30 October 1993.~~

[Amended \[\] / \[\] / 13](#)

[\[Explanatory Note: The amendments to paragraph 15 set out the Transition Arrangements that apply to Commitments as of the date on which these amendments become effective.\]](#)

An Example

16 An example of the Variable Commitment and Second Level Commitment Calculations ~~(except where Transition Arrangements apply)~~ is set out below:

[Amended \[\] / \[\] / 13](#)

17 Assume we are about to start a new quarter and the number of [FuturesClearing](#) Participants remains unchanged from the previous quarter at 30 [FuturesClearing](#) Participants. The \$2 million Fixed Commitment of each of these [FuturesClearing](#) Participants will sum to give an Aggregate Fixed Commitment of \$60 million. The Board also determines that a \$30 million Second Level Commitment is required. Following paragraph 5 of this Schedule we calculate the following:

$$\begin{aligned} \text{Aggregate Variable Commitment} &= \$120 \text{ million} - \$60 \text{ million} = \underline{\$60 \text{ million}} \\ \text{Second Level Commitment} &= \$30 \text{ million} \end{aligned}$$

18 The average Aggregate Initial Margins for the previous quarter is equal to \$200 million. After calculating the [FuturesClearing](#) Participant Initial Margins for the previous quarter the [FuturesClearing](#) Participant Variable Commitment Proportions are distributed as follows:

Clearing Futures Participant Variable Commitment Proportion (%)	No. of FuturesClearing Participants	Share of Aggregate Initial Margins
6	4	24%
4.33	6	26%
3	10	30%
2	<u>10</u>	<u>20%</u>
	30	100%

* Note for simplicity this assumes only four different levels of [FuturesClearing](#) Participant Variable Commitment Proportion. In practice this is likely to be different for each [FuturesClearing](#) Participant.

19 From these [FuturesClearing](#) Participant Variable Commitment Proportions ("FCPVCP") we can calculate the Variable Commitment and Second Level Commitment of each [FuturesClearing](#) Participant by multiplying each FCPVCP by the Aggregate Variable Commitment of \$60 million and the Second Level Commitment of \$30 million. That is,

CPVCP %	Participant Variable Commitment	Participant Fixed Commitment	Second Level Commitment	Total Participant Commitment	No of FuturesClearing Participants	Total Commitment
6	\$3.60m	\$2m	\$1.80m	\$7.40m	4	\$ 29.60m
4.33	\$2.60m	\$2m	\$1.30m	\$5.90m	6	\$ 35.40m
3	\$1.80m	\$2m	\$0.90m	\$4.70m	10	\$ 47.00m
2	\$1.20m	\$2m	\$0.60m	\$3.80m	10	\$ 38.00m
					30	\$150.00m

As is evident, the exact manner in which the \$120 million First Level Commitment and any Second Level Commitment is divided amongst [FuturesClearing](#) Participants will depend upon the number of

[11315131-4](#)

[Futures Clearing](#) Participants and the proportion each has of the total initial margins held by ASX Clear (Futures).

Amended 01/03/08

[\[Explanatory Note: The amendments update the example to reflect that it concerns the calculation of Futures Commitments of Futures Participants.\]](#)

SCHEDULE 14 – GRAIN CONTRACTS

14.1 APPLICATION

14.1.1 Application of Rules

Schedule 14 applies to Grain Contracts.

14.2 TENDER PROCESS

14.2.1 Election to tender by Seller

Where the Seller in respect of a contract elects to effect delivery and settle its obligations during the Delivery Period, the Seller must submit Tender Documentation with ASX Clear (Futures) in the form and manner determined by ASX Clear (Futures) in accordance with the Procedures. In any event, the Seller must submit Tender Documentation on the Last Trading Day by the time set out in the Procedures. Tender Documentation submitted after the time prescribed in the Procedures, other than on the Last Trading Day, will be taken to have been submitted on the following Business Day.

At the time of submitting Tender Documentation the Seller must ensure that ASX Clear (Futures) holds for the benefit of the Seller an Interest of at least the Specified Quantity for each contract in accordance with Rule 14.4.

14.2.2 Acceptance of Tender Documentation

ASX Clear (Futures) is not obliged to accept any Tender Documentation and will notify the Seller, in accordance with Rule 14.2.6, when it has accepted Tender Documentation submitted by the Seller under Rule 14.2.1. Without limiting ASX Clear (Futures) discretion whether or not to accept Tender Documentation, ASX Clear (Futures) may reject Tender Documentation where, for example, ASX Clear (Futures) is not satisfied that ASX Clear (Futures) holds a sufficient portion of the Interest for the benefit of the Seller to enable the Seller to discharge its settlement obligations in respect of the contracts the subject of the Tender Documentation under Rule 14.3.2.

If ASX Clear (Futures) rejects Tender Documentation, it will notify the Seller in accordance with the Procedures of that rejection, and the reasons for that rejection, as soon as practicable.

14.2.3 Tender Documentation may not be amended or withdrawn

A Seller may not amend or withdraw Tender Documentation submitted under Rule 14.2.1 without the prior written consent of ASX Clear (Futures).

14.2.4 ASX Clear (Futures) to allocate tender

If Tender Documentation is accepted by ASX Clear (Futures) in respect of one or more contracts under Rule 14.2.2 and the Tender Documentation is not withdrawn under Rule 14.2.3, ASX Clear (Futures) will allocate for settlement a corresponding number of contracts in the same Series or Delivery Month registered in the name of one or more Buyers.

14.2.5 Procedures for allocation

The allocation under Rule 14.2.4 will be on the basis of random selection or other process determined by ASX Clear (Futures) from time to time and set out in the Procedures.

14.2.6 ASX Clear (Futures) to confirm acceptance of Tender Documentation and allocation

ASX Clear (Futures) will, as soon as practicable and in accordance with the Procedures, notify the Seller of the acceptance of Tender Documentation under Rule 14.2.2 and notify the Buyer or Buyers of the allocation under Rule 14.2.4.

14.2.7 Tender Documentation and allocation restrictions

ASX Clear (Futures) may at any time impose a restriction on the acceptance of Tender Documentation or the allocation under Rule 14.2.4 if it determines the restriction is appropriate having regard to ASX 24 Operating Rule 6120. If ASX Clear (Futures) imposes a restriction on one or more Participants, those Participants must comply with that restriction.

14.3 SETTLEMENT

14.3.1 Settlement process

The settlement of rights and obligations under the relevant Futures CCP Contracts following the allocation process in Rule 14.2.4 will be effected in accordance with this Rule 14.3.

14.3.2 Settlement with the Seller

Subject to these Rules, where the Seller elects to effect delivery, it must, in respect of the Futures CCP Contract between the Seller and ASX Clear (Futures), have lodged Tender Documentation in accordance with the Procedures. ASX Clear (Futures) must, in respect of the Futures CCP Contract between the Seller and ASX Clear (Futures), pay the Settlement Amount to the Seller at the applicable Settlement Time. ASX Clear (Futures) will amend its records at or as soon as practicable after the applicable Settlement Time, to record that, effective at the applicable Settlement Time, the proportion (by volume) of the Interest which ASX Clear (Futures) holds for the benefit of the Seller falls by the Specified Quantity.

14.3.3 Settlement with the Buyer

Subject to these Rules, the Buyer must, in respect of the Futures CCP Contract between the Buyer and ASX Clear (Futures), pay the Settlement Amount to ASX Clear (Futures) by the applicable Settlement Time. Subject to the Buyer paying that amount by that time, ASX Clear (Futures) will amend its records at or as soon as practicable after that time to record that, effective from the applicable Settlement Time, the proportion (by volume) of the Interest which ASX Clear (Futures) holds for the benefit of the Buyer (which may, immediately before the applicable Settlement Time, be zero) increases by the Specified Quantity.

14.4 HOLDING THE INTEREST

14.4.1 Transfer of Interest by Participant to ASX Clear (Futures)

When a Participant transfers or procures the transfer of an Interest in a quantity of the Underlying Commodity to ASX Clear (Futures), ASX Clear (Futures) will hold that Interest for the benefit of that Participant from the time at which the Bulk Handler records ASX Clear (Futures) as the owner of that interest under the terms of the Bulk Handler Agreement.

14.4.2 Holding of Interest for Buyer following settlement of Futures CCP Contract

On the settlement of a Futures CCP Contract between ASX Clear (Futures) and the Buyer under Rule 14.3.4, ASX Clear (Futures) will, from the applicable Settlement Time, hold the Interest referred to in Rule 14.3.2 for the benefit of the Buyer referred to in that Rule.

A Buyer may at any time thereafter direct ASX Clear (Futures) to transfer the Interest to the Buyer's account or another account at the Bulk Handler in accordance with the Procedures.

14.4.3 Application of Bulk Handler Agreement

Each Participant for whom ASX Clear (Futures) holds the Interest under these Rules acknowledges that the Bulk Handler will store the Underlying Commodity for a number of clients of the Bulk Handler and will recognise the interest of ASX Clear (Futures) in the stored Underlying Commodity with other clients of the Bulk Handler (as owners in common). Those Participants acknowledge that the Bulk Handler will

recognise ASX Clear (Futures) as the owner of the Underlying Commodity and is not bound to recognise that ASX Clear (Futures) holds any part of that interest for the benefit of one or more Participants.

14.4.4 Co-mingling

Each Participant for whom ASX Clear (Futures) holds the Interest under these Rules also acknowledges the Interest which ASX Clear (Futures) holds at any point in time may be held for the benefit of more than one Participant. The proportion of the Interest held for the benefit of each Participant will be determined by ASX Clear (Futures) in accordance with its records, which will record that proportion as a volume of the Underlying Commodity.

14.4.5 ASX Clear (Futures) right to convert old season grain

Each Participant acknowledges that the Bulk Handler Agreement may give ASX Clear (Futures), as the holder of the Interest the right to convert "old season grain" to "new season grain". ASX Clear (Futures) intends, to the extent permitted under the Bulk Handler Agreement, to exercise that right.

Where ASX Clear (Futures) cannot exercise that right, ASX Clear (Futures) will notify Participants accordingly and will make a direction in accordance with Rule 14.4.7.

14.4.6 Interest held at location specified by ASX Clear (Futures)

Each Participant acknowledges that ASX Clear (Futures) holds the portion of the Interest held for the Participant's benefit at the location specified by ASX Clear (Futures).

Without limiting Rule 14.4.10, any costs and expenses incurred by ASX Clear (Futures) in respect of the conversion will be borne by the Participants for whom ASX Clear (Futures) holds the Interest at the time of conversion.

14.4.7 ASX Clear (Futures) direction to take Interest or Underlying Commodity

ASX Clear (Futures) may direct a Participant to:

- (a) accept a transfer from ASX Clear (Futures) of all or part of the Interest which ASX Clear (Futures) holds for its benefit; or
- (b) accept physical delivery from ASX Clear (Futures) (or its agent) of all or part of the Underlying Commodity represented by the Interest which ASX Clear (Futures) holds for its benefit.

The Participant must immediately comply with any direction given by ASX Clear (Futures) under this Rule 14.4.7 and take all steps and execute all documents required to give effect to that direction.

14.4.8 Failure to comply with direction

If a Participant fails to comply with a direction under Rule 14.4.7, the Participant irrevocably authorises ASX Clear (Futures) to take any action which ASX Clear (Futures) considers appropriate to dispose of the relevant portion of the Interest including, without limitation:

- (a) sell the Underlying Commodity represented by that portion of the Interest and following such sale, account to the Participant for the proceeds of sale after deducting any costs, expenses, taxes or other amounts incurred by ASX Clear (Futures) in connection with the sale;
- (b) out-turn from the Bulk Handler the Underlying Commodity represented by that portion of the Interest and deliver the Underlying Commodity to another location selected by ASX Clear (Futures) in its discretion.

The Participant indemnifies ASX Clear (Futures) in respect of all losses, damages, liabilities, claims, costs and expenses arising in connection with any failure by the Participant to comply with a direction under Rule 14.4.7 and any exercise by ASX Clear (Futures) of its powers under this Rule 14.4.8.

14.4.9 Representations by Participant

Each Participant:

- (a) which transfers, or procures the transfer of an Interest to ASX Clear (Futures) under Rule 14.4.1 or which requests the transfer or procures the transfer of an Interest from ASX Clear (Futures) under this Rule 14.4:
 - (i) represents and warrants that it has and will continue to have for so long as it is the relevant Participant in respect of that Interest, the capacity and authority to do so; and
 - (ii) warrants to ASX Clear (Futures) and to each other Participant that the Interest or any other interest in the Underlying Commodity is free from any encumbrance, lien, tax or levy;
- (b) for whom ASX Clear (Futures) holds a portion of the Interest under Rule 14.4.2 represents and warrants that it has and will continue to have for so long as it is the relevant Participant in respect of that Interest, the capacity and authority to do so; and
- (c) indemnifies ASX Clear (Futures) in respect of all losses, damages, liabilities, claims, costs and expenses arising from any representation or warranty by that Participant under paragraphs (a) or (b) of this Rule 14.4.9 being incorrect.

14.4.10 Indemnity from Participants

Each Participant for whom ASX Clear (Futures) holds the Interest under these Rules indemnifies ASX Clear (Futures) in respect of all losses, damages, liabilities, claims, costs and expenses arising in connection with the holding of that Interest. The apportionment of liability under this indemnity among Participants will be determined by ASX Clear (Futures) acting reasonably and having regard to the proportion of the Interest which it holds for the benefit of each of the relevant Participants at the relevant times.

14.4.11 Insurance

ASX Clear (Futures) has no obligation to insure any Interest or any Underlying Commodity represented by that Interest.

Rule 4.2(a) Becoming a Clearing Participant

Application Form – Please contact the Exchange for a copy of the Clearing Participant Application Form.

Rule 4.14 Becoming a Clearing Participant

Each Clearing Participant must provide to ASX Clear (Futures) an annual audit certificate, in the form determined by ASX Clear (Futures), within 3 months of its financial year end.

Each Clearing Participant is to submit Form 1 and 2 and where a Clearing Participant is an AFSL licensee a copy of the FS 71 audit report. Clearing Participants which are foreign ADIs and who are exempted by ASIC Class Order CO 03/823 from the requirement to prepare FS71 audit reports, may lodge the equivalent audit report that they lodge with ASIC. Exceptions to the above require the approval of ASX Clear (Futures).

Forms 1 and 2 should be submitted via email to CRAteam@ASX.com.au. FS71 or an equivalent audit report should be forwarded to Compliance@asx.com.au.

Foreign Participants can choose to have their internal controls and return audited according to Australian auditing standards and code of ethics or auditing standards and code of ethics of their home jurisdiction. The appropriate selection should be made in the Form 1 and Form 2. Notwithstanding this selection, ASX Clear (Futures) reserves the right to require an auditor to provide a report based on the Australian auditing standards and/or code of ethics.

Form 1 – Independent Auditor’s Report on Net Tangible Assets Rules

Independent Auditor’s Report to the Directors of [Participant name]

We have audited the internal control policies and procedures (“internal controls”) of [Participant Name] (the “Participant”) designed to ensure compliance with the requirements of:

ASX Clear (Futures) Pty Limited’s (“ASX Clear (Futures)”) Operating Rule 8.1 in relation to the maintenance of net tangible assets (the “Net Tangible Assets Rules”)

in order to express an opinion about their effectiveness for the [period/year] ended [date].

The Responsibility of the Directors for Internal Controls

The directors of the Participant are responsible for maintaining an effective internal control structure, including establishing and maintaining accounting records and effective internal controls designed to ensure compliance with the requirements of the Net Tangible Assets Rules. We have conducted an independent audit of the internal controls designed to ensure compliance with the requirements of the Net Tangible Assets Rules in order to express an opinion on them to the directors of the Participant for the [period/year] ended [date].

Auditor’s Responsibility

Our audit has been conducted in accordance with **Australian Auditing Standard AUS810 “Special Purpose Reports on the Effectiveness of Control Procedures”**[insert auditing standards applicable to Participant’s home jurisdiction] and accordingly included such tests and procedures as we considered necessary in the circumstances. These procedures have been undertaken to form an opinion whether in all material aspects, the Participant maintained suitably designed and effective internal controls to ensure compliance with the requirements of the Net Tangible Assets Rules for the [period/year] ended [date].

INHERENT LIMITATIONS

Because of the inherent limitations of any internal control structure it is possible that fraud, errors or non-compliance with laws and regulations may occur and not be detected. Further, the overall internal control structure, within which the internal controls designed to ensure compliance with the requirements of the Net Tangible Assets Rules operate, has not been audited, and no opinion is expressed as to its effectiveness.

An audit is not designed to detect all weaknesses in internal controls or all instances of non-compliance with the requirements of the Net Tangible Assets Rules as it is not performed continuously throughout the period/year and the tests performed over the internal controls are on a sample basis having regard to the nature and size of the Participant.

Any projection of the evaluation of internal controls to future periods is subject to the risk that the internal controls may become inadequate because of changes in conditions, or that the degree of compliance with them may deteriorate.

The audit opinion expressed in this report has been formed on the above basis.

BASIS FOR QUALIFIED OPINION (IF APPLICABLE)

[QUALIFIED] AUDITOR’S OPINION

In our opinion, [except for the matters referred to in the qualification below,] [Participant Name]:

maintained, in all material respects, during the [period] ended [date] suitably designed and effective internal controls to comply with the requirements of ASX Clear (Futures) Pty Limited’s Operating Rule 8.1 in relation to the maintenance of net tangible assets.

This report has been prepared for the Participant in order to meet its obligations to lodge this report with ASX Clear (Futures) Pty Limited. We disclaim any assumption of responsibility for reliance on this report to any person other than the Participant and ASX Clear (Futures) Pty Limited or for any purpose other than that for which it was prepared.

The Responsibility of the Directors for the Return

The **directors** of the Participant are responsible for the preparation and fair presentation of the financial information set out in the Return in accordance with the requirements of the **ASX Clear (Futures) Pty Limited ("ASX Clear (Futures)") Operating Rules**. Auditor's Responsibility

Our responsibility is to express an opinion on the financial information set out in the Return based on our audit. We conducted our audit in accordance with **Australian Auditing Standards/[insert auditing standards applicable to Participant's home jurisdiction]**. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance, whether the financial information set out in the attached Return, is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures of the financial information set out in the Return. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial information set out in the Return whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the Participant's preparation and fair presentation of the financial information set out in the Return in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Participant's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors of the Participant, as well as evaluating the overall presentation of the financial information set out in the Return.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

INDEPENDENCE

In conducting our audit, we have complied with the independence requirements of **APES 110: Code of Ethics for Professional Accountants/[code of conduct legislation applicable to Participant's home jurisdiction]**.

BASIS FOR QUALIFIED OPINION (IF APPLICABLE)

[QUALIFIED] AUDITOR'S OPINION

Rule 46.1 Daily Close-Out of Matched Positions

An Open Position in a CFD contract cannot be closed out under Rule 46.1 unless the Open Position are for the same beneficial client for the same CFD Contract. The definition of client for the reporting of Open Positions for the Open Interest Charge calculation means;

“Any person, firm or corporation (including a Related Body Corporate) on behalf of whom a Participant or a client of a Participant provides instructions to enter, acquire or dispose of a CFD”.

Rule 46.5 Daily Close-Out of Matched Positions (including Back-to-Back Open Positions)

In accordance with Rule 46.5, ASX Clear (Futures) directs Clearing Participants as to the correct treatment of Back-to-Back Open Positions in this Direction. Where a Clearing Participant fails to comply with this Direction, such a failure will constitute a breach of the Rules and the Clearing Participant will be subject to the disciplinary process associated with such a breach.

Specifically, ASX Clear (Futures) directs Clearing Participants as follows:

- Clearing Participants must Close Out Back-to-Back Open Positions within each Individual Account no later than the time prescribed for the purposes of Rule 46.1 on the Business Day following the creation of those Back-to-Back Open Positions;
- Except as specified below in so far as it relates to Open Positions across multiple Individual Accounts of a single legal entity, Open Positions held within an Individual Account, whether or not it is a sub-account of an Affiliated Account, must not at any time be settled or offset against Open Positions held within another Individual Account or sub-account, unless these positions are formally transferred on market into the same Individual Account; and
- If a Clearing Participant wishes to Close Out Open Positions across multiple Individual Accounts of a single legal entity, the Clearing Participant must ensure legal advice is obtained that such activity does not constitute a breach of the Rules or the law.

Introduction

Open Interest (OI) is one of a number of indicators of a market's depth of liquidity. Exchange's OI is derived from the summing of Open Positions held by all Clearing Participants in their House Clearing Accounts and Client Clearing Accounts (collectively referred to as "Clearing Accounts") at the end of each trading day. These figures are submitted daily by the relevant Clearing Participant into ASX Clear (Futures)'s OM SECUR clearing system in accordance with Rule 46.1.¹

A Clearing Participant would derive the figures to be submitted into OM SECUR from the summing in its back office of Open Positions held in Individual House Accounts² and Individual Client Accounts³ (collectively referred to as "Individual Accounts").⁴ Accordingly, the fundamental level at which market liquidity is held is at the level of the Individual Account.

It has come to ASX Clear (Futures)'s attention that not all Clearing Participants have been netting Individual Accounts in their back offices in a manner which enables the most accurate OI to be derived. In particular, ASX Clear (Futures)

¹ Rule 46.1 requires a Clearing Participant to advise SFE Clearing on a daily basis of the number of Open Positions which it wishes to remain open. This advice is effected through the Clearing Participant submitting that information into OM SECUR.

² An 'Individual House Account' is an individual account established by an Exchange Participant on its own behalf for the purposes of Trading on the Exchange.

³ An 'Individual Client Account' is an individual account established by an Exchange Participant for a Client for the purposes of Trading on the Exchange.

⁴ The total Open Positions held in a particular Clearing Participant's House Clearing Account should be derived in that Clearing Participant's back office from summing the number of Open Positions held in each of its Individual House Accounts. The total Open Positions held in a particular Clearing Participant's Client Clearing Account should be derived in that Clearing Participant's back office from summing the number of Open Positions held in each of its Individual Client Accounts.

is concerned with the failure of certain Clearing Participants to consistently Close Out in their back offices Back-to-Back Open Positions⁵ within Individual Accounts. If submitted into OM SECUR, such Back-to-Back Open Positions may inflate the OI figure without actually indicating an increase in the true liquidity of the market.

To enhance the integrity of OI, ASX Clear (Futures) now requires that, in fulfilling their obligations under Rule 46.1, Clearing Participants must (as outlined in this Direction) Close Out Back-to-Back Open Positions within each Individual Account no later than the time prescribed for the purposes of Rule 46.1 on the Business Day following the creation of those Back-to-Back Open Positions in their back offices in order that such positions do not form part of the total number of Open Positions submitted into OM SECUR towards the relevant Clearing Account.⁶

The Tables below illustrate how Clearing Participants must comply with this Direction.

Amended 01/07/10

Application of this Direction

In Table 1 below, assume that a Client Clearing Account of a Clearing Participant contains Individual Client Accounts which hold the following Open Positions in a particular futures contract⁷:

Table 1 - Example of a Client Clearing Account

<u>Client Clearing Account</u>	<u>Short</u>	<u>Long</u>	<u>Net (to be submitted into OM SECUR)</u>
Individual Client Account 1	-400	+50	-350
Individual Client Account 2	0	+500	+500
Individual Client Account 3	-300	+500	+200
<i>Total</i>	<i>-700</i>	<i>+1050</i>	<i>-350, +700</i>

Closing Out Back-to-Back Open Positions in Individual Accounts

In the above table, Individual Client Account 1 holds Back-to-Back Open Positions of 50 lots and Individual Client Account 3 holds Back-to-Back Open Positions of 300 lots. Individual Client Account 2 does not contain any Back-to-Back Open Positions. Before determining each Individual Client Account's contribution to the Client Clearing Account, Back-to-Back Open Positions are to be eliminated from each Individual Client Account in the Clearing Participant's back office. As shown in the 'Net' column of the above table, the resulting net positions to form part of the total to be submitted into OM SECUR would be -350 short in Individual Client Account 1 and +200 long in Individual Client Account 3. As no Back-to-Back Open Positions are held in Individual Client Account 2, the entire +500 long positions held would form part of the total to be submitted into OM SECUR as part of the Client Clearing Account total.

Therefore, for the purposes of submitting the most accurate representation of the Open Positions within the above Client Clearing Account into OM SECUR, the Clearing Participant must submit the gross sum of the individual net positions of each Individual Client Account, -350/+700.

Affiliated Accounts

Individual Accounts may be grouped together as an "Affiliated Account."⁸ Within an Affiliated Account, there may be a mix of long and short positions in a given contract in separate Individual Accounts (sub-accounts). In order to provide an accurate representation of the holdings within an Affiliated Account, Clearing Participants are required to submit the

⁵ 'Back-to-Back Open Positions' are Open Positions within an Individual Account which can be matched and settled against each other.

⁶ Such a practice would also reduce the risk of incorrect settlements being made in error.

⁷ The same principle would apply to a House Clearing Account and Individual House Accounts.

⁸ An Affiliated Account is defined in the Sydney Futures Exchange Limited Business Rules and is also known as an "omnibus account" (but is distinct from a Clearing Account). Affiliated Accounts are often held on behalf of fund management entities and trading desks which run a number of books for different purposes. In addition, SFE Clearing is aware that some Clients mandate use of a single account to trade multiple strategies (for example, long trades for funding, short trades for hedging). SFE Clearing considers that such an account is in fact a number of Individual Accounts comprising an Affiliated Account and should be treated by Clearing Participants as such for the purposes of submitting Open Positions into OM SECUR.

gross sum of the net holdings of each sub-account into OM SECUR. That is, each sub-account within the Affiliated Account, as opposed to the Affiliated Account as a whole, is considered to be an Individual Account for the purposes of calculating and Closing Out Back-to-Back Open Positions.

By way of illustration in the table below, assume that an Affiliated Account of a Clearing Participant contains sub-accounts which hold the following Open Positions in a particular futures contract:

Table 2 - Example of a Client Clearing Account

<u>Client Clearing Account</u>	<u>Short</u>	<u>Long</u>	<u>Net (to be submitted into OM SECUR)</u>
Affiliated Account			
Sub-account 1	0	+100	+100
Sub-account 2	-600	+150	-450
Sub-account 3	-500	+700	+200
<i>Total</i>	<i>-1100</i>	<i>+950</i>	<i>-450, +300</i>

Closing Out Back-to-Back Positions in Affiliated Accounts

For the example in the above table, it would not be appropriate for a Clearing Participant to Close Out positions within the Affiliated Account as though the Affiliated Account were one Individual Account (i.e. by netting –1100 short against +950 long, resulting in a net position of –150 short). Rather, each separate sub-account would be netted individually and the resulting net positions form part of the total to be submitted into OM SECUR. In the above table, Sub-account 2 in the Affiliated Account holds Back-to-Back Open Positions of 150 lots and Sub-account 3 holds Back-to-Back Open Positions of 500 lots. Sub-account 1 does not contain any Back-to-Back Open Positions. Before determining each sub-account's contribution to the Client Clearing Account, these Back-to-Back Open Positions must be eliminated from calculation in the Clearing Participant's back office.

As shown in the 'Net' column of the above table, the resulting net positions to form part of the total to be submitted into OM SECUR would be –450 short in Sub-account 2 and +200 long in Sub-account 3. As no Back-to-Back Open Positions are held in Sub-account 1, the entire +100 long positions held would form part of the total to be submitted into OM SECUR as part of the Client Clearing Account total.

Thus for the above Affiliated Account, a –450/+300 holding (which has been derived from a sum of the individual net position figures in each sub-account within the Affiliated Account) would be submitted to OM SECUR as the most accurate representation of the holdings in that Client Clearing Account.

In order that an account can be treated as an Affiliated Account (and be entitled to hold Back-to-Back Open Positions), Participants must request explicit instructions in this regard (as well as the rationale for it) from their clients (which may include entities related to the Participant) and must retain these instructions on file. Further, Participants must instruct their clients to provide them with daily instructions as to the number of Back-to-Back Positions required to be left open in order to report their Affiliated Account in accordance with this Direction.

If a Participant does not receive instructions from its client that an account is being operated as an Affiliate Account, this Direction must be followed and Back-to-Back Open Positions must be closed out of the account. If the Client wishes to operate an account as an Affiliated Account, they must commit to informing the Participant daily of how many open positions are to be maintained (or how many back-to-back positions are to be closed out) in line with this Direction.

Amended 01/07/10

Exception to this Direction

Differentiated Deliverable Commodities

This Direction to Close Out Back-to-Back Open Positions outlined above applies to cash-settled contracts (e.g. SPI 200™ futures contracts, Commonwealth Treasury Bond futures contracts etc) and deliverable contracts where all deliverable commodities are functionally identical (e.g. Individual Share Future contracts, currency future contracts etc), as Back-to-Back Open Positions in such contracts do not contribute to market liquidity.

However, Back-to-Back Open Positions which are held in deliverable contracts where the deliverable commodities may vary in quality, nature or some other means (e.g. Greasy Wool) may represent a contribution to market liquidity, where there is intent or likelihood to both take and make a delivery at a single expiry. Accordingly, such Back-to-Back Open Positions may be maintained and included as part of the number of Open Positions submitted into OM SECUR.

Amended 01/07/10

Inappropriate Practices

Except as specified below in so far as it relates to Open Positions across multiple Individual Accounts of a single legal entity, Open Positions held within an Individual Account, whether or not it is a sub-account of an Affiliated Account, must not at any time be settled or offset against Open Positions held within another Individual Account or sub-account, unless these positions are formally transferred on market into the same Individual Account.

Any such activity may represent inappropriate off-market trading and may constitute a breach of the Rules or the law.

If a Clearing Participant wishes to Close Out Open Positions across multiple Individual Accounts of a single legal entity, the Clearing Participant must ensure legal advice is obtained that such activity does not constitute a breach of the Rules or the law.

For example, in Table 1 above, if the Open Positions within Individual Client Account 1 are inappropriately offset against the Open Positions within Individual Client Account 3 the resulting net position would be –150 short. However, the correct number of Open Positions to be included in the total to be submitted to OM SECUR are –350 short for Individual Client Account 1 and +200 long for Individual Client Account 3.

Amended 01/07/10

Implementation

Clearing Participants are required to follow this Direction in their treatment of Back-to-Back Open Positions.

Where a Clearing Participant fails to comply with this Direction, such a failure will constitute a breach of the Rules and the Clearing Participant will be subject to the disciplinary process associated with such a breach.

Clearing Participants are also reminded of the importance of maintaining appropriate Close Out procedures and audit trails. Documentation held in this regard may be reviewed as part of a Clearing Participant compliance inspection or operational review and must be made available to ASX Clear (Futures) on request.
