

ASX ETF INSTITUTIONAL CONFERENCE

Dr Stefan Hajkowicz

**Principal Scientist
CSIRO**

Stefan is a principal scientist with CSIRO who spends his time thinking about how people make decisions and plan for an uncertain future. His academic qualifications from the University of Queensland and University of New England are in the fields of geography, economics and decision theory.

He is currently leading a diverse portfolio of research on global food security, the rise of the digital economy, the future of Australian sport, trends reshaping the retail, office and industrial property sectors and human service delivery systems.

Just recently he's started thinking about economic growth in Asia and what it means for Australian industry. Stefan has published widely in the international scientific literature and is regularly invited to deliver keynote talks to community and professional audiences.
